Elements
VOLUME 3**

THE CHEMICAL SOCIETY

Specialist Periodical Reports

The enormous increase in the rate of accumulation of knowledge witnessed during the past few years now makes any attempt at comprehensive coverage of chemistry within the compass of a single annual volume, such as *The Chemical Society Annual Reports*, unattainable both in terms of reasonable size and cost.

It was with this in mind that in 1967 the Society launched the *Specialist Periodical Reports* series. The aim of the series is to provide systematic and comprehensive review coverage of the progress in the major areas of chemical research. The series has now reached some 32 titles, each being published in annual, or in a few cases biennial, volumes.

The Society has been fortunate in obtaining the services of many leading experts in their specialist fields and the series thus provides a unique service for the active specialist chemist—critical in-depth accounts of the progress in their areas by acknowledged authorities, which usually appear less than twelve months after the period of literature coverage.

As the series grows towards its full complement of titles, it is intended that *Annual Reports on the Progress of Chemistry* will continue its shift in emphasis towards provision for the general reader of critical coverage of significant advances in all the major areas of chemistry.

For further details of related *Specialist Periodical Reports* see the back cover of this jacket. For a complete list and full information on all titles in the series write to:
