Chapter 1	The Early Transition Metals	1
	<i>1: Titanium, Zirconium, Hafnium, Vanadium, Niobium, and Tantalum</i>	
	<i>By. F. L. Bowden</i>	
1	Titanium	1
	Introduction	1
	Binary Compounds and Related Systems	3
	Halides and Oxyhalides	3
	Oxides	4
	Chalcogenides	5
	Carbides, Silicides, and Germanides	7
	Nitrides, Borides, <i>etc.</i>	7
	Titanium(II)	8
	Titanium(III)	8
	Halides and Oxyhalides	8
	O-Donor Ligands	10
	N-Donor Ligands	12
	Mixed N- and O-Donor Ligands	12
	Cyclopentadienyl Complexes	14
	Miscellaneous	16
	Titanium(IV)	16
	Halides, Oxyhalides, and Pseudohalides	16
	O-Donor Ligands	18
	S-Donor Ligands	24
	N-Donor Ligands	24
	Mixed N- and O-Donor Ligands	26
	Organometallic Titanium(IV) Compounds	28
	Titanium–Carbon σ -Bonded Complexes	28
	Cyclopentadienyl Complexes	30
2	Zirconium and Hafnium	31
	Introduction	31
	Binary Compounds and Related Species	31
	Halides and Oxyhalides	31
	Oxides and Chalcogenides	33
	Carbides, Silicides, and Related Compounds	34

Nitrides	34
Borides	34
Zirconium(II), Zirconium(III), Hafnium(II), and Hafnium(III)	34
Zirconium(IV) and Hafnium(IV)	34
Halides and Oxyhalides	34
O-Donor Ligands	35
S-Donor Ligands	42
N-Donor Ligands	42
Mixed N- and O-Donor Ligands	43
Organometallic Zirconium(IV) and Hafnium(IV)	44
Compounds	44
σ -Bonded Complexes	44
3 Vanadium	45
Introduction	45
Carbonyl and other Low Oxidation State Compounds	45
Binary Compounds and Related Species	46
Halides and Oxyhalides	46
Oxides	47
Nitrides	47
Borides	47
Silicides	47
Hydrides	48
Vanadium(II)	48
Vanadium(III)	49
Halides and Oxyhalides	49
O-Donor Ligands	49
S-Donor Ligands	50
N-Donor Ligands	50
Mixed N- and O-Donor Ligands	51
Compounds with Metal–Carbon Bonds	51
Vanadium(IV)	52
Halides and Oxyhalides	52
O-Donor and Mixed N- and O-Donor Ligands	52
Schiff Base Complexes	56
S-Donor Ligands	58
N-Donor Ligands	61
Compounds with Metal–Carbon Bonds	62
Miscellaneous	62
Vanadium(V)	63
Halides and Oxyhalides	63
O-Donor Ligands	64
S- and Se-Donor Ligands	69
N- and O-Donor Ligands	69

<i>Contents</i>	vii
4 Niobium and Tantalum	70
Introduction	70
Carbonyl and other Low Oxidation State Compounds	70
Binary Compounds	72
Halides	72
Oxides	72
Chalcogenides	72
Nitrides and Related Compounds	73
Silicides and Borides	73
Hydrides	73
Compounds with Nb–Nb or Ta–Ta Bonds	73
Niobium(III) and Tantalum(III)	74
Niobium(IV) and Tantalum(IV)	75
Niobium(V) and Tantalum(V)	77
Halides and Oxyhalides	77
O-, S-, Se-, and Te-Donor Ligands	79
N-Donor Ligands	84
Mixed N- and S-Donor Ligands	85
Organometallic Niobium(V) and Tantalum(V) Compounds	85
<i>II: Chromium, Molybdenum, Tungsten, Technetium, and Rhenium</i>	87
<i>By C. D. Garner</i>	
1 Chromium	87
Introduction	87
Carbonyl and Thiocarbonyl Complexes	87
η -Complexes	89
Trifluorophosphino- and Trichlorostannano- complexes	89
Dinitrogenyl Complexes	89
Nitrosyl Complexes	89
Compounds with Chromium–Metal Bonds	90
Binary Compounds and Related Systems	90
Halides	90
Oxides	90
Chalcogenides	90
Compounds with Elements of Group V	91
Carbides, Silicides, and Germanides	92
Borides	92
Chromium(II)	92
Halides	92
O-Donor Ligands	93
N-Donor and P-Donor Ligands	93
Chromium(III)	93

