<b>Chapter 1 Evolution of Microwave Irradiation and Its Introduction to the Biosciences</b>	<b>1</b>
1.1 Microwave Radiation	1
1.2 History and Evolution of the Magnetron	2
1.3 Microwaves as a Catalysis Tool in Organic and Inorganic Chemistry	3
1.4 Microwave-Assisted Staining of SDS-PAGE and PVDF Membrane-Embedded Proteins	3
1.5 Microwave-Assisted Peptide Synthesis	6
1.6 Microwave-Assisted Antigen Retrieval	6
1.7 Microwave-Assisted Analysis of Neuropeptides	7
1.8 Microwave-Assisted Akabori Reaction	7
References	8
<b>Chapter 2 Microwave Instrumentation in the Biosciences</b>	<b>10</b>
2.1 Background	10
2.2 Microwave Design	11
2.2.1 Monomode <i>vs.</i> Multimode Systems	11
2.2.2 Continuous Flow Systems	13
2.2.3 High-Throughput Formats	16

2.3	Methods for Measuring Reaction Temperatures	16
2.4	Commercially Available Instrumentation	17
	References	19
<b>Chapter 3</b>	<b>Mechanisms of Microwave-Assisted Action</b>	<b>21</b>
3.1	Dipolar Polarization Mechanisms	21
3.2	Conduction Mechanism	23
3.3	Superheating Theory	25
3.4	Mechanisms of Action Specific for Proteomic and Protein Chemistry Analyses	25
	References	27
<b>Chapter 4</b>	<b>Microwave-Assisted Enzymatic Digestions</b>	<b>28</b>
4.1	Introduction to Proteomic Work Flows	28
4.2	Microwave-Assisted Tryptic Digestions	30
4.3	Microwave-Assisted Proteolysis with Other Proteolytic Enzymes	34
4.4	Effect of Solvents on Microwave-Assisted Proteolysis	36
4.5	Microwave-Assisted Protein Preparation and Enzymatic Digestion (MAPED) in Proteomics	37
4.6	Microwave-Assisted Tryptic Digestion on Immobilized Surfaces	37
4.7	Theory of Microwave-Assisted Proteolytic Digestions	39
	References	40
<b>Chapter 5</b>	<b>Microwave-Assisted Chemical Digestion of Proteins</b>	<b>43</b>
5.1	Traditional Protocols for the Chemical Digestion of Proteins	43
5.2	Acid-Mediated Microwave-Assisted Digestion of Proteins	45
5.2.1	TFA-Mediated Microwave-Assisted Proteolysis	46
5.2.2	Asp-Specific Microwave-Assisted Proteolysis	48
5.3	Other Microwave-Assisted Chemical Proteolysis Reactions	53
	References	54
<b>Chapter 6</b>	<b>Microwave-Assisted Acid Hydrolysis</b>	<b>56</b>
6.1	Protein Quantitation by Amino Acid Analysis	56
6.2	Microwave-Assisted Acid Hydrolysis for Protein Quantitation	57

6.3	Traditional Methods for N- and C-Terminal Sequencing	59
6.4	N- and C-terminal Sequencing using Microwave-Assisted Acid Hydrolysis	61
6.5	Microwave-Assisted Acid Hydrolysis for Analysis of N-terminally Blocked Proteins	68
	References	70
<b>Chapter 7</b>	<b>Microwave-Assisted Discovery and Characterization of Posttranslational Modifications</b>	<b>71</b>
7.1	Posttranslational Modifications	71
7.2	Microwave-Assisted Characterization of Glycopeptides and Glycoproteins	72
7.3	Microwave-Assisted Enzyme-Mediated N-linked Deglycosylation	76
7.4	Microwave-Assisted O-linked Deglycosylation	81
7.5	Microwave-Assisted Methods for Phosphorylation Mapping	81
7.5.1	Microwave-Assisted $\beta$ -Elimination and Michael Addition	81
7.5.2	Enrichment of Phosphopeptides using Microwave-Assisted IMAC Probes	85
7.6	Microwave-Assisted Enzymatic Removal of N-terminal Pyroglutamyl	85
7.7	Other Microwave-Assisted Methods for the Characterization of PTMs	89
	References	89
<b>Chapter 8</b>	<b>Recent Microwave-Assisted Applications in the Life Sciences</b>	<b>92</b>
8.1	Microwave-Assisted Protein Quantitation Protocols	93
8.1.1	Microwave-Assisted ICAT <sup>TM</sup> and iTRAQ <sup>TM</sup> Reactions for Parallel Proteomic Quantitation	93
8.1.2	Microwave-Assisted Fluorescence and Chemiluminescence Protein Quantitation	97
8.2	Microwave-Assisted Molecular Biology Tools	99
8.2.1	Microwave-Assisted Polymerase Chain Reaction	100
8.2.2	Microwave-Assisted Rolling Circle Amplification	101
8.3	Microwave-Assisted Characterization of Metal-Catalyzed Reaction Sites on Proteins	101

8.4	Microwave-Assisted Characterization of Lipase Selectivities	102
8.5	Dissociation of Protein Complexes	104
	References	108
<b>Chapter 9</b>	<b>Epilogue: To Microwave or Not To Microwave?</b>	<b>110</b>
<b>Chapter 10</b>	<b>Microwave-Assisted Proteomic Protocols</b>	<b>112</b>
	Safety Considerations	112
	Protocol I. Microwave Fixing, Staining and Destaining of SDS-PAGE Gels	113
	Reagents	113
	Protocol	113
	Protocol II. Microwave-Assisted Antigen Retrieval	114
	Protocol	114
	Protocol III. Microwave-Assisted In-Solution Tryptic Digestion	114
	Reagents	114
	Protocol	114
	Protocol IV. Microwave-Assisted In-Gel Tryptic Digestion	115
	Reagents	115
	Protocol	115
	Protocol V: Microwave-Assisted Protein Hydrolysis for Amino Acid Analysis	115
	Reagents	116
	General Considerations	116
	Protocol	116
	Protocol VI: TFA Cleavage for Bottom-Up Characterization	116
	Reagents	116
	Protocol	117
	Protocol VII: Aspartic Acid Specific Cleavage for Formic Acid Catalysis	117
	Reagents	117
	Protocol 1 – In Solution	117
	Protocol 2 – In gel	117
	Protocol VIII: <i>N</i> -linked Protein Deglycosylation	118
	Reagents	118
	Protocol	118
