Chapter 1 The Early Transition Metals	1
<i>1: Titanium, Zirconium, Hafnium, Vanadium, Niobium, and Tantalum</i>	1
<i>By F. L. Bowden</i>	
<b>1 Titanium</b>	1
Introduction	1
Binary Compounds and Related Systems	2
Halides and Oxyhalides	2
Oxides	3
Chalcogenides	3
Carbides	4
Group V Derivatives	4
Borides and Hydrides	5
Titanium(II)	5
Titanium(III)	5
Halides	5
O- and S-Donor Ligands	6
N-, NO-, and NSO-Donor Ligands	7
Miscellaneous	7
Titanium(IV)	9
Halides and Oxyhalides	9
O-Donor Ligands	10
S- and SO-Donor Ligands	18
N-Donor Ligands	19
Schiff Bases	21
Hyrido-complexes	22
Organometallic and Cyclopentadienyl Complexes	22
<b>2 Zirconium and Hafnium</b>	26
Introduction	26
Binary Compounds and Related Species	26
Halides and Oxyhalides	26
Oxides and Chalcogenides	26
Carbides and Silicides	27
Nitrides	27
Zirconium(II), Zirconium(III), Hafnium(II), and Hafnium(III)	27
Zirconium(IV) and Hafnium(IV)	28
Halides and Oxyhalides	28
O-Donor Ligands	29
S-Donor Ligands	35
N- and Mixed NO-Donor Ligands	36

Zirconium(IV) and Hafnium(IV) Hydrido-complexes	37
Organometallic Zirconium and Hafnium Complexes	38
<b>3 Vanadium</b>	<b>39</b>
Introduction	39
Carbonyl and other Low Oxidation State Compounds	39
Binary Compounds and Related Species	42
Halides and Oxyhalides	42
Oxides	43
Chalcogenides	43
Nitrides and Phosphides	43
Carbides and Silicides	43
Borides	44
Vanadium(II)	44
Vanadium(III)	45
Halides and Oxyhalides	45
O-Donor Ligands	46
S-Donor Ligands	46
N-Donor Ligands	47
Cyclopentadienyl Compounds	48
Miscellaneous	49
Vanadium(IV)	49
Halides and Oxyhalides	49
O-Donor Ligands	50
S-Donor and SO-Donor Ligands	55
SN-Donor and SNO-Donor Ligands	55
N-Donor Ligands	56
NO-Donor Ligands	57
Schiff Base Ligands	59
Metal–Carbon Bonds	60
Vanadium(V)	61
O-Donor Ligands	61
S-, Se-, and Te-Donor Ligands	66
N-Donor and Mixed N- and O-Donor Ligands	66
<b>4 Niobium and Tantalum</b>	<b>67</b>
Introduction	67
Binary Compounds	68
Halides	68
Oxides	68
Chalcogenides	68
Carbides, Silicides, and Related Compounds	68
Nitrides, Phosphides, Arsenides, and Related Compounds	71
Borides	72
Compounds with Nb–Nb or Ta–Ta Bonds	72
Niobium(III) and Tantalum(III)	72
Niobium(IV) and Tantalum(IV)	73
Niobium(V) and Tantalum(V)	74
Halides, Oxyhalides, and Related Compounds	74
O-Donor Ligands	75
S-Donor Ligands	79