Optically Active Complexes	94
Halide and Oxyhalide Complexes	94
O-Donor Ligands	96
Polymeric Complexes containing Bridging O-Donor Ligands	98
Complexes with S-Donor, Se-Donor, or Te-Donor Ligands	100
N-Donor Ligands	100
Mixed N-Donor and Other Donor Ligands	103
P-Donor Ligands	104
Cyano-complexes	104
Organometallic Complexes	105
Chromium(IV)	105
Chromium(V)	106
Chromium(VI)	107
Halides and Oxyhalides	107
O-Donor Ligands	107
S-Donor Ligands	109
N-Donor Ligands	109
2 Molybdenum and Tungsten	109
Introduction	109
Carbonyl and Thiocarbonyl Complexes	113
η -Complexes	114
Trifluorophosphino- and Trichlorostannano- complexes	115
Dinitrogenyl and Related Complexes: Nitrogen Fixation	115
Nitrosyl and Thionitrosyl Complexes	117
Cyano- and Isocyano-complexes	118
Pyrazolyborato-complexes	120
Hydrido-complexes	120
Binary Compounds and Related Systems	121
Halides	121
Oxides	123
Chalcogenides	123
Nitrides	124
Carbides	124
Silicides	124
Borides and Gallides	125
Compounds containing Mo—Mo, W—W, or Related Bonds	125
Molybdenum(II) and Tungsten(II)	128
Molybdenum(III) and Tungsten(III)	129
Molybdenum(IV) and Tungsten(IV)	130
Molybdenum(V) and Tungsten(V)	132
Mononuclear Complexes	132

Dinuclear and Polynuclear Complexes	135
Molybdenum and Tungsten Bronzes	136
Molybdenum(vi) and Tungsten(vi)	138
Halide, Oxyhalide, and Related Complexes	138
O-Donor Ligands	139
Iso- and Hetero-polyanions	146
S- and Se-Donor Ligands	149
N-Donor Ligands	150
Organometallic Compounds	151
3 Technetium and Rhenium	151
Introduction	151
Carbonyl Complexes	152
Dinitrogenyl Complexes	154
Nitrosyl Complexes	155
Binary Compounds and Related Systems	155
Oxides	155
Carbides, Silicides, and Borides	156
Compounds containing Tc—Tc or Re—Re Bonds	156
Rhenium(III)	158
Technetium(IV) and Rhenium(IV)	158
Rhenium(V)	159
Technetium(VI) and Rhenium(VI)	160
Technetium(VII) and Rhenium(VII)	161
Chapter 2 Elements of the First Transition Period	162
<i>1: Manganese and Iron</i>	
<i>By R. Davis</i>	
1 Manganese	162
Carbonyl Compounds	162
Nitrosyl and Nitrogenyl Compounds	171
Manganese(II)	172
Halides	172
Complexes	173
N-Donor ligands	173
O-Donor ligands	174
S-Donor ligands	176
Mixed donor ligands	176
Manganese(III)	177
Complexes	177
Manganese(IV)	178
Higher Oxidation States of Manganese	179
Oxides and Sulphides	179
2 Iron	180
Carbonyl Compounds	180
Nitrosyl and Aryldiazo Complexes	191

