Chapter 1	Communication with the Mononuclear Molybdoenzymes: Emerging Opportunities and Applications in Redox Enzyme Biosensors	1
	<i>Paul V. Bernhardt</i>	
1.1	Introduction – the Three Mo Enzyme Families	1
1.2	Mechanism	2
1.3	Amperometric Biosensors	3
1.4	Emerging Applications of Mo Enzymes in Sensing	5
1.4.1	Xanthine Oxidase Family	5
1.5	Sulfite Oxidase Family	9
1.5.1	Sulfite Oxidoreductase	10
1.6	DMSO Reductase Family	15
1.6.1	DMSO Reductase	15
1.6.2	Nitrate Reductase	17
1.6.3	Arsenite Oxidase	19
1.6.4	Chlorate and Perchlorate Reductase	20
1.7	Conclusions	20
	References	21
Chapter 2	Scanning Probe Analyses at the Bioelectronic Interface	25
	<i>Jason J. Davis, Ben Peters, Yuki Hanyu and Wang Xi</i>	
2.1	Introduction	25
2.1.1	Scanning Probe Microscopy	26
2.1.2	SPM Applications at the Biomolecular Interface	35
2.1.3	Summary	38

Engineering the Bioelectronic Interface: Applications to Analyte Biosensing and Protein Detection
Edited by Jason Davis

© 2009 Royal Society of Chemistry

Published by the Royal Society of Chemistry, www.rsc.org

2.2	Bioelectronic Analyses	39
2.2.1	Electrode Surface Considerations	39
2.2.2	AFM Imaging Case Studies	39
2.2.3	The Direct Imaging of Electrochemistry and Enzyme Activity	41
2.2.4	Spectroscopic Assessment Electrode- biomolecule Electronic Coupling	46
2.3	Summary	49
	References	50
Chapter 3	Electrical Interfacing of Redox Enzymes with Electrodes by Surface Reconstitution of Bioelectrocatalytic Nanostructures	56
	<i>Itamar Willner, Ran Tel-Vered and Bilha Willner</i>	
3.1	Introduction	56
3.2	Reconstituted Enzyme Electrodes in Monolayer Configurations	59
3.3	Electrical Wiring of Redox Proteins with Electrodes by their Reconstitution on Cofactor-Functionalised Metallic Nanoparticles (NPs) or Carbon Nanotubes (CNTs)	63
3.4	Reconstitution of apo-Enzymes in Thin Films of Re- dox Polymers	70
3.5	Design of Electrically Contacted Enzyme Electrodes by the Crossing of Surface-confined Cofactor-enzyme Affinity Complexes	72
3.6	Reconstituted Enzyme Electrodes for Biofuel Cell Applications	82
3.7	Conclusions and Perspectives	89
	Acknowledgement	90
	References	90
Chapter 4	Single-wall Carbon Nanotube Forests in Biosensors	94
	<i>James F. Rusling, Xin Yu, Bernard S. Munge, Sang N. Kim and Fotios Papadimitrakopoulos</i>	
4.1	Unique Properties of Carbon Nanotubes	94
4.1.1	Introduction	94
4.1.2	Electrocatalytic Properties	96
4.2	Biosensors Using Non-oriented Carbon Nanotube Electrodes	96
4.3	Biosensors Utilising Vertically Aligned Carbon Nanotube Forests	99

4.3.1	CNT Forest Fabrication	99
4.3.2	Biosensor Applications of SWNT Forests	107
4.4	Outlook for the Future	112
	References	113
Chapter 5	Activating Redox Enzymes through Immobilisation and Wiring	119
	<i>H.A. Heering and G.W. Canters</i>	
5.1	Introduction	119
5.2	Protein Complexes	120
5.2.1	Co-crystallisation	120
5.2.2	Covalent Complexes	122
5.3	Electron Transfer at Electrodes	126
5.3.1	Voltammetry	128
5.3.2	Chronoamperometry	128
5.4	Surface Preparation	132
5.4.1	Carbon	132
5.4.2	Gold	134
5.4.3	Other Methods	134
5.5	Immobilisation	136
5.5.1	Direct Immobilisation	137
5.5.2	Wires	139
5.5.3	Wiring Proteins	143
5.6	Conclusion	146
	References	146
Chapter 6	Cytochromes P450: Tailoring a Class of Enzymes for Biosensing	153
	<i>Vikash R. Dodhia and Gianfranco Gilardi</i>	
6.1	Introduction	153
6.2	Structure-function of Bacterial and Human Cytochromes P450	155
6.3	The Need for Electrons: the Cytochrome P450 Catalytic Cycle	158
6.4	Human Cytochromes P450 and Drug Metabolism	161
6.5	Protein Engineering of P450s to Improve or Expand their Catalytic Properties	165
6.5.1	Directed Evolution of Cytochrome P450 Enzymes	166
6.5.2	Rational Design of Cytochrome P450 Enzymes	167
6.6	Interfacing Cytochromes P450 to Electrodes	171
6.6.1	Immobilisation on Unmodified Electrodes	172
6.6.2	Immobilisation with Surfactants, Polymers and Gold Nanoparticles	173

6.6.3	Immobilisation by Covalent Linkage on Gold Electrodes: Use of Spacers	178
6.6.4	Protein Engineering to Control Protein Immobilisation and Catalytic Turnover on Electrode Surfaces	180
6.7	Conclusions	185
	References	186
Chapter 7	Label-free Field Effect Protein Sensing	193
	<i>Jan Tkac and Jason J. Davis</i>	
7.1	Interfacial Protein Detection	193
7.2	Protein Microarrays	194
7.2.1	Array Substrates	194
7.2.2	Surface Chemistry and Immobilisation	196
7.2.3	Capture Biomolecules	198
7.2.4	Detection Tools	200
7.2.5	Ultrasensitive Protein Detection	204
7.3	Label-free Field Effect Protein Detection	206
7.3.1	Field Effect Transistor (FET) based Protein Sensing	207
7.3.2	Capacitance/Impedance Label-free Protein Sensing	209
7.3.3	Nanoscale Devices for Label-free Field Effect Protein Sensing	213
7.4	Conclusions	215
	References	216
Chapter 8	Biological and Clinical Applications of Biosensors	225
	<i>Paul Ko Ferrigno</i>	
8.1	Biosensing for Pure Biological Research	225
8.1.1	The Challenges of “Omics” and “Systems” Approaches	225
8.1.2	Biological Complexity	226
8.1.3	The Types of Device Required	230
8.2	Biosensing for Clinical Applications	231
8.2.1	The Clinical Problems – Diagnosis, Prognosis, Personalised Medicine	231
8.2.2	Biosensors for Clinical Applications	239
8.3	Further Reading	240
	References	240
	Subject Index	243
