## Chapter 1 From Resinous Tar to Molecular Baskets

1.1	The Resinous Tar	1
1.2	Glistening Crystals: The Zinke Products	5
1.3	More Crystals: The Niederl Products	9
1.4	Cyclic Tetramers: Proofs of Structure	11
1.5	The Petrolite Chapter	15
1.6	Cyclic Tetramers and the Quest for Enzyme Mimics	18
1.7	Unraveling the Literature	21
1.8	Nomenclature and Representation of the Calixarenes	24

## Chapter 2 Making the Baskets: Synthesis of Calixarenes

2.1	One-step, Base-induced Synthesis of Phenol-derived Calixarenes	27
2.1.1	Synthesis of <i>p</i> - <i>tert</i> -Butylcalixarenes	27
2.1.2	Synthesis of Other <i>p</i> -Substituted Calixarenes	31
2.2	One-step, Acid-catalyzed Synthesis of Calixarenes	34
2.2.1	Phenol-derived Calixarenes	34
2.2.2	Resorcinol-derived Calixarenes	34
2.3	Multi-step Synthesis of Calixarenes	37
2.3.1	Non-convergent Stepwise Syntheses	37
2.3.2	Convergent Stepwise Syntheses (Fragment Condensation Procedure)	39
2.4	Synthesis of Calixarene-related Compounds	45
2.4.1	Norcalixarenes and Homocalixarenes	45
2.4.2	Oxacalixarenes, Azacalixarenes and Thiacalixarenes	47
2.4.3	Homooxacalixarenes and Homoazacalixarenes	49
2.4.4	Heterocalixarenes	51
2.5	Mechanism of Calixarene-forming Reactions	53
2.5.1	Mechanism of the Base-induced Reaction	53
2.5.2	Mechanism of the Acid-catalyzed Reaction	59
2.6	Concluding Remarks	60

**Chapter 3 Proving the Baskets: The Characterization and Properties of Calixarenes**

3.1	Separation and Purification of Calixarenes	62
3.2	X-Ray Crystallography: The Ultimate Proof of Structure	63
3.3	Physical Properties of Calixarenes	64
3.3.1	Melting Points	64
3.3.2	Solubilities	66
3.3.3	pK <sub>a</sub> Values	66
3.4	Dipole Moments of Calixarenes	70
3.5	Spectral Properties of Calixarenes	70
3.5.1	Infrared Spectra	70
3.5.2	Ultraviolet Spectra	71
3.5.3	NMR Spectra	72
3.5.4	Mass Spectra	74
3.6	Concluding Remarks	76

**Chapter 4 Shaping the Baskets: Conformations of Calixarenes**

4.1	Conformational Representation and Nomenclature	77
4.2	Computational Studies of Calixarene Conformations	81
4.3	Conformations of Calixarenes in the Solid State	83
4.3.1	Calix[4]arenes	83
4.3.2	Calix[5]arenes	86
4.3.3	Calix[6]arenes	86
4.3.4	Calix[7]arenes	87
4.3.5	Calix[8]arenes	87
4.3.6	Large Calixarenes	88
4.4	Conformations of Flexible Calixarenes in Solution	88
4.4.1	Conformational Mobility of Calix[ <i>n</i> ]arenes	88
4.4.1.1	Conformations of Calix[4]arenes	89
4.4.1.2	Conformational Mobility of Calixarenes Larger than Calix[4]arenes	93
4.4.1.3	Conformational Mobility of Oxacalixarenes and Azacalixarenes	93
4.4.1.4	Conformational Mobility of Calixresorcarenes and C-Substituted Calixarenes	94
4.4.1.5	Conformational Mobility of Thiocalixarenes	96
4.4.1.6	Conformational Mobility of Calixarene Ethers, Deoxycalixarenes, Calixquinones and Calixarenethiols	97

4.4.2	Pathways for Cone-cone Interconversion of Calix[4]arenes	98
4.5	Conformationally Immobile Calixarenes	99
4.5.1	Minimum Structural Requirements for Conformational Immobility of Unbridged Calixarene Ethers and Esters	99
4.5.1.1	Identification of Fixed Conformers	99
4.5.1.2	Fully Etherified and Esterified Calixarenes	99
4.5.1.3	Partially Etherified and Esterified Calixarenes	103
4.5.1.4	Meta-substituted Calixarenes	104
4.5.2	Conformational Immobilization <i>via</i> Bridging	104
4.5.3	Conformational Freezing <i>via</i> Oxygen-Metal Bridges	107
4.6	Factors Governing the Conformational Outcome of Derivatization	109
4.6.1	O-Tetrasubstitution of Calix[4]arenes	109
4.6.2	Mono-, Di- and Tri-O-substitution of Calix[4]arenes	111
4.6.3	O-Substitution of Calix[5]arenes and Calix[6]arenes	111
4.6.4	Calixarene Oxyanions	112
4.6.4.1	Calix[4]arene Oxyanions	112
4.6.4.2	Calix[6]arene Oxyanions	112
4.7	Chiral Calixarenes	113
4.8	Concluding Remarks	115
<b>Chapter 5 Embroidering the Baskets: Introduction of Functional Groups</b>		
5.1	Functionalization Involving the OH Groups	116
5.1.1	Esterification	116
5.1.2	Etherification	118
5.1.2.1	With Simple Alkyl Halides	118
5.1.2.2	With Functionalized Alkylating Agents	122
5.1.3	<i>Endo</i> Rim-bridged Calixarenes	123
5.1.4	Replacement of OH with H, N and S	127
5.2	Modifying the <i>Exo</i> Rim of Calixarenes	129
5.2.1	General Overview	129
5.2.2	Halogenation, Nitration, Sulfonation and Diazonium Coupling Routes	130
5.2.3	Alkylation (Including Chloromethylation) Route	133

