Chapter 1 Natural Acetylenic and Olefinic Compounds, excluding Marine Natural Products	1
<i>By C. M. Scrimgeour</i>	
1 Introduction	1
2 Natural Acetylenic Compounds	1
Introduction	1
New Polyacetylenic Compounds	1
Other Acetylenic Compounds	11
Known Polyacetylenic Compounds	12
Structure Determination	14
Synthesis	14
Biosynthesis	15
Chemotaxonomy and Physiological Properties	17
3 Natural Olefinic Compounds	17
Introduction	17
Olefins Related to Acetylenes	18
Other Olefinic Compounds	18
Chapter 2 Acyclic Terpenoids	20
<i>By D. H. Grayson</i>	
1 Introduction	20
2 Isoprene Chemistry	20
3 Artemisyl, Lavandulyl, and other Irregular Systems	22
4 2,6-Dimethyloctane Group	24
Ocimenes	24
Myrcene Derivatives	25
Citronellyl Derivatives	28
Linalyl Derivatives	29
Citral and Derivatives	30
Geranyl and Neryl Compounds	32
5 Sesquiterpenes	39
6 Diterpenes and Sesterterpenes	43

7 Squalene Group	44
8 Polyterpenoids	44
Chapter 3 Insect Pheromones and Related Behaviour-modifying Chemicals	46
<i>By R. Baker and J. W. S. Bradshaw</i>	
1 Introduction	46
2 Pheromones	46
Sex Pheromones of Lepidoptera	46
Other Compounds from Lepidoptera	51
Sex Pheromones of Coleoptera	52
Pheromones of Diptera	53
Other Responses to Pheromones	54
Hymenoptera – Social and Non-social	56
3 Defence Chemistry of Insects	59
4 Cuticular Hydrocarbons	59
5 Separation and Structure-elucidation Techniques	60
6 Synthetic Studies	60
Mono-unsaturated Derivatives	61
Di-unsaturated Derivatives	66
Tri-unsaturated Derivatives	69
Ketones and Acetates	71
Enantiomer-specific Synthesis	72
Chapter 4 Olefinic Microbial Metabolites, including Macrocyclic Compounds	76
<i>By R. C. F. Jones</i>	
1 Non-macrocyclic Olefinic Microbial Metabolites	76
Pyran–Pyranoid Compounds	76
Butenolide Metabolites	81
Tetronic Acids	81
Pulvinones	84
Miscellaneous	84
N-Heterocyclic Compounds	85
Pyrrolidines and Pyrroles	85
Piperidines and Pyridines	88
Pyrimidines	90
Other Nitrogen-containing Metabolites	90

<i>Contents</i>	ix
Miscellaneous Olefinic Microbial Metabolites	94
Cyclopentene Metabolites	97
Cyclohexene Metabolites	98
2 Macrocyclic Olefinic Microbial Metabolites	99
Polyoxo-Macrolides	99
Methymycin	99
Maridomycins and Leucomycins	101
Deltamycins	103
Carbomycins	103
Staphococomycin	105
Polyene Macrolides	105
Tetraenes	105
Pentaenes	106
Heptaenes	108
Roridins and Verrucarins	108
Vermiculine and Pyrenophorin	108
Chlorothricolide	110
Brefeldins	111
Zearalenone	113
Recifeiolide	114
Diplodialides	115
Miscellaneous Macrocyclic Lactones	116
Cytochalasans and Aspochalasins	117
The Ansamycins	119
Rifamycins	119
Naphthomycins	121
Herbimycin	121
Ansamitocins	122
Rubradirins	122
Other Macrocyclic Metabolites	123
Chapter 5 Prostaglandins	125
<i>By P. R. Marsham</i>	
1 Introduction	125
2 Nomenclature	125
3 Synthesis of the Primary Prostaglandins	125
Corey's Bicyclo[2.2.1]heptane Route	125
Modifications, and New Routes to Intermediates	125
Routes <i>via</i> Conjugate Addition to Cyclopentenones	131
New Syntheses of Intermediates	131
Modified Precursors of the Lower Side-chain	132

