

The Future of Glycerol

New Uses of a Versatile Raw Material

RSC Green Chemistry Book Series

Series Editors

James H Clark, *Department of Chemistry, University of York, York, UK*

George A Kraus, *Department of Chemistry, Iowa State University, Iowa, USA*

Green Chemistry is one of the most important and rapidly growing concepts in modern chemistry. Through national awards and funding programmes, national and international courses, networks and conferences, and a dedicated journal, Green Chemistry is now widely recognised as being important in all of the chemical sciences and technologies, and in industry as well as in education and research. The RSC Green Chemistry book series is a timely and unique venture aimed at providing high level research books at the cutting edge of Green Chemistry.

Titles in the Series:

The Future of Glycerol: New Uses of a Versatile Raw Material

By Mario Pagliaro, *CNR, Institute of Nanostructured Materials and Institute for Scientific Methodology, Palermo, Italy* and Michele Rossi, *Department of Inorganic Chemistry, University of Milan, Milan, Italy*
