Chapter 1	Compounds Containing the Boron–Chalcogen B–E (E=S, Se, Te) Bond	1
	<i>Michael A. Beckett</i>	
1.1	Introduction	1
1.2	Books and Review Articles	1
1.3	Polyhedral Boron Hydride Derivatives	2
1.3.1	Species with Exo B–Chalcogen Bonds	2
1.3.2	Species with Chalcogen Atoms within the Cage	8
1.4	Binary, Ternary, and Quarternary Chalcogenoborates	14
1.5	Heterocycles Containing B–E Linkages	17
1.6	Miscellaneous Boron-Chalcogen Compounds and Reagents	19
	Abbreviations	22
	References	22
COMPOUNDS CONTAINING THE CARBON-CHALCOGEN C–E BOND (E=S, Se, Te)		
Chapter 2.1	Thiolates, Selenolates, and Tellurolates	33
	<i>M. Concepción Gimeno</i>	
2.1.1	Introduction	33
2.1.2	Synthetic Routes of Ligands and Metal Chalcogenolates	34
2.1.2.1	Synthesis of the Chalcogenols	34
2.1.2.2	Synthesis of Metal Chalcogenolates	34
2.1.3	Alkali and Alkaline Earth Derivatives	36
2.1.4	Main Group Metal Derivatives	39
2.1.4.1	Zinc, Cadmium, and Mercury	39
2.1.4.2	Aluminium, Gallium, Indium, and Thallium	41
2.1.4.3	Antimony and Bismuth	42
2.1.4.4	Germanium, Tin, and Lead	43

2.1.5	Transition Metal Derivatives	44
2.1.5.1	Early Transition Metals	44
2.1.5.2	Chromium, Molybdenum, and Tungsten	45
2.1.5.3	Manganese, Technetium, and Rhenium	46
2.1.5.4	Iron, Ruthenium, and Osmium	47
2.1.5.5	Cobalt, Rhodium, and Iridium	49
2.1.5.6	Nickel, Palladium, and Platinum	51
2.1.5.7	Copper, Silver, and Gold	53
2.1.6	Rare Earth Derivatives	55
2.1.7	Conclusions	57
	Acknowledgements	57
	References	57
Chapter 2.2	Recent Developments in the Chemistry of Thio-, Seleno- and Telluro-ethers	81
	<i>William Levason and Gillian Reid</i>	
2.2.1	Introduction	81
2.2.2	Synthesis	83
2.2.2.1	Monodentates	83
2.2.2.2	Bi- and Polydentates	83
2.2.2.3	Macrocycles	85
2.2.3	Coordination Chemistry of Thio-, Seleno- and Telluroethers	91
2.2.4	Coordination Modes	92
2.2.4.1	Acyclic Ligands	92
2.2.4.2	Macrocyclic Ligands	94
2.2.5	Applications	99
	Acknowledgements	100
	References	100
Chapter 2.3	Chalcogenone C=E compounds	107
	<i>Norbert Kuhn and Gaetano Verani</i>	
2.3.1	Introduction	107
2.3.2	Thioketones (Thiones)	110
2.3.2.1	Syntheses	110
2.3.2.2	Reactivity	114
2.3.3	Selenoketones (Selones)	121
2.3.3.1	Syntheses	121
2.3.3.2	Reactivity	126
2.3.4	Telluroketones (Tellones)	131
2.3.4.1	Syntheses	131
2.3.4.2	Reactivity	133
	References	134

