## **Current and Future Applications of Nanotechnology**

*Barry Park*

1	Introduction	1
1.1	History	1
1.2	Definitions	1
1.3	Investment	2
2	Technology	2
2.1	Nanomaterials	2
2.2	Manufacturing Processes	3
2.3	Product Characteristics	3
3	Types of Nanomaterials	4
3.1	Carbon	4
3.2	Inorganic Nanotubes	6
3.3	Metals	7
3.4	Metal Oxides	7
3.5	Clays	10
3.6	Quantum Dots	11
3.7	Surface Enhanced Raman Spectroscopy	11
3.8	Dendrimers	12
4	Bio Applications	12
5	Nanocatalysts	12
6	Nanotechnology Reports	13
6.1	Forbes/Wolfe Nanotech Reports	13
6.2	Woodrow Wilson	13
7	Future Opportunities	14
7.1	Nanoroadmap	14
7.2	SusChem	14
7.3	Lux Research Market Forecast	15
8	Nanomaterials Companies	15
9	Future	15
	References	16

**Nanoparticles in the Aquatic and Terrestrial Environments***Jamie Lead*

1	Introduction	19
2	Overview of Current Knowledge	20
3	Fate and Behaviour in Natural Aquatic Systems	26
3.1	Natural and Engineered Nanoparticle Interactions	27
3.2	Structural Determination and Analysis	29
3.3	Interactions with Pollutants, Pathogens and Nutrients	29
3.4	Effects on Pollutant and Pathogen Fate and Behaviour	29
4	Issues to be Addressed	30
4.1	Sources and Sinks of Nanoparticles	30
4.2	Free and Fixed Engineered Nanoparticles	31
4.3	Nanoparticle Interactions with Naturally Occurring Material	31
4.4	Nanoparticles as Pollutants	31
4.5	Transport of Nanoparticles	31
4.6	Nanoparticles as Vectors of Pollution	32
5	Conclusions	32
	References	32

**Nanoparticles in the Atmosphere***Roy Harrison*

1	Introduction	35
2	Sources of Atmospheric Nanoparticles	35
2.1	Primary Emissions	35
2.2	Secondary Particles	36
2.3	Formation of Nanoparticles During Diesel Exhaust Dilution	37
3	Particle Size Distributions	39
3.1	Source Strength of Traffic Particles	40
3.2	Emissions from Non-Traffic Sources	41
4	Measurement of Nanoparticles in Roadside Air	41
5	Transformation and Transport of Ultrafine Particles	43
6	Measurements of Particle Number Concentration in the Atmosphere	44
7	Chemical Composition of Atmospheric Nanoparticles	45
8	Indoor/Outdoor Relationships of Nanoparticles	46
9	Conclusions	47
	References	48

**Occupational Exposure to Nanoparticles and Nanotubes***David Mark*

1	Introduction	50
2	Scientific Framework for Assessing Exposure to Nanoparticles	51
2.1	Terminology and Definitions	51
2.2	Routes of Exposure	51
2.3	Metric to be used for Assessing Exposure to Airborne Nanoparticles	53
3	Review of Methods for Assessing Exposure to Nanoparticles	55
3.1	General	55
3.2	Mass Concentration	56
3.3	Number Concentration	61
3.4	Surface Area Concentrations	62
3.5	Nanoparticle Size Distribution Measurement	64
3.6	Particle Sampling Techniques for Characterisation	68
3.7	Do Nanotubes Require Special Techniques?	69
3.8	Sampling Strategy Issues	70
4	Review of Reported Measurements of Exposure to Nanoparticles	71
4.1	Introduction	71
4.2	Measurements of Nanoparticle Exposures in Existing Industries	72
4.3	Measurements of Nanoparticle Exposures in New Nanotechnology Processes	75
5	Discussion	76
	References	78

**Toxicological Properties of Nanoparticles and Nanotubes***Ken Donaldson and Vicki Stone*

1	Introduction	81
2	Environmental Air Pollution Particles	81
2.1	Effects of Environmental Particles	81
2.2	Nanoparticles as the Drivers of Environment Particle Effects	82
3	Could Cardiovascular Effects of PM be Due to CDNP?	84
4	Is the Environmental Nanoparticle Paradigm Applicable to Engineered NPs?	86
4.1	The Nature of Newer Manufactured Nanoparticles	86
4.2	Carbon Black and TiO <sub>2</sub>	86
4.3	Nanoparticles and the Brain	87

4.4	New Engineered NPs and the Cardiovascular System	87
4.5	Carbon Nanotubes	87
4.6	Fullerenes	89
4.7	Quantum Dots	90
4.8	Other Nanoparticles	90
5	Conclusion	91
	References	92

### **Human Effects of Nanoparticle Exposure**

*Lang Tran, Rob Aitken, Jon Ayres, Ken Donaldson and Fintan Hurley*

1	The Regulatory Issues	102
1.1	Nanosciences and Nanotechnologies per se	102
1.2	Nanosciences and Nanotechnologies in Context of Dangerous Substances Generally	103
2	Current Issues and Knowledge Gaps	103
2.1	Toxicology of Nanoparticles	104
2.2	NP Characterisation	106
2.3	Epidemiology	107
2.4	Human Challenge Studies	110
3	Discussion: Risk Assessment of Engineered NPs	111
	References	113

### **Nanoparticle Safety – A Perspective from the United States**

*Andrew D. Maynard*

1	Introduction	118
2	The US National Nanotechnology Initiative	119
3	Federal Government Activities in Support of “Safe” Nanotechnology	120
4	Industry and Other Non-government Activities in Support of “Safe” Nanotechnology	124
5	Looking to the Future – Ensuring the Development of “Safe” Nanotechnology	125
	References	129
