Chapter 1	Introduction	1
	References	4
Chapter 2	Principles of Chirality and Dynamic Stereochemistry	6
	2.1 Stereochemistry of Chiral Compounds	6
	2.2 Dynamic Stereochemistry of Cyclic and Acyclic Chiral Compounds	15
	References	27
Chapter 3	Racemization, Enantiomerization and Diastereomerization	29
	3.1 Classification of Isomerization Reactions of Chiral Compounds	30
	3.1.1 Racemization	31
	3.1.2 Enantiomerization	34
	3.1.3 Diastereomerization	36
	3.1.4 Epimerization and Mutarotation	40
	3.2 Stereomutations of Chiral Compounds: Mechanisms and Energy Barriers	44
	3.2.1 Alkanes	44
	3.2.2 Alkenes and Annulenes	46
	3.2.3 Allenes and Cumulenes	52
	3.2.4 Helicenes and Phenanthrenes	53
	3.2.5 Alkyl Halides, Nitriles and Nitro Compounds	54
	3.2.6 Amines	56
	3.2.7 Aldehydes, Ketones and Imines	58
	3.2.8 Alcohols, Ethers, Acetals, and Ketals	60
	3.2.9 Carboxylic Acids and Derivatives	65
	3.2.10 Amino Acids	68
	3.2.11 Silicon, Phosphorus and Sulfur Compounds	71
	3.2.12 Organometallic Compounds	74
	3.2.13 Supramolecular Structures	80

3.3	Atropisomerization	84
3.3.1	Biaryls, Triaryls and Diarylacetylenes	85
3.3.2	Nonbiaryl Atropisomers	94
3.3.3	Cyclophanes	104
3.3.4	Atropisomeric Xenobiotics	107
3.4	Pharmacological and Pharmacokinetic Significance of Racemization	109
	References	112
Chapter 4	Analytical Methods	136
4.1	Chiroptical Methods	140
4.2	NMR Spectroscopy	143
4.3	Dynamic Chromatography	153
4.3.1	Dynamic High Performance Liquid Chromatography	159
4.3.2	Dynamic Gas Chromatography	164
4.3.3	Dynamic Supercritical Fluid Chromatography and Electrokinetic Chromatography	167
4.4	Chromatographic and Electrophoretic Stopped-flow Analysis	168
4.5	Comparison of Analytical Methods	172
	References	172
Chapter 5	Principles of Asymmetric Synthesis	180
5.1	Classification of Asymmetric Reactions	180
5.2	Kinetic and Thermodynamic Control	183
5.3	Asymmetric Induction	186
5.3.1	Control of Molecular Orientation and Conformation	189
5.3.2	Single and Double Stereodifferentiation	194
	References	198
Chapter 6	Asymmetric Synthesis with Stereodynamic Compounds: Introduction, Conversion and Transfer of Chirality	204
6.1	Asymmetric Synthesis with Chiral Organolithium Reagents	205
6.1.1	α -Alkoxy- and α -Amino-substituted Organolithium Compounds	207
6.1.2	Sulfur-, Phosphorus- and Halogen-stabilized Organolithium Compounds	212
6.2	Atroposelective Synthesis of Axially Chiral Biaryls	215
6.2.1	Intramolecular Atroposelective Biaryl Synthesis	217
6.2.2	Intermolecular Atroposelective Biaryl Synthesis	220
6.2.3	Atroposelective Ring Construction	224
6.2.4	Desymmetrization of Conformationally Stable Prochiral Biaryls	225
6.2.5	Asymmetric Transformation of Stereodynamic Biaryls	226
6.3	Nonbiaryl Atropisomers	231
6.4	Chirality Transfer and Interconversion of Chiral Elements	233

6.4.1	Chirality Transfer in S_N2' and S_E2' Reactions	234
6.4.2	Rearrangements	240
6.4.2.1	1,2-Chirality Transfer	241
6.4.2.2	1,3-Chirality Transfer	242
6.4.2.3	1,4-Chirality Transfer	250
6.4.2.4	1,5-Chirality Transfer	252
6.4.3	Intermolecular Chirality Transfer	254
6.4.4	Transfer of Stereogenicity Between Carbon and Heteroatoms	255
6.4.5	Conversion of Central Chirality to Other Chiral Elements	257
6.4.6	Conversion of Axial Chirality to Other Chiral Elements	261
6.4.7	Conversion of Planar Chirality to Other Chiral Elements	270
6.5	Self-regeneration of Stereogenicity and Chiral Relays	271
6.5.1	Stereocontrolled Substitution at a Chiral Center	271
6.5.2	Self-regeneration of Stereocenters	276
6.5.3	Self-regeneration of Chiral Elements with Stereolabile Intermediates	282
6.5.4	Chiral Relays	289
6.6	Asymmetric Catalysis with Stereolabile Ligands	292
6.6.1	Stereodynamic Achiral Ligands	294
6.6.2	Stereolabile Axially Chiral Ligands	296
6.7	Stereoselective Synthesis in the Solid State	302
	References	304
Chapter 7 Asymmetric Resolution and Transformation of Chiral Compounds under Thermodynamic and Kinetic Control		331
7.1	Scope and Principles of Asymmetric Resolution and Transformation	334
7.2	Asymmetric Transformation of the First Kind	334
7.3	Asymmetric Transformation of the Second Kind	337
7.3.1	Crystallization-induced Asymmetric Transformation	337
7.3.2	Asymmetric Transformation based on Chromatographic Separation	344
7.4	Kinetic Resolution and Dynamic Kinetic Resolution	346
7.4.1	Kinetic Resolution	346
7.4.1.1	Enzyme-catalyzed Kinetic Resolution	347
7.4.1.2	Nonenzymatic Kinetic Resolution	351
7.4.1.3	Parallel Kinetic Resolution	355
7.4.2	Dynamic Kinetic Resolution	359
7.4.2.1	Enzyme-catalyzed Dynamic Kinetic Resolution	360
7.4.2.2	Nonenzymatic Dynamic Kinetic Resolution	365
7.5	Dynamic Kinetic Asymmetric Transformation	372
7.6	Dynamic Thermodynamic Resolution	378
	References	382
Chapter 8 From Chiral Propellers to Unidirectional Motors		399
8.1	Stability and Reactivity of Stereodynamic Gears	399
8.2	Structure and Ring Flipping of Molecular Propellers	403
8.3	Dynamic Gearing in Biaryl-, Triaryl- and Tetraaryl Propellers	405

8.4	Molecular Bevel Gears	411
8.5	Vinyl Propellers	414
8.6	Propeller-like Coordination Complexes with Helicity Control	418
8.7	Static Gearing and Cyclostereoisomerism	419
8.8	Molecular Brakes, Turnstiles and Scissors	421
8.9	Chiral Molecular Switches	423
8.10	Stereodynamic Sensors	432
8.11	Chiral Molecular Motors	435
	References	437
Chapter 9	Topological Isomerism and Chirality	444
9.1	Synthesis of Catenanes and Rotaxanes	445
9.1.1	Statistical Methods	445
9.1.2	Template-assisted Assembly	447
9.1.3	Topological Isomerization	450
9.2	Chiral Catenanes	451
9.3	Chiral Rotaxanes	458
9.4	Knots and Borromean Rings	465
9.5	Topological Isomerism of Shuttles, Switches, Sensors, and Rotors	467
	References	473
Glossary	Stereochemical Definitions and Terms	480
Subject Index		503