N-, NO-, As-, and P-Donor Ligands	80
Hydrido and Organometallic Compounds	82
<i>II: Chromium, Molybdenum, Tungsten, Technetium, and Rhenium</i>	85
<i>By P. F. Heveldt and D. J. Watson</i>	
<b>1 Chromium</b>	85
Introduction	85
Binary and Ternary Compounds and Related Systems	86
Halides	86
Oxyhalides and Related Compounds	87
Oxides	88
Mixed Oxides	89
Chalcogenides	92
Chalcogenide Oxides	94
Beryllides and Borides	96
Carbides, Silicides, and Germanides	96
Phosphides, Arsenides, and Antimonides	96
Hydrides	97
Binary and Ternary Chromides	97
Co-ordination Compounds	97
Carbonyls	97
Nitrosyls	100
Chromium-(0) and-(I)	101
Chromium(II)	102
Chromium(III)	103
Optically active complexes	104
O-Donor ligands	104
S-Donor ligands	107
N-Donor ligands	108
Mixed N- and O-donors	111
Cyano complexes	112
Miscellaneous	113
Chromium(IV)	113
Chromium(V)	114
Chromium(VI)	114
<b>2 Molybdenum and Tungsten</b>	115
Introduction	115
Hydrido Compounds	116
Dinitrogen Complexes	116
Nitrosyls	117
Cyanides	118
Isocyanides	119
Carbonyls	119
Binary and Ternary Compounds and Related Systems	122
Halides, Oxyhalides, and Halogenochalcogenides	122
Oxides, Molybdates, Tungstates, and Related Compounds	127
Structures of Molybdates and Tungstates	134

Thermodynamic Parameters of Molybdates and Tungstates	136
Solution Chemistry of Molybdates and Tungstates	136
Heteropoly-molybdates and tungstates	138
Chalcogenides	143
Carbides and Silicides	144
Binary and Ternary Compounds with Elements of Groups II, III, and V.	144
Other Co-ordination Compounds	145
Molybdenum(0) and (I) and Tungsten(0) and (I)	145
Molybdenum-(II) and-(II $\frac{1}{2}$ ) and Tungsten(II)	146
Molybdenum(III) and Tungsten(III)	148
Molybdenum(IV) and Tungsten(IV)	150
Molybdenum(V) and Tungsten(V)	151
Molybdenum(VI) and Tungsten(VI)	153
<b>3 Technetium and Rhenium</b>	155
Introduction	155
Binary and Ternary Compounds and Related Systems	155
Halides	155
Oxyhalides	156
Pure and mixed oxides	157
Borides and Rhenides	157
Co-ordination Chemistry	158
Carbonyls	158
Nitrosyls and Thionitrosyls	161
Aryldiazo Complexes	161
Hydrides	161
Compounds containing Tc—Tc or Re—Re Bonds	161
Rhenium(I)	163
Rhenium(II)	163
Technetium(III) and Rhenium(III)	164
Rhenium(IV)	164
Rhenium(V)	164
Rhenium(VI) and Technetium(VI)	165
Rhenium(VII)	165
<b>Chapter 2 Elements of the First Transitional Period</b>	166
<i>I: Manganese and Iron</i>	166
<i>By R. Davis</i>	
<b>1 Manganese</b>	166
Carbonyl, Thiocarbonyl, and Nitrosyl Compounds	166
Manganese(II)	171
Halides and Cyanides	171
N-Donor Ligands	172
O-Donor Ligands	174
S-, As-, and Sb-Donor Ligands	176
Mixed Donor Ligands	177

Manganese(III)	177
Halides and Oxides	177
Complexes	177
Higher Oxidation States	179
Other Manganese Compounds	179
<b>2 Iron</b>	<b>179</b>
Carbonyls and Thiocarbonyls	179
Nitrosyls	187
Iron(I)	188
Iron(II)	188
Halides, Cyanides, and Hydrides	188
N-Donor Ligands	189
O-Donor Ligands	194
S-Donor Ligands	194
P- and As-Donor Ligands	195
Mixed Donor Ligands	195
Iron(III)	195
Halides and Cyanides	195
N-Donor Ligands	196
O-Donor Ligands	197
S- and P-Donor Ligands	199
Mixed Donor Ligands	200
Model Compounds for Iron in Biological Systems	202
Oxides, Hydroxides, and Sulphides	207
Other Iron Compounds	207
<b>3 Formation and Stability Constants</b>	<b>208</b>
<b>4 Papers of General Interest</b>	<b>208</b>
<b>5 Bibliography</b>	<b>209</b>
<i>II: Cobalt, Nickel, and Copper</i>	210
<i>By D. M. Johns and C. A. McAuliffe</i>	
<b>1 Cobalt</b>	<b>210</b>
Carbonyls, Carbaboranes, and Hydrides	210
Cobalt(I)	213
Cobalt(II)	214
Halides and Pseudohalides	214
O-Donor Ligands	216
Oximes	219
Amines and Imines	219
Macrocycles	220
Other N-Donor Ligands	223
Mixed Donor Ligands	224
S- and Se-Donor Ligands	231
P(O)- and As(O)-Donor Ligands	232
P-, As-, and Sb-Donor Ligands	233