Chapter 2.4 Thioamides, Thioureas and Related Selenium and Tellurium Compounds	145
<i>Mamoru Koketsu and Hideharu Ishihara</i>	
2.4.1 Introduction	145
2.4.2 Thioamides	145
2.4.2.1 Synthesis of Thioamides	146
2.4.2.2 Heterocycles Using Thioamides	151
2.4.2.3 Transformation of Thioamides	156
2.4.2.4 Calculations	160
2.4.2.5 Biological Activities	160
2.4.3 Thioureas	160
2.4.3.1 Synthesis of Thioureas	160
2.4.3.2 Heterocycles Using Thioureas	165
2.4.3.3 Transformation of Thioureas	169
2.4.3.4 Application as Sensor	171
2.4.3.5 Application as Ligand	172
2.4.3.6 Glycosyl Thioureas	172
2.4.3.7 Biological Activities	172
2.4.4 Cyclic Chalcogenoureas	173
2.4.5 Selenoamides and Selenoureas	177
2.4.5.1 Synthesis of Selenoamides and Selenoureas	178
2.4.5.2 Heterocycles Using Selenoamides and Selenoureas	180
2.4.6 Telluroamides and Tellurooureas	181
References	182
Chapter 3 The Compounds Between Si, Ge and Sn and Chalcogens (S, Se, and Te) Having Both a Single Bond and a Double Bond (Heavy Ketones)	195
<i>Nobuhiro Takeda, Norihiro Tokitoh and Renji Okazaki</i>	
3.1 Introduction	195
3.2 The Compounds Having a Single Bond between Si, Ge, and Sn and Chalcogens	195
3.2.1 Structural and Spectroscopic Properties	196
3.2.2 Formation of Single Bonds between Heavier Group 14 and 16 Elements	196
3.2.3 Reactions	202
3.3 The Compounds Having a Double Bond between Si, Ge, and Sn and Chalcogens (Heavy Ketones)	207
3.3.1 Theoretical Aspects	207
3.3.2 Structural and Spectroscopic Properties	208
3.3.3 Syntheses	211
3.3.4 Reactivities	211
References	215

Chapter 4	Chalcogen–Nitrogen Chemistry	223
	<i>Tristram Chivers and Risto S. Laitinen</i>	
4.1	Introduction	223
4.2	General Considerations	224
4.3	Characterization of Chalcogen-Nitrogen Compounds	224
4.3.1	Diffraction Techniques	224
4.3.2	^{14}N and ^{15}N NMR Spectroscopy	226
4.3.3	^{33}S , ^{77}Se and ^{125}Te NMR Spectroscopy	226
4.3.4	ESR Spectroscopy	226
4.3.5	Infrared and Raman Spectroscopy	227
4.4	Binary Chalcogen-Nitrogen Systems	228
4.4.1	Neutral Molecules	228
4.4.2	Cations	231
4.4.3	Anions	233
4.5	Metal Complexes of Binary Chalcogen-Nitrogen Ligands	235
4.5.1	Thionitrosyl and Selenonitrosyl Complexes	235
4.5.2	Cyclometallathiazenes	236
4.6	Chalcogen-Nitrogen Halides	237
4.6.1	Thiazyl Halides NSX ($\text{X} = \text{F}, \text{Cl}, \text{Br}$) and the $[\text{NSX}_2]^-$ Anions ($\text{X} = \text{F}, \text{Cl}$)	237
4.6.2	Thiazyl Trifluoride, NSF_3 , and Haloimino- sulfur Difluorides, XNSF_2 ($\text{X} = \text{F}, \text{Cl}$)	238
4.6.3	Acyclic Chalcogen-Nitrogen-Halogen Cations $[\text{N}(\text{ECl})_2]^+$ ($\text{E} = \text{S}, \text{Se}$) and $[\text{N}(\text{SeCl}_2)_2]^+$	238
4.6.4	Tellurium-Nitrogen-Chlorides $[\text{Te}_4\text{N}_2\text{Cl}_8]^{2+}$ and $\text{Te}_{11}\text{N}_6\text{Cl}_{26}$	239
4.6.5	Thiodithiazyl and Selenadiselenazyl Dichloride $[\text{E}_3\text{N}_2\text{Cl}]\text{Cl}$ ($\text{E} = \text{S}, \text{Se}$)	239
4.6.6	Cyclotrithiazyl Halides $(\text{NSX})_3$ ($\text{X} = \text{Cl}, \text{F}$)	240
4.6.7	Dihalocyclotetrathiazenes $\text{S}_4\text{N}_4\text{X}_2$ ($\text{X} = \text{Cl}, \text{F}$) and Cyclotetrathiazyl Fluoride $(\text{NSF})_4$	240
4.6.8	Sulfanuric Halides $[\text{NS}(\text{O})\text{X}]_2$ ($\text{X} = \text{Cl}, \text{F}$)	241
4.7	Chalcogen-Nitrogen Oxides	241
4.7.1	The Thionyl Imide Anion, $[\text{NSO}]^-$	241
4.7.2	The Thionitrite and Perthionitrite Anions, $[\text{SNO}]^-$ and $[\text{SSNO}]^-$	242
4.7.3	The $[\text{SO}_x\text{N}_3]^-$ ($x = 2, 3$) Anions	242
4.7.4	<i>Bis</i> (Sulfinylamino)Chalcogenanes $\text{E}(\text{NSO})_2$ ($\text{E} = \text{S}, \text{Se}, \text{Te}$)	242
4.7.5	Cyclic Chalcogen–Nitrogen Oxides	243
4.8	Acyclic Organic Chalcogen-Nitrogen Compounds	244
4.8.1	Chalcogenonitrosyls, RNE ($\text{E} = \text{S}, \text{Se}$)	244

