Contents

Fig. 1S Photographs of xerogels prepared from BPH-8 a) in ethanol and b) in THF. c) SEM images of xerogel of BPH-8 from ethanol. Inset is the water CA of the surface.

Fig. 2S Photographs of xerogels prepared from BPH-8 a) in THF/DMSO, b) in EtOH/DMSO, c) in THF/DMSO/EtOH and d) in THF/ EtOH.

Fig. 3S UV-vis absorption spectra of the prepared BPH-8 film surfaces with EtOH/THF volume ratio of 10:0.

Fig. 4S UV-vis absorption spectra of the prepared BPH-8 film surfaces with EtOH/THF volume ratio of 9:1.

Fig. 5S UV-vis absorption spectra of the prepared BPH-8 film surfaces with EtOH/THF volume ratio of 8:2.

Fig. 6S Time-dependent fluorescence emission spectra of BPH-8 in ethanol with λ_{ex}=291 nm from hot solution to gel state (1.1×10-3 mol L-1).