5.2.4	Acylation and Aroylation Routes	134
5.2.5	Arylation Reactions	135
5.2.6	Aminomethylation: The <i>p</i> -Quinonemethide Route	135
5.2.7	<i>p</i> -Claisen Rearrangement Route	136
5.3	Functionalization of the Methylene Bridges	138
5.4	<i>Exo</i> Rim-Bridged Calixarenes	140
5.5	Oxidation of Calixarenes	141
5.5.1	Calixquinones	141
5.5.2	Spirodienones	143
5.6	Reduction of Calixarenes	144
5.7	Selective Functionalization	145
5.8	Concluding Remarks	146

## Chapter 6 Combining the Baskets: Multi-Calixarenes

6.1	Calixarenes Intermolecularly Bridged by Covalent Bonding	148
6.1.1	Bridging <i>via</i> the <i>Endo</i> Rims	148
6.1.2	Bridging <i>via</i> the <i>Exo</i> Rims	150
6.1.3	Multi-Calixarenes and Calixarene Dendrimers	152
6.2	Calixarenes Intermolecularly Bridged by Non-covalent Bonding	154
6.2.1	Dimeric Assemblies of Calixarenes	154
6.2.2	Catenanes and Rotaxanes	157
6.2.3	Oligomeric and Polymeric Assemblies of Calixarenes	158
6.2.4	Calixarenes in Monolayers and Interfaces	160
6.3	Calixarene Polymers	162
6.4	Concluding Remarks	163

## Chapter 7 Filling the Baskets: Complex Formation with Calixarenes

7.1	Solid State Complexes	164
7.2	Solution State Complexes of Metal Cations with <i>Endo</i> Rim-substituted Calixarenes	171
7.2.1	Complexation with Parent Calixarenes	172
7.2.2	Complexation with <i>Endo</i> Rim-substituted Calixarenes	173
7.2.2.1	<i>Endo</i> Rim Ethers	173
7.2.2.2	<i>Endo</i> Rim Esters	175
7.2.2.3	<i>Endo</i> Rim Ketones	176
7.2.2.4	<i>Endo</i> Rim Amides	177

7.2.2.5	<i>Endo</i> Rim Carboxylic Acids	178
7.2.2.6	<i>Endo</i> Rim Phosphorus- and Sulfur-containing Groups	180
7.2.2.7	Nitrogen-containing Chelating Groups on the <i>Endo</i> Rim	181
7.2.3	Calixcrowns	182
7.2.4	Calixspherands	186
7.3	Solution State Complexes of Metal Cations with <i>Exo</i> Rim-substituted Calixarenes	187
7.4	Anion Complexes with Calixarenes	188
7.5	Salt Complexes with Calixarenes	191
7.6	Solution State Complexes of Molecules with Calixarenes	193
7.6.1	Complexes with Molecular Cations	193
7.6.2	Complexes with Neutral Molecules	197
7.6.2.1	Complexes in Aqueous Solution	197
7.6.2.2	Complexes in Non-aqueous Solution	199
7.7	Gas Phase Complexes	203
7.8	Theoretical Calculations	204
7.9	Templation	204
7.9.1	Templation in Calixarene Synthesis	204
7.9.2	Calixarenes as Templates	204
7.9.3	Templation in Conformational Phenomena	205
7.9.4	Allosteric Effects	206
7.10	Concluding Remarks	207

## Chapter 8 Using the Baskets: Calixarenes in Action

8.1	Calixarenes for Separations	209
8.1.1	Separations of Ions	209
8.1.2	Separations of Molecules	210
8.2	Calixarenes as Sensors	211
8.2.1	Ion- and Molecule-selective Electrodes	212
8.2.2	Field Effect Transistors	214
8.2.3	Chromogenic and Fluorescent Sensors	216
8.2.4	Nonlinear Optical Compounds	218
8.2.5	Other Sensors	220
8.3	Calixarenes as Catalysts	220
8.3.1	Biomimetic Catalysts	220
8.3.2	Non-biomimetic Catalysts	225
8.4	Calixarenes as Biomimetic and Physiological Compounds	228

<i>Contents</i>	xiii
8.5 Miscellaneous Applications	231
8.6 Patent Literature	236
8.7 Concluding Remarks	237