4.8.2	Organic Chalcogenylamines RNEO (E = S, Se, Te)	244
4.8.3	N-Thiosulfinylamines, RNSS	245
4.8.4	Chalcogen Diimides RN=E=NR (E = S, Se, Te)	246
4.8.5	Imido Chalcogen Halides	248
4.8.6	Triimidochalcogenites, $[E(NR)_3]^{2-}$ (E = S, Se, Te), and Sulfur Triimides, $S(NR)_3$	249
4.8.7	Tetraimidodisulfate, $[S(N^tBu)_4]^{2-}$, and Methylenetrimidosulfate, $[H_2CS(N^tBu)_3]^{2-}$	250
4.8.8	Chalcogen Diamides $E_x(NR_2)_2$, (E = S, Se, Te; x = 1-4)	250
4.8.9	Organochalcogenyl Azides and Nitrenes	251
4.8.10	S-Nitrosothiols RSNO	252
4.8.11	Trisulfenamides, $(RS)_3N$, and the Radical $[(PhS)_2N]^{\bullet}$	252
4.9	Cyclic Chalcogen Imides	253
4.9.1	Cyclic Sulfur Imides	253
4.9.2	Cyclic Selenium and Tellurium Imides	254
4.10	Carbon-Nitrogen-Chalcogen Ring Systems	255
4.10.1	Five-Membered Rings	255
4.10.2	Six-Membered Rings	258
4.10.3	Seven-Membered Rings	260
4.10.4	Eight-Membered Rings	261
4.10.5	Bicyclic Ring Systems, RCN_5S_3	262
4.11	Chalcogen-Nitrogen-Phosphorus Ring Systems	263
4.11.1	Chalcogen-Nitrogen-Phosphorus(V) Rings	263
4.11.2	Chalcogen-Nitrogen Rings Containing Phosphorus(III) or Other p-Block Elements	267
4.12	Chains and Polymers	267
4.12.1	Poly(Sulfur Nitride), $(SN)_x$, and Related Polymers	267
4.12.2	Sulfur-Nitrogen Chains	269
4.12.3	Sulfur-Nitrogen Polymers Containing Three-Coordinate Sulfur(IV)	270
4.12.4	Sulfur-Nitrogen Polymers Containing Four-Coordinate Sulfur(VI)	270
4.13	Outlook	272
	References	272
Chapter 5	Chalcogen–Phosphorus (and Heavier Congeners) Chemistry	286
	<i>Rob Davies</i>	
5.1	Introduction	286
5.2	Preparation, Characterisation and Properties of Compounds Containing Phosphorus-Chalcogen Bonds	288

