

Contents

New Techniques

High resolution NMR analysis of complex mixtures <i>Adrian J. Charlton</i>	3
The quantitative impact of water suppression on NMR spectra for compositional analysis of alginates <i>T. Salomonsen, H.M. Jensen, F.H. Larsen and S.B. Engelsen</i>	12
NMR-based metabonomics approaches for the assessment of the metabolic impact of dietary polyphenols on humans <i>John van Duynhoven, Ewoud van Velzen, Gabriele Gross, Ferdi van Dorsten, Doris Jacobs, Max Bingham, Richard Draijer, Theo Mulder, Thea Koning, Elaine Vaughan, Tom van der Wiele, Johan Westerhuis and Age Smilde</i>	20
^1H HR MAS NMR: profiling metabolites in single cereal kernels (of wheat and barley) <i>N. Viereck, H. Winning, H.F. Seefeldt and S.B. Engelsen</i>	29
Microstructure investigation of concentrated dairy gels by real-time NMR diffusion experiments <i>F. Mariette and S. Le Feunteun</i>	37
Developments in time domain and single sided NMR <i>G. Guthausen and A. Kamlowski</i>	46
Investigation of sodium ions in cheeses by ^{23}Na NMR spectroscopy <i>M. Gobet, L. Foucat and C. Moreau</i>	57
Applications of field cycling relaxometry to food characterization <i>S. Baroni, S. Bubici, G. Ferrante and S. Aime</i>	65
A low resolution ^1H NMR study to investigate the protective mechanism of sorbitol during vacuum drying of a probiotic micro-organism <i>P. Foerst and U. Kulozik</i>	73
A low-field-NMR capillary rheometer <i>Dirk Mertens, Edme H. Hardy, Bernhard Hochstein and Gisela Guthausen</i>	81
Development of a rheo-NMR system to study the crystallisation of bulk lipids under shear flow <i>Gianfranco Mazzanti and Elizabeth M. Mudge</i>	89
NMR-based Multi Parametric Quality Control of Fruit Juices <i>E. Humpfer, H. Schaefer, B. Schuetz, M. Moertter, M. Spraul and P. Rinke</i>	97

Spatial mapping of solid and liquid lipid in chocolate <i>A.G. Marangoni, B. MacMillan, S. Marty and B.J. Balcom</i>	105
---	-----

Food Systems and Processing

Effect of soy addition on microwavable parbaked frozen doughs <i>L. Serventi, J. Sachleben and Y. Vodovotz</i>	115
---	-----

Identification and quantification of phosphorus in cheeses – methodological investigations by solid-state ^{31}P NMR spectroscopy <i>C. Rondeau-Mouro, M. Gobet, B. Mietton, S. Buchin and C. Moreau</i>	126
--	-----

Using MRI to study tomato fruit <i>Maja Musse, Stéphane Quellec, Marie-Françoise Devaux, Mireille Cambert, Marc Lahaye and François Mariette</i>	136
---	-----

SNIF-NMR and chemometric methods applied to ^1H NMR in the study of brazilian brandy authenticity <i>Elisangela Fabiana Boffo, Márcia Miguel Castro Ferreira, Antonio Gilberto Ferreira</i>	143
---	-----

Identification and quantification of major triacylglycerols in selected South African vegetable oils by ^{13}C NMR spectroscopy <i>L. Retief, J.M. McKenzie and K.R. Koch</i>	151
---	-----

Pomodoro di pachino: an authentication study using ^1H -NMR and chemometrics – protecting its P.G.I. European certification <i>F. Savorani, F. Capozzi, S.B. Engelsen, M.T. Dell'Abate and P. Sequi</i>	158
---	-----

1D and 2D ^1H -NMR analysis of taste compounds extracted from raw or fried <i>Allium Cepa l.</i> Tissues. Methodological questions. <i>A. Tardieu, W. de Man and H. This</i>	167
--	-----

Analysis of butter and margarine by high-resolution ^1H NMR <i>Jan Schripsema</i>	177
---	-----

Spin-lattice relaxation time measurements as a probe for triacylglycerol polymorphism and crystal size <i>M. Adam-Berret, A. Riaublanc, C. Rondeau-Mouro and F. Mariette</i>	185
---	-----

ESR and Other Techniques

ESR for food irradiation detection <i>Eric Marchioni</i>	195
---	-----

Applications of CW-EPR in food quality control and R&D <i>Andreas Kamlowski, David Barr and Hideyuki Hara</i>	205
--	-----

<i>Contents</i>	ix
Application of electron spin resonance to study food antioxidant and prooxidative activities <i>J.J. Yin and P.P. Fu</i>	213
Water/biopolymer interactions: comparison of NMR with other techniques <i>A. Almutawah, S. A. Barker and P. S. Belton</i>	222
Fish and Meat	
Low field NMR study on wild and farmed atlantic cod (<i>Gadus Morhua</i>) <i>M. Guðjónsdóttir, V.N. Gunnlaugsson, G.A. Finnbogadóttir, K. Sveinsdóttir, H. Magnússon and S. Arason</i>	231
A look at NMR relaxometry applications in meat science – recent advances in coupling NMR relaxometry with spectroscopic, thermodynamic, microscopic and sensory measurements <i>H.C. Bertram, R.L. Meyer and H.J. Andersen</i>	241
Sodium MRI as a tool for optimization of salting processes <i>Emil Veliyulin, Ida G. Aursand, Ulf Erikson and Bruce J. Balcom</i>	251
Subject Index	257
