

Acknowledgements

The authors are deeply appreciative of discussions and research collaborations with many individuals over the past several years that have culminated in the contents of this book. We especially appreciate the interactions with Hans Sanderson, Kathy Stanton, Rich Sedlak and Paul DeLeo (The Soap and Detergent Association (U.S.)), Martin Selby and Charles Eadsforth (Shell Global Solutions), Thorsten Wind (Henkel), Dennis Walker (Procter and Gamble Company and chair of the APAG Alcohols Technical Committee) and Andreas Willing (Cognis). Funding and collaborations across a variety of professional and industry associations are acknowledged including the US SDA, ERASM (European Risk Assessments and Surfactants Management; the joint surfactant environmental research platform for AISE (Association Internationale de la Savonnerie, de la Détergence et des Produits d'Entretien) and CESIO (Comite Europeen des Agents de Surface et de leurs Intermediaires Organiques)), APAG (Association Européenne des Producteurs d'Acides Gras) and the ICCA (International Council of Chemical Associations) Aliphatic Alcohol Consortium.

We would also like to thank the many researchers from several universities and institutes who have analysed these compounds over the years.