5.2.1	Phosphorus Chalcogenides $[P_nE_m]$ and Chalcogeno-Phosphate Anions $[P_nE_m]^{z-}$	288
5.2.2	Tertiary Phosphine Chalcogenides $[R_3PE]$	291
5.2.3	Diphosphine Di- and Mono-Chalcogenides $[R_2P(E)-R'-P(E)R_2]$ and $R_2P(E)-R'-PR_2]$	293
5.2.4	Secondary Phosphine Chalcogenides $[R_2P(E)H]$	295
5.2.5	Dichalcogenophosphinic Acids (R_2PE_2H) and their Derivatives	297
5.2.6	Trichalcogenophosphonic Acids (RPE_3H_2) and their Derivatives	300
5.2.7	Amido and Imido Derivatives of Chalcogeno- Phosphorus Acids	302
5.2.8	Dichalcogenoimido-diphosphinates $[R_2P(E)NP(E)R_2]$	307
5.2.9	Phosphorus-Chalcogen Containing Heterocycles	309
5.3	Coordination Chemistry of Ligands Containing Phosphorus-Chalcogen Bonds	312
5.3.1	Phosphorus Chalcogenides (P_nE_m) and Chalcogeno-Phosphate Anions $[P_nE_m]^{z-}$	312
5.3.2	Tertiary Phosphine Chalcogenides $(R_3P = E)$	314
5.3.3	Diphosphine Di- and Mono-Chalcogenides $[R_2P(E)-R'-P(E)R_2]$ and $R_2P(E)-R'-PR_2]$	315
5.3.4	Secondary Phosphine Chalcogenides (R_2PEH)	317
5.3.5	Dichalcogenophosphinic Acids (R_2PE_2H) and their Derivatives	318
5.3.6	Trichalcogenophosphonic Acids (RPE_3H_2) and their Derivatives	322
5.3.7	Amido and Imido Derivatives of Chalcogeno- Phosphorus Acids	323
5.3.8	Dichalcogenoimidodiphosphinates $[R_2P(E)NHP(E)R_2]$	326
5.4	Applications of Compounds and Complexes Containing Phosphorus-Chalcogen Bonds	327
5.4.1	Reactions with Organic Substrates	327
5.4.2	Pesticides and Nerve Agents	330
5.4.3	Precursors Towards Metal Chalcogenide Thin-Films and Quantum Dots	331
5.4.4	Metal Extraction Technologies	334
5.4.5	Lubricant Additives	334
5.4.6	Other Applications	335
	References	335

Chapter 6	Chalcogen–Oxygen Chemistry	344
	<i>Mathias S. Wickleder</i>	
6.1	Introduction	344
6.2	Binary Sulfur, Selenium, and Tellurium Oxides	344
6.3	Mixed Sulfur, Selenium, and Tellurium Oxides	350
6.4	Oxygen Acids of Sulfur, Selenium, and Tellurium	351
6.5	Selected Oxo-Chalcogenates	353
	6.5.1 Main Group Metals	355
	6.5.2 Transition Metals	359
	6.5.3 Lanthanides	364
	Acknowledgement	369
	References	369

COMPOUNDS CONTAINING THE CHALCOGEN–
CHALCOGEN E–E BOND (E = S, SE, TE)

Chapter 7.1	Structure and Bonding of the Neutral Chalcogens and their Polyatomic Cations	381
	<i>Ingo Krossing</i>	
7.1.1	Introduction	381
7.1.2	Standard Enthalpies of Formation of the Small Chalcogen Clusters E_n ($n = 1-8$)	382
7.1.3	Structure and Bonding	382
7.1.4	Brief Bonding Introduction	384
	7.1.4.1 General Remarks	384
	7.1.4.2 $np^2 \rightarrow n\sigma^*$ Interactions	384
	7.1.4.3 π and $\pi^*-\pi^*$ Bonding	385
7.1.5	Polyatomic Chalcogen Molecules or Molecular Cations	387
	7.1.5.1 Molecular E_4 Moieties	387
	7.1.5.2 Molecular E_5 Moieties	388
	7.1.5.3 Molecular E_6 Moieties	388
	7.1.5.4 Molecular E_7 Moieties	391
	7.1.5.5 Molecular E_8 Moieties	393
	7.1.5.6 Molecular E_9 Moieties	398
	7.1.5.7 Molecular E_{10} Moieties	398
	7.1.5.8 Molecular $E_{11}-E_{15}$ Moieties	399
	7.1.5.9 Molecular $E_{17}-E_{20}$ moieties	401
7.1.6	Polyatomic Chalcogen Polymers and Polymeric Tellurium Cations	403
	7.1.6.1 Fibrous ψ -S, grey Se and Te	403

