

# Contents

## Part A – Reactor Designs & Operation

The Management of Magnox Graphite Reactor Cores to Underwrite Continued Safe Operation <i>A T Ellis and K M Staples</i>	3
AGR Core Design, Operation and Safety Functions <i>A G Steer</i>	11
An Overview of British Energy's Graphite Core Assessment Methodology <i>M R Bradford</i>	19
UK Regulatory Strategy for Management of Graphite Ageing in Gas-Cooled, Graphite-Moderated Reactors <i>G B Heys</i>	25

## Part B – Advances in the Fundamental Knowledge of Graphite Behaviour under Irradiation

The Effects of Thermal Annealing on the Mechanical Properties of PGA Graphite <i>M P Metcalfe and J F B Payne</i>	35
Development of a Model of Dimensional Change in AGR Graphites Irradiated in Inert Environments <i>E D Eason, G N Hall and B J Marsden</i>	43
Relating Measurements of Mechanical Properties of Nuclear Graphites to Reactor Conditions. A Review of the Effects of Temperature and Pressure <i>B McEnaney</i>	51
Flexural Strength of Graphite <i>M Novovic, G B Heys and P Bowen</i>	59
Observations of Strain Localisation and Failure in Nuclear Graphite <i>M R Joyce and T J Marrow</i>	67
Evaluation of the Brazilian Disc Test in Fracture Strength Measurements of Nuclear Graphite <i>H Li, S L Fok and B J Marsden</i>	75
Irradiation Damage in Graphite from First Principles <i>M Heggie, I Suarez-Martinez, G Savini, A El-Barbary, C Ewels and R Telling</i>	83
Development of a Code to Predict Fundamental Material and Fracture Properties of Nuclear Graphite <i>C Lynch and G B Neighbour</i>	91

Modelling Graphite Ageing: Black Art or Forensic Science? <i>M A Davies and M R Bradford</i>	100
A Holistic, Structurally-Based, Approach to Modelling Graphite Properties <i>M R Bradford and A G Steer</i>	108
X-ray Tomographic Observations Applied to Porosity Models for the Thermal Properties of Oxidised Nuclear Graphite <i>L Babout, J Marrow, P Mummery and B J Marsden</i>	116
<b>Part C - Advances in the Understanding of Graphite-Component Behaviour and its Assessment</b>	
Crack Propagation Resistance and Damage Mechanisms in Nuclear Graphite <i>A Hodgkins, J Marrow, P Mummery, A Fok and B J Marsden</i>	127
Graphite Irradiation Testing at the NRG Petten <i>J G van der Laan and J A Vreeling</i>	134
The Development of Measurement Techniques for Mechanical Properties Applicable to Small Reactor Graphite Samples <i>N Tzelepi, M Brown, P C Matthews, J F B Payne and M P Metcalfe</i>	142
Techniques for Measuring the Properties of Unirradiated and Irradiated AGR Graphite <i>S D Preston and W E Ellis</i>	150
Modelling of Nuclear Graphite under Irradiation Conditions <i>D K L Tsang and B J Marsden</i>	158
Predicting the Stresses and Deformations of Irradiated Graphite Moderator Bricks <i>C Jones</i>	167
Explicit Modelling of Graphite Core Components During a Reactor Thermal Transient <i>C D Elcoate, G M Davis and J F B Payne</i>	175
<b>Part D - The Consequences of Graphite Deterioration: Whole-Core Behaviour</b>	
PBMR Graphite Core Structures Fitness for Purpose Management Strategy <i>M A Davies, M N Mitchell and P J Venter</i>	185
Seismic Modelling of an AGR Nuclear Reactor Core <i>B Kralj, S Humphreys and B Duncan</i>	193
Measurement of AGR Graphite Fuel Brick Shrinkage and Channel Distortion <i>A Cole-Baker and J Reed</i>	201

<i>Contents</i>	xi
Investigation of Degradation of AGR Graphite Core Geometry Using a Whole Core Scale Model <i>E Castro</i>	209
The Feasibility of Introducing Core Stiffening Devices and Diverse Shutdown Systems at Hinkley Point B / Hunterston B and Hartlepool / Heysham 1 <i>M W Davies</i>	216
An Integrated Architecture for Graphite Core Data Analysis <i>G Jahn, S McArthur and J Reed</i>	224
Graphite Core Condition Monitoring Through Intelligent Analysis of Fuel Grab Load Trace Data <i>G M West, G J Jahn, S D J McArthur and J Reed</i>	232
Application of Whole Core Modelling Methodology to Life Extension of AGR Reactor Graphite Cores <i>N McLachlan, D J Shaw and M H S Salih</i>	240
A Strategy for Monitoring Bore Cracking in AGR Graphite Cores <i>P R Maul and P C Robinson</i>	248
Development and Validation of Whole Core Modelling Methodology for AGR Graphite Cores <i>D J Shaw, M H S Salih and N McLachlan</i>	256
Method for Determining if Control Rods and Fuel Stringer can be Inserted / Removed from an AGR Core <i>A Thomson, M Ripley and N McLachlan</i>	264
 <b>Part E - Lessons Learned from Management of Ageing Plant</b>  	
Experience of Ageing Processes in Nuclear Power Reactors <i>B Eyre</i>	273
The Importance of Understanding of Basic Principles in the Management of Ageing Plant <i>M Burdekin</i>	282
An Overview and Summary of the Technical Papers in Parts B, C and D <i>P E J Flewitt, B McEnaney, B J Marsden and G B Neighbour</i>	291
Author Index	297
Subject Index (by Keywords)	298