Cobalt(III)	233
Hydrides and Carbaboranes	233
Halides and Pseudohalides	234
O-Donor Ligands	234
Ammines	235
Diamines	237
Polyamines	240
Other N-Donors	241
Macrocycles	242
Mixed Donors	245
Amino-acid Complexes	249
Schiff Bases	250
P- and As-Donor Ligands	251
S- and Se-Donor Ligands	252
<b>2 Nickel</b>	252
Carbonyls	252
Nickel(0)	253
Nickel(I)	254
Nickel(II)	255
Halides and Pseudohalides	255
Simple N-Donor Ligands	255
Pyridine and Related Ligands	255
Amine Donors	255
Macrocycles	257
Other N-Donor Ligands	259
Amino-acid Complexes	260
Schiff Base Complexes	261
Mixed Donors	262
O-Donor Ligands	265
S- and Se-Donor Ligands	267
P- and As-Donor Ligands	269
Carbaboranes	271
Nickel(III) and Nickel(IV)	271
<b>3 Copper</b>	272
Copper(I)	272
Halides and Pseudohalides	272
O-Donor Ligands	272
N-Donor Ligands	273
S-Donor Ligands	273
P- and As-Donor Ligands	275
Other Donors	276
Copper(II)	276
Halides and Pseudohalides	276
Amine Ligands	277
Imidazole and Related Donors	280
Pyridine and Related Donors	280
Macrocyclic Ligands	283
O-Donor Ligands	286
Mixed NO-Donor Ligands	289

Schiff Base Ligands	295
Amino-acid Complexes	298
S- and Se- Donor Ligands	300
Other Donor Systems	302
Copper(III)	303
<b>Chapter 3 The Noble Metals</b>	<b>304</b>
<i>1: Ruthenium, Osmium, Rhodium, and Iridium</i>	<b>304</b>
<i>By J. Evans</i>	
<b>1 Ruthenium</b>	<b>304</b>
General	304
Cluster Compounds	304
Ruthenium(0)	305
Ruthenium(II)	305
Hyrido-carbonyl and -phosphine Complexes	305
Halogeno-carbonyl and -phosphine Complexes	306
Group VI Donors	307
Dinitrogen Complexes	308
Nitrosyl Complexes	308
Other Nitrogen Donors	309
P-Donor Ligands	312
Group IV Donors	312
Mixed Ruthenium-(II), -(III), and -(IV) Complexes	312
Ruthenium(III)	313
Group VI Donors	313
N-Donor Ligands	314
P- and As-Donor Ligands	315
Ruthenium(IV)	315
Ruthenium(v) and Higher Oxidation States	316
<b>2 Osmium</b>	<b>317</b>
General	317
Cluster Compounds	318
Osmium(-II) and Osmium(0)	319
Osmium(II)	319
Halogeno-carbonyl,-phosphine, and -stibene Complexes	319
Group VI Donors	319
Group V Donors	320
Group IV Donors	321
Osmium(III)	321
Osmium(IV)	321
Osmium(v) and Higher Oxidation States	322
<b>3 Rhodium</b>	<b>323</b>
General	323
Cluster Compounds	324
Rhodium(-I)	324
Rhodium(I)	324
Hydridophosphine Complexes	324

