

Contents

Chapter 1	
An outline of the history of PDT	1
<i>J. Moan and Q. Peng</i>	
Chapter 2	
Mechanisms of photodynamic therapy	19
<i>Anne C.E. Moor, Bernhard Ortel and Tayyaba Hasan</i>	
Chapter 3	
Sensitizers in photodynamic therapy	59
<i>Nathalie Rousset, Ludovic Bourré and Sonia Thibaud</i>	
Chapter 4	
Photodynamic therapy using 5-aminolevulinic acid-induced protoporphyrin IX	81
<i>E.F. Gudgin Dickson, J.C. Kennedy and R.H. Pottier</i>	
Chapter 5	
Sensitizers for PDT: phthalocyanines	105
<i>Nicole Brasseur</i>	
Chapter 6	
Combining photodynamic therapy with antiangiogenic therapy	119
<i>Charles J. Gomer, Angela Ferrario, Karl von Tiehl, Margaret A. Shwartz, Prakash S. Gill and Natalie Rucker</i>	
Chapter 7	
Technologies and biophysical techniques for PDT	127
<i>Brian C. Wilson</i>	
Chapter 8	
Fluorescence bronchoscopy for early detection of lung cancer	159
<i>G. Sutedja</i>	

Chapter 9	
Fluorescence diagnosis and photodynamic therapy in dermatology: an overview	177
<i>C. Fritsch, K. Lang, K.W. Schulte, W. Neuse, T. Ruzicka and P. Lehman</i>	
Chapter 10	
Photodynamic applications in neurosurgery	213
<i>Herwig Kostron</i>	
Chapter 11	
Clinical application of photomedical techniques in gynecology	241
<i>P. Wyss and A. Degen</i>	
Chapter 12	
Photodynamic therapy of the gastrointestinal tract	257
<i>Kenneth K. Wang</i>	
Chapter 13	
Factors in the establishment and spread of photodynamic therapy	273
<i>Thierry Patrice</i>	
Subject Index	283