Miscellaneous Syntheses	133
Prostaglandin D ₁	133
4 Derivatives of Primary Prostaglandins	133
5 Synthesis of Prostaglandin A₂	135
6 Synthesis of 19-Hydroxy-prostaglandins	136
7 Synthesis of Prostaglandin C₂	137
8 Synthesis of Prostaglandin H₂	137
9 Prostaglandin I₂	138
General Chemistry	138
Synthesis of Analogues	140
10 Synthesis of Modified Prostaglandins	150
Deoxy-prostaglandins	150
9-Deoxy-prostaglandins	150
11-Deoxy-prostaglandins	151
9,11-Bisdeoxy-prostaglandins	154
15-Deoxy-prostaglandins	155
Cyclopentane-ring Variants	156
Aza-prostaglandins	156
Oxa-prostaglandins	163
Thia-prostaglandins	164
Cyclohexane-ring Analogues	164
Hydroxy-prostaglandins	166
Mercapto-prostaglandins	166
Methyl-prostaglandins	167
Hydroxymethyl-prostaglandins	167
Upper Side-chain Variants	168
Lower Side-chain Variants	173
A Bicyclic Prostaglandin	176
A 2,2-Substituted Cyclopentanone	177
<i>epi</i> -Prostaglandins	177
Chlorinated and Fluorinated Prostaglandins	179
Lactones from Prostaglandins	181
Endoperoxide Analogues	181
Analogues of Thromboxane A ₂	185
Seco-prostaglandins	186
Radiolabelled Prostaglandins	187
11 Metabolism	188
Natural Prostaglandins	188
Prostaglandin A ₁	188
Prostaglandin D ₂	188

<i>Contents</i>	xi
Prostaglandins F _{2α} and F _{1α}	188
Prostaglandin I ₂	188
Modified Prostaglandins	189
Thromboxane B ₂	189
12 Biosynthesis and Biochemistry	191
13 Conformational Analysis	193
14 Determination	193
Chapter 6 Fatty Acids and Glycerides	194
<i>By F. D. Gunstone</i>	
1 Books and Reviews	194
2 Natural Compounds: Occurrence and Identification	196
Unsaturated Acids	196
Oxygenated Acids	197
Cyclic and Branched-chain Acids	198
Other Long-chain Compounds	200
3 Synthetic Compounds	201
General Procedures	201
Synthetic Acids and Related Compounds	202
Lipid Synthesis	208
4 Physical Properties	209
Gas-Liquid Chromatography	209
High-performance Liquid Chromatography	209
N.M.R. Spectroscopy	210
Mass Spectrometry	210
Crystal Structure and Polymorphism	211
Other Physical Properties	211
5 Chemical Reactions	212
Hydroperoxides: Formation and Reactions	212
Hydrogenation	217
Other Reactions of the Double Bond	218
Reactions of the Carboxyl Group	219
6 Biological Reactions	219
Fatty Acid Synthetase	219
Chain-elongation and Desaturation	220
Essential Fatty Acids	221
Biosynthesis and Metabolism	222
Waxes	223

Chapter 7 Polar Lipids	224
<i>By A. K. Lough</i>	
1 Introduction	224
2 Natural Lipids	224
Glycerophospholipids	224
Phosphatidylthreonine	225
Phosphoglycolipids	225
Glycosphingolipids	226
Sphingophosphonolipids	226
Glycolipids	227
Sulpholipids	228
Lipo-amino-acids and Lipopeptides	228
Lignan Diester	228
3 Chemical Synthesis	229
Glycerophospholipids	229
Sulpholipids	235
Deuteriated Polar Lipids	235
Tritiated Lipids	235
Glycolipids	235
Phosphoglycolipids	236
Sphingolipids	236
Glucosylceramide	237
<i>N</i> -Acyl-amino-acids	237
Spin- and Fluorescence-labelled Lipids	238
4 Biochemical Transformations	238
Biosynthesis of Polar Lipids	238
Chemical/Biochemical Synthesis	239
5 Stereochemistry	240
Glycerophosphates	240
Sphingolipids	240
6 Physical Chemistry	241
Conformational Studies	241
Studies of Phase Transitions	242
Hydration of Phospholipids	243
Phospholipid-Cation Interactions	243
Micellar Studies	243
7 Preparation and Determination	244
Extraction and Isolation	244
Preparation of Glycerophospholipids	245
High-performance Liquid Chromatography	245

<i>Contents</i>	xiii
Modified Silicates and Resin Column-support Materials	245
Thin-layer Chromatography	245
Spray Reagents	246
Determination of Phospholipids	246
Determination of Glycolipids	247
8 Biological Aspects	247
Lipid-Protein Studies	247
Enzymic Aspects	248
Physiological Aspects	248
Miscellaneous	248
9 Reviews	249
Author Index	251
