<b>Acknowledgements</b>	xii
<b>About the Authors</b>	xiii
<b>Chapter 1 Definitions</b>	
1.1 Names and Structures	1
1.2 Physicochemical Properties	3
1.2.1 Solubility <i>Versus</i> Chain Length	3
1.2.2 Partitioning ( $K_{ow}$ ) and Sediment Associations	6
Summary	9
<b>Chapter 2 Biological Synthesis</b>	
2.1 Type I Fatty Acid Synthesis	10
2.1.1 Unsaturated Chains	12
2.2 Type II Fatty Acid Synthesis	14
2.2.1 Unsaturated Compounds	14
2.2.2 Branched Chains	15
2.3 Fatty Acid Degradation	15
2.4 Fatty Acyl-CoA Reductase (FAR)	15
2.5 Synthesis From Carbohydrates (Copepods)	18
Summary	19
<b>Chapter 3 Occurrence in Biota</b>	
3.1 Bacteria	21
3.2 Chlorophyll Side Chain (Phytol)	21
3.3 Marine Plants	23
3.4 Terrestrial Plant Waxes	24

Fatty Alcohols: Anthropogenic and Natural Occurrence in the Environment

By Stephen M Mudge, Scott E Belanger, and Allen M Nielsen

© Copyright 2008 ERASM (the joint surfactant environmental research platform of AISE and CESIO) and SDA

Published by the Royal Society of Chemistry, www.rsc.org

3.5	Mosses and Other Peat-Forming Plants	25
3.6	Marine Animals	25
3.7	Insects	28
3.8	Birds	30
	Summary	31

#### **Chapter 4 Consumer and Cosmetic Product Uses and Production**

4.1	Detergent Alcohols Manufacture	33
4.1.1	Oleochemical-based Alcohols	33
4.1.2	Oleochemical Fatty Alcohols	35
4.2	Petrochemical-based Alcohols	36
4.2.1	Internal Olefins	36
4.2.2	Conventional OXO Alcohols Based on Internal Olefins	37
4.3	Alcohols Based on Ethylene	38
4.3.1	Ziegler Ethylene Growth Process	38
4.3.2	Ziegler Alcohols	38
4.4	Modified OXO Alcohols	39
4.4.1	SHOP (Shell Higher Olefin Process) $\alpha$ -Olefins	39
4.4.2	SHOP Internal Olefins and Modified OXO Alcohols	39
4.5	Summary of Products	41
4.6	Detergent Formulations	41
4.6.1	Japan	47
4.6.2	Western Europe	48
4.6.3	North America	49
4.7	Future Fatty Alcohol Production	49
	Summary	51

#### **Chapter 5 Environmental Transformations**

5.1	Metabolism of Fatty Alcohols	52
5.2	Natural Degradation	55
5.2.1	Short Chain Moieties	55
5.2.2	Long Chain Moieties	59
5.3	Degradation Rate Constants	60
5.3.1	Phytol Degradation	62
5.4	Effect of Chemical Associations on Transformation Rates	63
5.4.1	“Natural” Fatty Alcohols in STPs	63
5.4.2	Anthropogenic Fatty Alcohols in STPs	64
5.4.3	Sources of Fatty Alcohols in the Environment	65
	Summary	66

**Chapter 6 Analytical Methods**

6.1	Overview of Methods	67
6.2	Methods for Analysis of Free Fatty Alcohols (and Ethoxylates)	67
6.3	Environmental Samples	69
6.4	Inter-laboratory Comparisons	71
	Summary	74

**Chapter 7 Environmental Concentrations**

7.1	The Marine Environment	76
7.1.1	Victoria Harbour, BC, Canada: Estuarine Surface Sediments (A)	76
7.1.2	Concepción Bay, Chile (B1); San Vicente Bay, Chile (B2)	79
7.1.3	Rio de Janeiro: Surface Sediments in a Contaminated Bay (C)	82
7.1.4	Ria Formosa Lagoon: Surface Sediments (D1)	83
7.1.5	Ria Formosa Lagoon: Suspended and Settled Sediments (D2)	86
7.1.6	Ria Formosa Lagoon: Shallow Core from Intertidal Sediments (D3)	87
7.1.7	Eastern North Atlantic (E)	88
7.1.8	San Miguel Gap, California: Long Marine Core (F)	89
7.1.9	Rio Grande Rise (516F of Leg 72 ODP), Brazil (G)	89
7.1.10	Falkland Plateau (511 of Leg 71 ODP), South Atlantic (H)	92
7.1.11	Guatemalan Basin (Legs 66 and 67 ODP), Central America (I)	92
7.1.12	Continental Slope, Southwest of Taiwan (J1)	92
7.1.13	East China Sea, North of Taiwan (J2)	94
7.2	The Terrestrial Environment	95
7.2.1	Pasture Land, Southern Australia (K)	95
7.2.2	Prairie Zone Soils, Alberta, Canada (L)	95
7.3	UK Studies	96
7.3.1	Conwy Estuary: Estuarine Core (50 cm) (1)	97
7.3.2	Mawddach Estuary: Surface Sediments (2)	99
7.3.3	Menai Strait: Surface Sediments (3)	99
7.3.4	Loch Riddon, Scotland: Mid-length Marine Core (4)	101
7.3.5	Clyde Sea, Scotland: Surface Sediments (5)	102
7.3.6	Looe Pool, Cornwall: Coastal Lake (6)	105
7.3.7	Bolton Fell Moss, Cumbria: Mire (7)	105

7.3.8	Lochnagar, Scotland: Mountain Lake (8)	106
7.3.9	Loch Lochy, Scotland: Freshwater Core (9a); Loch Eil, Scotland: Marine Core (9b)	106
7.4	Environmental Ranges	109
	Summary	109

## **Chapter 8 Using Fatty Alcohols as Biomarkers**

8.1	Stable Isotopes	110
8.1.1	<sup>13</sup> C Composition	111
8.1.2	<sup>2</sup> H Composition	111
8.2	Bacterial Biomass	112
8.3	Marine Fauna	114
8.4	Terrestrial Plants	115
8.5	Photosynthetic Activity	115
	Summary	116

## **Chapter 9 Multivariate Statistics**

9.1	Chemometric Methods of Use With Fatty Alcohols	117
9.1.1	Principal Component Analysis (PCA)	117
9.1.2	Partial Least Squares (PLS)	123
	Summary	127

## **Chapter 10 Environmental and Human Safety Aspects of Fatty Alcohols**

10.1	Physical Chemistry Relevant to Safety Assessments	128
10.1.1	OECD SIAR Summary	128
10.1.2	Physicochemical Overview From the OECD SIAR	129
10.1.3	Conclusions for Characterising the OECD Long Chain Alcohols Category	132
10.2	Human Health and Risk	132
10.2.1	Uses and Products	132
10.2.2	Hazards for Human Health	133
10.2.3	Exposure Characterisation for Human Health	134
10.2.4	Risk Characterisation for Human Health	134
10.3	Environmental Risk	136
10.3.1	Pathways of Environmental Exposure	136
10.3.2	Environmental Effects	136

<i>Contents</i>	xi
10.4 Measurements of Exposure for the Purpose of Environmental Risk Assessment	139
10.5 Risk Characterisation in the Environment	140
Summary	141