Other Iron(0) Compounds	194
Iron(II)	194
Halides, Cyanides, and Hydrides	194
Complexes	195
N-Donor ligands	195
O-Donor ligands	195
S-Donor and P-donor ligands	199
Mixed donor ligands	200
Isocyanide complexes	201
Iron(III)	201
Halides and Cyanides	201
Complexes	203
N-Donor ligands	203
O-Donor ligands	204
S-Donor ligands	206
Mixed donor ligands	208
Iron(IV)	209
Model Compounds for Iron in Biological Systems	210
Oxides and Sulphides	214
Other Papers	215
3 Formation and Stability Constants (Manganese and Iron)	215
4 Bibliography	216
<i>II: Cobalt, Nickel, and Copper</i>	218
<i>By C. A. McAuliffe and W. Levason</i>	
1 Cobalt	218
Carbonyls	218
Group IVB Donors	219
Group VB Donors	220
Nitrosyls	221
Cobalt(I)	222
Cobalt(II) Complexes	224
Halides and Pseudohalides	224
Amine Complexes	225
Pyridine and Related Ligands	225
Imidazole and Related Ligands	229
Macrocyclic N-Donors	229
Other N-Donors Ligands	232
P-Donor and As-Donor Ligands	233
O-Donor Ligands	234
S-Donor Ligands	237
Mixed Donor Ligands	239
Other Compounds	243
Interaction with Dioxygen	243
Carbaboranes	246

Oxides and Other Simple Anions	248
Cobalt(III) Complexes	248
Halides	248
Ammine Complexes	248
Diamine Complexes	249
Polyamine Donors	252
Macrocylic N-Donors	253
Other N-Donors	255
Oximate Compounds	255
Schiff Bases	257
P-Donors, As-Donors, and Sb-Donors	259
O-Donors	259
S-Donors	260
Amino-acid Complexes	261
Other Mixed Donor Ligands	263
Polynuclear Bridged Complexes	266
Cobalt(IV)	267
2 Nickel	267
Carbonyls and Nitrosyls	267
Nickel(0)	269
Nickel(I)	270
Nickel(II)	271
Halides and Pseudohalides	271
N-Donors	271
Pyridine and related ligands	271
Amine donors	272
Macrocylic N-donors	274
Other N-donors	278
P-Donors, As-Donors, and Sb-Donors	281
O-Donors	284
S-Donors	287
Carbaboranes	290
Mixed Donor Ligands	291
Other Compounds	302
Nickel(III)	303
Nickel(IV)	303
ESCA Measurements	304
3 Copper	304
Copper(I)	304
Halides and Pseudohalides	304
N-Donors	305
P-Donors and As-Donors	306
O-Donors and S-Donors	307
Mixed Donors and other Components	308

Copper(II)	309
Halides and Pseudohalides	309
N-Donors	310
Macrocycles	311
O-Donors and S-Donors	312
Mixed Donors	313
Copper(III)	318
4 X-Ray Data (Copper), Physical Data (Copper), and Formation and Stability Constants (Cobalt, Nickel, and Copper)	319
5 Bibliography	327
Chapter 3 The Noble Metals	329
<i>I: Ruthenium, Osmium, Rhodium, and Iridium</i>	
<i>By L. A. P. Kane-Maguire</i>	
1 Ruthenium	329
Cluster Compounds	329
Ruthenium-($-\text{II}$), $-(0)$, and $-(\text{I})$	329
Ruthenium(II)	330
Group VII Donors	330
Hydride-phosphine complexes	330
Halogeno-carbonyl and -phosphine complexes	330
Group VI Donors	331
O-Donor ligands	332
S-Donor ligands	333
Group V Donors	333
Molecular nitrogen complexes	333
Nitrosyl complexes	334
Other N-donor ligands	334
P- and As-donor ligands	338
Group IV Donors	339
C-Donor ligands	339
Mixed Ruthenium-(II) and $-(\text{III})$ Complexes	340
Ruthenium(III)	341
Group VII Donors	341
Group VI Donors	341
Group V Donors	341
N-Donor ligands	341
As-Donor ligands	342
Ruthenium(IV)	342
Group VII Donors	342
Group VI Donors	343
Group V Donors	343
Ruthenium(V) and Higher Oxidation States	344