Halogeno-carbonyl and -phosphine Complexes	324
Group VI Donors	326
N-Donor Ligands	326
Group IV Donors	329
Group I Donors	329
Rhodium(II)	329
Rhodium(III)	330
Group VII Donors	330
Group VI Donors	332
Group V Donors	332
Group IV Donors	334
Higher Oxidation States	336
<b>4 Iridium</b>	336
General	336
Cluster Compounds	336
Iridium(-I) and Iridium(0)	336
Iridium (I)	336
Group VII Donors	336
Group VI Donors	338
Group V Donors	338
Group IV Donors	339
Group III Donors	339
Group I Donors	339
Iridium(II)	339
Iridium(III)	339
Group VII Donors	339
Group VI Donors	340
Group V Donors	341
Group IV Donors	341
Group III Donors	343
Iridium(IV)	343
Iridium(V) and Iridium(VI)	343
<b>5 Reviews</b>	344
<i>II: Palladium, Platinum, Silver, and Gold</i>	344
<i>By D. W. Clack</i>	
<b>1 Palladium</b>	344
Cluster Compounds	344
Palladium(0)	346
Palladium(I)	348
Palladium(II)	348
Group VII and Hydride Donors	348
O-Donor Ligands	350
S-, Se-, and Te-Donor Ligands	351
N-Donor Ligands	354
P-, As-, Sb-, and Bi-Donor Ligands	358
Group IV Donor Ligands	361
Palladium(IV)	364

<b>2 Platinum</b>	364
Cluster Compounds	364
Platinum(0)	364
Platinum(I)	369
Platinum(II)	369
Group VII and Hydride Donors	369
Group VI Donor Ligands	371
N-Donor Ligands	373
P-, As-, and Sb-Donor Ligands	380
C-Donor Ligands	382
Si-, Sn, and Hg-Donor Ligands	384
B-Donor Ligands	385
Platinum(IV)	385
Group VII Donor Ligands	385
Group VI Donor Ligands	385
Group V Donor Ligands	385
Group IV Donor Ligands	386
Platinum(V)	386
<b>3 Silver</b>	386
Silver(0) and Cluster Compounds	386
Silver(I)	387
Group VII Donor Ligands	387
Group VI Donor Ligands	389
Group V Donor Ligands	390
Group IV Donor Ligands	391
<b>4 Gold</b>	392
Gold Clusters	392
Gold(I)	392
Group VII Donor Ligands	392
Group IV Donor Ligands	393
Gold(II)	393
Gold(III)	393
Group VII Donor Ligands	393
Group VI Donor Ligands	394
Group IV Donor Ligands	394
Gold(V)	394
 Chapter 4 Zinc, Cadmium, and Mercury	 395
<i>By J. A. S. Howell and P. Wyeth</i>	
<b>1 Introduction</b>	395
<b>2 Halides and Pseudohalide Complexes</b>	395
<b>3 Nitrogen Donor Complexes</b>	
Unidentate Nitrogen Donor Complexes	398
Bidentate Nitrogen Donor Complexes	401
Polydentate and Related Nitrogen Donor Complexes	403

<b>4 Other Group V Donor Complexes</b>	407
<b>5 Oxygen Donor Complexes</b>	407
Acetylacetonate and Related Complexes	407
Organic Oxygen Donor Complexes	408
Oxo-ion Complexes	410
Solution Studies	410
Solid State Studies	412
<b>6 Sulphur-containing Donor Complexes</b>	415
<b>7 Organometallic Complexes, including Lewis Acid and Metal–Metal Bonded Derivatives</b>	418
<b>8 General and Review Articles</b>	422
<b>9 Bio-inorganic Chemistry</b>	422
Enzymic Reactions Involving Zinc	422
Zinc Cadmium and Mercury as Enzymic Probes	428
Enzyme ‘Models’	428
Other Metal–Peptide and –Protein Interactions	429
Metal–Nucleoside, –Nucleotide, and –Nucleic Acid Interactions	430
Organomercurials	431
 Chapter 5 Scandium, Yttrium, the Lanthanides, and the Actinides	433
<i>By F. J. Berry</i>	
<b>1 Scandium and Yttrium</b>	433
Structural Studies	433
Chemical Studies	434
<b>2 The Lanthanides</b>	435
Structural Studies	435
Chemical Studies	438
Lanthanide Shift Reagents	445
<b>3 The Actinides</b>	447
Structural Studies	447
Chemical Studies	449
Uranyl Compounds	455
Structural Studies	455
Chemical Studies	456
 Author Index	460
