

Contents

Stratospheric Ozone Depletion: a Discussion of Our Present Understanding	1
<i>J. A. Pyle</i>	
1 Introduction	1
2 Background	1
3 Detection of Ozone Loss	4
4 Recent Observations of Ozone Loss	7
5 The Future	12
6 Conclusion	15
7 Acknowledgements	16
Ozone Depletion and Changes in Environmental UV-B Radiation	17
<i>Ann R. Webb</i>	
1 Introduction	17
2 Historical Interest in UV-B	19
3 Determinants of UV at the Ground	20
4 Changing Factors in Transmission	23
5 UV Radiation at the Ground	26
6 Observations of UV Radiation	27
7 Longer-term Assessments of UV Irradiances	34
8 UV Forecasting	35
9 Conclusion	36
10 Acknowledgements	36
Marine Photochemistry and UV Radiation	37
<i>Robert F. Whitehead and Stephen de Mora</i>	
1 Introduction	37
2 Basics of Marine Photochemistry	38
3 Marine Photoreactants, Products and Processes	48

Contents

4	UV-B Radiation and Global Significance for Marine Biogeochemical Cycles	56
5	Summary and Conclusions	60
Assessing Biological and Chemical Effects of UV in the Marine Environment: Spectral Weighting Functions		61
<i>Patrick J. Neale and David J. Kieber</i>		
1	Introduction	61
2	Chemical Action Spectra	64
3	Biological Weighting Functions	67
4	Comparative Spectroscopy of Weighting Functions	72
5	Assessment of UV Effects	78
6	Summary and Conclusions	82
Effects of Solar UV-B Radiation on Terrestrial Biota		85
<i>Jelte Rozema</i>		
1	Evolution of Terrestrial Biota and the Stratospheric Ozone Layer	85
2	Solar UV-B, Polyphenolics, the Pool of Organic Carbon in Terrestrial Environments, and the Balance between Oxygen and Carbon Dioxide in the Earth's Atmosphere	90
3	Current Stratospheric Ozone Depletion: Increased Solar UV-B Radiation Reaching the Earth	90
4	Effects of Enhanced Solar UV-B Radiation on Terrestrial Plants, Adaptations of Terrestrial Plants to Solar UV-B: Evidence from Physiological Studies	92
5	Methodologies for the Study of UV-B Effects on Plants of Terrestrial Biota	95
6	Direct and Indirect UV-B Effects on Terrestrial Ecosystem Processes and Feedbacks, Autotrophic and Heterotrophic Relationships	97
7	Conclusions and Outlook	103
8	Acknowledgements	104
Sunlight, Skin Cancer and Ozone Depletion		107
<i>Brian L. Diffey</i>		
1	Introduction	107
2	Trends in Atmospheric Ozone and Ambient Ultraviolet Radiation	108
3	Human Exposure to Solar Ultraviolet Radiation	109
4	Effects of Ultraviolet Radiation on Skin	113
5	Risk Analysis of Human Skin Cancer	115
