

Contents

Chapter 1	What is Flame Spectrometric Analysis?	1
1	The Nature of Light and Heat	1
2	Interaction of Light and Heat with Atoms and Molecules	1
3	A Simple Quantitative Description of Light	2
4	The Absorption of Light for Quantitative Measurement	2
5	The Difference between Atomic and Molecular Absorption	3
6	Quantitative AAS—What Should We Measure?	4
7	The Sensitivity Problem in AAS	5
8	The Potential Selectivity of Flame AAS	6
9	Flame Emission Spectrometry	6
10	Flame Atomic Fluorescence Spectrometry	8
11	Common Features of FES, AAS, and AFS	8
Chapter 2	Instrumentation for Analytical Flame Spectrometry	9
1	Introduction	9
2	The Modern Hollow Cathode Lamp	9
	Lamp alignment	11
	Multi-element Hollow Cathode Lamps	11
3	Alternative Line Sources	11
4	How to Distinguish between Lamp Light and Flame Light	12
5	The Flame as an Atom Cell	13
	The Air–Acetylene Flame	13
	The Problem with Some Hotter Flames	13
	The Nitrous Oxide–Acetylene Flame	14
	Safe Use of Flames	14
	Some Observations on Burner Heads	15
6	Sample Introduction	17
	Transport Efficiency	18
7	The Need for a Monochromator	19
8	Detection of the Light Signal	19
9	Readout Systems	20
10	Double-beam Instruments in AAS	21

11	Instrumental Requirements in FES	21
	Separated Flames	23
12	Flame Photometry	24
	Use of Molecular Emission from Cool Flames	25
13	Molecular Emission Cavity Analysis	26
14	Instrumental Requirements in AFS	27
Chapter 3	Interferences and How to Overcome Them	31
1	Physical Interferences	31
2	Chemical Interferences	33
	The Literature Interpolation Problem	35
3	Ionization Interferences	35
4	Spectral Interferences	36
	Spectral Interferences in Flame AAS	36
	Background Correction in AAS	38
	Spectral Interferences in Flame AFS	40
	Spectral Interferences in Flame AES	41
5	Conclusions about Interferences	42
Chapter 4	Optimization in Flame Spectrometry	43
1	What Do We Optimize?	43
2	Optimization in Flame AAS	43
	Source-related Parameters	44
	Effect of Lamp Current	44
	Effect of Lamp Warm Up Time	45
	Lamp Alignment	46
	Lamp Deterioration	46
	Choice of Lamp	47
	Atomizer-related Parameters	47
	Choice of Atomizer	47
	Effect of Fuel-to-oxidant Ratio	47
	Optimization of Burner Position	48
	Burner Design, Warm Up, and Cleanliness	49
	Gas Flow Stability	51
	Monochromator-related Parameters	52
	Choice of Slit Width	52
	Choice of Wavelength	52
3	Optimization in Flame AFS	52
	Source-related Parameters	53
	Lamp Operating Parameters	53
	Lamp Alignment	54
	Atomizer-related Parameters	54
	Monochromator-related Parameters	55
4	Optimization in Flame AES	55

	Atomizer-related Parameters	55
	Monochromator-related Parameters	56
5	How Careful Do I Need to Be?	57
Chapter 5	Sample Preparation	59
1	Field Sampling Technique	59
2	Sample Treatment and Storage	60
	Waters	60
	Plant and Other Biological Tissues	61
	Soils	61
	Rocks and Geological Samples	62
3	Sample Dissolution Techniques	62
	Waters	62
	Plant materials	63
	Soils, Sediments, and Rocks	64
	Atmospheric Particulates	65
4	Slurry Atomization	65
5	Speciation	66
Chapter 6	Some Useful Accessories	69
1	Cold Vapour Mercury Determination	69
2	Hydride Generation Techniques	70
3	Atom Trapping Techniques	72
4	Sampling Cups, Boats, and Related Techniques	73
5	Discrete Sample Nebulization Techniques	75
6	Devices for Addition of Releasing Agents, <i>etc.</i>	76
7	Meeting the Need for Dilution	78
Chapter 7	Choice of Technique for Commonly Determined Elements	79
1	Introduction	79
2	Aluminium	79
3	Arsenic	80
4	Barium	81
5	Boron	81
6	Cadmium	82
7	Calcium	82
8	Chromium	83
9	Cobalt	84
10	Copper	84
11	Gallium	84
12	Indium	85
13	Iron	85
14	Magnesium	86

15	Manganese	86
16	Mercury	86
17	Molybdenum	87
18	Nickel	87
19	Phosphorus	88
20	Potassium	88
21	Selenium	89
22	Sodium	89
23	Strontium	90
24	Sulfur	90
25	Tellurium	90
26	Tin	91
27	Titanium	91
28	Zinc	92
29	Other Elements	92
30	Speciation and Hybrid Techniques	92
Chapter 8	How Do I Know I'm Getting the Right Answer?	95
1	Introduction	95
2	The Need for Quality Control	95
3	Reference Materials	96
4	Inter-laboratory Comparisons	96
5	Other Procedures for Error Detection	97
Chapter 9	Safety in Flame Spectrometry	99
1	Introduction	99
2	Handling Gases	99
3	Safety Devices and Safety Checks	100
4	Fume Extraction	101
5	Instruction Sheets	101
	Subject Index	103