2 Osmium	344
Cluster Compounds	344
Osmium(II)	346
Group VII Donors	346
Hyrido- and halogeno-carbonyl complexes	346
Group VI Donors	347
Group V Donors	347
N-Donor ligands	347
P-Donor ligands	348
Group IV Donors	348
Osmium(III)	349
Osmium(IV)	350
Osmium(VI)	350
Osmium (VIII)	351
3 Rhodium	352
Cluster Compounds	352
Rhodium(0)	353
Rhodium(I)	354
Group VII Donors	354
Hyrido-phosphine complexes	354
Halogeno-carbonyl and -phosphine complexes	354
Group VI Donors	356
O-Donor ligands	356
S-Donor ligands	358
Group V Donors	358
N-Donor ligands	358
P- and As-Donor ligands	360
Group IV Donors	361
Group III Donors	362
B-Donor ligands	362
Rhodium(II)	362
Group VI Donors	362
Other Donor Ligands	363
Rhodium(III)	363
Group VII Donors	363
Group VI Donors	364
O-Donor ligands	364
S-Donor ligands	365
Group V Donors	366
N-Donor ligands	366
P- and As-Donor ligands	368
Group IV Donors	369
Rhodium-(IV) and -(V)	369
4 Iridium	371
Cluster Compounds	371

Iridium(I)	371
Hydrido- and Halogeno-carbonyl or -phosphine Complexes	371
Group VI Donors	372
Group V Donors	373
N-Donor ligands	373
P- and As-donor ligands	374
Group IV Donors	375
Group III Donors	376
B-Donor ligands	376
Iridium(III)	376
Group VII Donors	376
Group VI Donors	376
O-Donor ligands	376
S- and Se-donor ligands	376
Group V Donors	377
N-Donor ligands	377
P- and As-donor ligands	378
Group IV Donors	379
Iridium(IV)	379
Group VII Donors	379
Group VI Donors	379
O-Donor ligands	379
 <i>II: Palladium, Platinum, Silver, and Gold</i>	 381
<i>By D. W. Clack</i>	
1 Palladium	381
Palladium(0)	381
Palladium(I)	383
Palladium(II)	384
Group VII and Hydride Donors	384
Group VI	386
O-Donor ligands	386
Mixed O- and N-donor ligands	387
S-Donor ligands	388
Se- and Te-donor ligands	393
Group V	393
N-Donor ligands	393
P-, As-, and Sb-donor ligands	396
Group IV Donors	397
2 Platinum	401
Cluster Compounds	401
Platinum(0) and Platinum(I)	402

Platinum(II)	403
Group VII and Hydride Donors	403
Group VI Donors	405
Group V	409
N-Donor ligands	409
P-Donor ligands	413
Sb-Donor ligands	415
Group IV	416
C-Donor ligands	416
Si-Donor ligands	417
Group III	418
Boron donor ligands	418
Platinum(IV)	418
Group VII Donors	418
Oxygen Donors	419
Nitrogen Donors	419
Platinum(V)	422
3 Silver	424
Silver (I)	424
Group VII Donors	424
Group VI	425
O-Donor ligands	425
S-Donor ligands	425
Group V	426
N-Donor ligands	426
P-Donor ligands	427
Group IV	427
C-Donor ligands	427
Silver(II) and Silver(III)	428
4 Gold	431
Gold(I)	431
Group VII Donors	431
Group VI Donors	431
Group V	431
N-Donor ligands	431
P-Donor ligands	432
Group VI	432
C-Donor ligands	432
Gold(II)	432
Gold(III)	432
Group VII Donors	432
Group VI	433
S-Donor ligands	433
Gold(V)	434

Chapter 4	<i>Zinc, Cadmium, and Mercury</i> <i>By J. Howell and M. Hughes</i>	435
1	Introduction	435
2	Zinc	435
3	Cadmium	446
4	Mercury	451
5	The Bio-inorganic Chemistry of Zinc, Cadmium, and Mercury	462
	Enzymic Reactions involving Zinc	462
	Metal-Protein Complex Formation	465
	Studies involving Reaction Mechanisms	468
Chapter 5	<i>Scandium, Yttrium, the Lanthanides, and the Actinides</i> <i>By J. A. McCleverty</i>	471
1	Scandium and Yttrium	471
	Structural Studies	471
	Chemical Studies	471
2	The Lanthanides	473
	Structural Studies	473
	Chemical Studies	474
	Lanthanide Shift Reagents	486
3	The Actinides, Uranyl and Related Species	487
	Structural Studies	487
	Chemical Studies	488
	Uranyl and Related Compounds	493
	Structural Studies	493
	Chemical Studies	494
	Author Index	500
