

# *Contents*

## **Chapter 1 Fungi and the Development of Microbiological Chemistry**

1.1	Introduction	1
1.2	Structure of Fungi	2
1.3	Classification of Fungi	4
1.4	The Fungal Cell Wall	5
1.5	History of Fungal Metabolites	6
1.5.1	Fungal Metabolites in the Nineteenth Century	7
1.5.2	Fungal Metabolites 1900–1940	8
1.5.3	Fungi in the Antibiotic Era, 1940–1960	10
1.5.4	Study of Fungal Plant Diseases 1940–1965	12
1.5.5	Impact of Spectroscopic Methods on Structure Elucidation	13
1.5.6	Fungal Metabolites 1965–2005	13
1.5.7	History of Biosynthetic Studies with Fungi	15

## **Chapter 2 The Chemistry of Growing Fungi**

2.1	The Culture Medium	18
2.2	Laboratory Fermentation	20
2.3	Isolation of Fungal Metabolites	21
2.4	The Stages in a Fermentation	23
2.5	Utilization of the Constituents of the Medium	25
2.6	Fungi Growing in the Wild	28
2.7	Biosynthetic Experiments	29

## **Chapter 3 Fungal Metabolites Derived from Amino Acids**

3.1	Introduction	32
3.2	Penicillins	33

---

The Chemistry of Fungi

By James R. Hanson

© James R. Hanson, 2008

3.3	Cephalosporins	36
3.4	Biosynthesis of $\beta$ -Lactams	37
3.5	Metabolites Containing a Diketopiperazine Ring	39
3.5.1	Mycelianamide	40
3.5.2	Gliotoxin	40
3.6	The Cyclopenin-Viridicatin Group of Metabolites	42
3.7	Tryptophan-derived Metabolites	42
3.8	Glutamic Acid Derivatives	44
3.9	Fungal Peptides	45

#### **Chapter 4 Polyketides from Fungi**

4.1	Introduction	47
4.2	Polyketide Biosynthesis	48
4.3	Triketides	50
4.4	Tetraketides	51
4.4.1	6-Methylsalicylic Acid	51
4.4.2	Patulin and Penicillic Acid	52
4.4.3	Gladiolic Acid and its Relatives	55
4.4.4	Tetraketide Tropolones	56
4.4.5	Mycophenolic Acid	57
4.5	Pentaketides	58
4.5.1	Citrinin	58
4.5.2	Terrein	60
4.6	Hepta- and Octaketides	61
4.6.1	Griseofulvin	61
4.6.2	Cladosporin (Asperentin)	64
4.7	Polyketide Lactones	65
4.8	Statins	66
4.9	Cytochalasins	68
4.10	Fatty Acids from Fungi	68
4.11	Polyacetylenes from the Higher Fungi	70

#### **Chapter 5 Terpenoid Fungal Metabolites**

5.1	Introduction	73
5.2	Biosynthesis of Fungal Terpenoids	73
5.3	Monoterpenoids	76
5.4	Sesquiterpenoids	76
5.4.1	Cyclonerodiol	77
5.4.2	Helicobasidin	78
5.4.3	Trichothecenes	78
5.4.4	PR-Toxin	81
5.4.5	Botryanes	81

5.4.6	Culmorin and Helminthosporal	84
5.4.7	Sesquiterpenoids of the Basidiomycetes	85
5.5	Diterpenoid Fungal Metabolites	93
5.5.1	Virescenosides	94
5.5.2	Rosanes	94
5.5.3	Gibberellins and Kaurenolides	97
5.5.4	Aphidicolin	101
5.5.5	Pleuromutilin	102
5.5.6	Fusicoccins and Cotylenins	102
5.6	Sesterterpenoids	104
5.7	Fungal Triterpenoids and Steroids	105
5.7.1	Ergosterol	106
5.7.2	Fusidane Steroidal Antibiotics	107
5.7.3	Viridin, Wortmannin and their Relatives	111
5.7.4	Triterpenoids of the Basidiomycetes	113
5.8	Meroterpenoids	116

## **Chapter 6 Fungal Metabolites Derived from the Citric Acid Cycle**

6.1	Introduction	120
6.2	Citric Acid and Related Acids	120
6.3	Fungal Tetrionic Acids	122
6.4	Canadensolide and Avenaciolide	123
6.5	Nonadrides	124
6.6	Squalestatins	126

## **Chapter 7 Pigments and Odours of Fungi**

7.1	Introduction	127
7.2	Polyketide Fungal Pigments	128
7.2.1	Fumigatin	128
7.2.2	Auroglaucin and Flavoglaucin	129
7.2.3	Hydroxyanthraquinone Pigments	129
7.2.4	Xanthone and Naphthopyrone Pigments	130
7.2.5	Extended and Dimeric Quinones	131
7.3	Fungal Pigments Derived from the Shikimate Pathway	132
7.3.1	Terphenyls	132
7.3.2	Pulvinic Acids	133
7.4	Some Pigments Containing Nitrogen	135
7.5	Terpenoid Pigments	138
7.5.1	Fungal Carotenoids	138
7.6	Lichen Substances	140
7.7	Odours of Fungi	142
7.7.1	Organoleptic Components of Mushrooms	142
7.7.2	Volatile Fungal Metabolites Containing Sulfur	144

**Chapter 8 The Chemistry of Some Fungal Diseases of Plants**

8.1	Introduction	147
8.2	General Chemistry of Plant–Fungal Interactions	148
8.3	Chemistry of some Leaf-spot Diseases	149
8.3.1	<i>Botrytis cinerea</i>	149
8.3.2	<i>Alternaria</i> Leaf-spot Diseases	151
8.3.3	<i>Cercospora</i> Leaf-spot Diseases	153
8.3.4	Diseases Caused by <i>Colletotrichum</i> Species	154
8.4	Fungal Diseases of the Gramineae	155
8.5	Root-infecting Fungi	157
8.6	Some Fungal Diseases of Trees	159
8.6.1	Dutch Elm Disease	159
8.6.2	<i>Eutypa</i> Dieback	160
8.6.3	<i>Armillaria mellea</i>	161
8.6.4	<i>Phytophthora cinnamomi</i>	162
8.6.5	Silver-leaf Disease	162
8.6.6	<i>Nectria galligena</i> Canker	162
8.6.7	Canker Diseases of Cypress	163
8.7	<i>Trichoderma</i> Species as Anti-fungal Agents	163
8.8	Fungal Diseases of Plants and Global Warming	164

**Chapter 9 Mycotoxins**

9.1	Introduction	165
9.2	Ergotism	165
9.3	Trichothecenes as Mycotoxins	166
9.4	Other <i>Fusarium</i> Toxins	168
9.5	Aflatoxins	169
9.6	Mycotoxins of <i>Penicillium</i> Species	171
9.7	Poisonous Mushrooms	173

**Chapter 10 Fungi as Reagents**

10.1	Introduction	177
10.2	Xenobiotic Transformations	177
10.2.1	Microbial Hydrolysis	178
10.2.2	Microbial Redox Reactions	179
10.2.3	Microbiological Hydroxylation	180
10.3	Biosynthetically-patterned Biotransformations	183

<i>Contents</i>	xi
<b>Epilogue</b>	188
<b>Further Reading and Bibliography</b>	190
<b>Glossary</b>	204
<b>Subject Index</b>	209
