Improving Air Quality in the United Kingdom	1
<i>D. R. Middleton</i>	
1 Introduction	1
2 Pollution in Street Canyons	2
3 Motor Vehicle Contribution	4
4 Future Air Quality Objectives	6
5 Mapping an Air Quality Management Area	8
6 Quality Control	9
7 Other Approaches	10
8 Role of Air Quality Modelling	11
9 Conclusions	16
Emission Inventories	19
<i>David Hutchinson</i>	
1 Introduction	19
2 Urban Emission Inventory Procedures	25
3 West Midlands Atmospheric Emissions Inventory	35
4 Conclusions	39
Ambient Air Quality Monitoring	41
<i>Jon Bower</i>	
1 Introduction	41
2 The Role of Monitoring in Air Quality Management	42
3 Monitoring Objectives	42
4 Quality Assurance and Control	43
5 Network Design	47
6 Instrument Selection	51
7 System Operation	55
8 Data Management	58
9 A Final Thought	64
10 Acknowledgements	65
The European Auto-oil Programme: Scientific Considerations	67
<i>Andreas N. Skouloudis</i>	
1 The Modelling Framework for Regulatory Decisions	67
2 Urban and Regional Models for Air Quality Calculations	69

Contents

3	Characterization of Air Quality Data from Monitoring Stations	72
4	Construction and Disaggregation of Emission Inventories	75
5	Validation of Air Quality Modelling Simulations	80
6	Impact Assessment and Scenario Calculations	84
7	Coupling Air Quality with Cost Data and Optimization of Scenarios	90
8	Remarks and Conclusions	92
9	Acknowledgements	93
	Receptor Modeling for Air Quality Management	95
	<i>Philip K. Hopke</i>	
1	Introduction	95
2	Principle of Mass Balance	96
3	Currently Used Receptor Models	97
4	Secondary Aerosol Mass	101
5	Apportionment of Volatile Organic Carbon Compounds	116
6	Summary	117
	The Critical Load Approach to Air Pollution Control	119
	<i>M. Hornung, H. Dyke, J. R. Hall and S. E. Metcalfe</i>	
1	Background	119
2	Definitions	120
3	Calculation of Critical Loads	120
4	Applications of the Critical Load Approach	130
5	Summary and Conclusions	140
6	Acknowledgements	140
	California's Approach to Air Quality Management	141
	<i>Alan C. Lloyd</i>	
1	Introduction	141
2	Emissions and Air Quality Trends	142
3	Technical Basis and Approach to Emission Controls	145
4	Philosophy of Air Quality Management	147
5	On-road Vehicle Emissions	150
6	Cleaner Burning Fuels—Rationale and Implementation	152
7	Low Emission Vehicle Program	153
8	Economy of California and its Influence on Air Quality Management in the State	155
9	Summary	156
10	Acknowledgements	156
	Subject Index	157