7.1.6.2	Polymers that Contain Te ₄ Squares: Te ₄ ²⁺ , Te ₇ ²⁺ and Te ₁₀ ²⁺	405
7.1.6.3	A Polymer that Contains Te ₅ Homocycles: Te ₆ ²⁺	408
7.1.6.4	Polymers that Contain Te ₆ Homocycles: Te ₇ ²⁺ and Te ₈ ²⁺	408
7.1.7	Conclusion	411
	Acknowledgement	412
	References	412
Chapter 7.2	Organochalcogen Multication Species	417
	<i>Valentine G. Nenajdenko, Nikolay E. Shevchenko, Elizabeth S. Balenkova and Igor V. Alabugin</i>	
7.2.1	Introduction	417
7.2.2	S–S Dications	418
7.2.2.1	Discovery of Disulfonium Dications	418
7.2.2.2	Synthesis of Disulfonium Dications	419
7.2.2.3	Chemical Properties of Disulfonium Dications	428
7.2.3	Se–Se, Te–Te and Mixed Dications	435
7.2.4	Trichalcogen–Dications	438
7.2.5	1,4-Dication with Dichalcogen Fragment	441
7.2.6	Polyatomic Chalcogen Dications	443
	References	446
HALOGEN–CHALCOGEN X–E (X=F, Cl, Br, I; E=S, Se,Te) CHEMISTRY		
Chapter 8.1	Recent Developments in Binary Halogen–Chalcogen Compounds, Polyanions and Polycations	457
	<i>Zhengtao Xu</i>	
8.1.1	Introduction	457
8.1.2	Chalcogen Fluorides	458
8.1.3	Chalcogen Chlorides and Bromides	459
8.1.3.1	Selenium and Sulfur Dichlorides	459
8.1.3.2	Disulfur and Diselenium Dihalides	461
8.1.4	Chalcogen Iodides and Tellurium Subhalides	463
8.1.5	Halochalcogenate Anions	465
8.1.6	Halochalcogenate Polycations	469
	Acknowledgment	474
	References	474

<i>Contents</i>	xvii
Chapter 8.2 Charge-Transfer (C.-T.) Adducts and Related Compounds	477
<i>VitoLippolis and Francesco Isaia</i>	
8.2.1 Introduction	477
8.2.2 General Aspects of C.-T. Adducts between Chalcogen-Containing Molecules and Di- and Inter-Halogens	478
8.2.3 C.-T. "Spoke" Adducts	479
8.2.4 C.-T. "Extended Spoke" Adducts	485
8.2.5 Reactivity of C.-T. Adducts Towards Metal Powders	490
8.2.5.1 C.-T. Adducts as New Oxidising Reagents	490
8.2.5.2 Oxidation of Metals by C.-T. Adducts of Sulfur-Donors	491
8.2.5.3 Oxidation of Metals by C.-T. Adducts of Selenium-Donors	495
8.2.6 Conclusions	495

 METAL CHALCOGENIDES	
Chapter 9.1 Metal Chalcogenides: Clusters, Layers, Nanotubes	503
<i>Maxim N. Sokolov</i>	
9.1.1 Introduction	503
9.1.2 Metal Clusters, Chains, Layers	504
9.1.2.1 General Remarks	504
9.1.2.2 Isolated Clusters	505
9.1.2.3 Connected and Condensed Clusters	511
9.1.2.4 Metal Chains	517
9.1.2.5 Metal Layers	521
9.1.2.6 Three-Dimensional Metal Frameworks	522
9.1.3 Nanotubes	523
Acknowledgment	529
References	529
 Chapter 9.2 Polychalcogenides	 543
<i>William S. Sheldrick</i>	
9.2.1 Introduction	543
9.2.2 Polychalcogenide Anions	545
9.2.2.1 Synthesis and Speciation	545
9.2.2.2. Polysulfides	546

9.2.2.3. Polyselenides	548
9.2.2.4. Polytellurides	551
9.2.2.5. Thio- and Selenidotellurates	557
9.2.3 Complexes of Polychalcogenide	
Ligands	558
9.2.3.1. Synthesis	558
9.2.3.2. Terminal and Bridging Modes	560
9.2.3.3. Side-On and Chelating Modes	565
9.2.3.4. Polymeric Ligands	567
9.2.4. Note Added in Proof	568

MISCELLANEOUS ASPECTS

Chapter 10.1 Synthesis and Stereochemistry of Optically Active Chalcogen Compounds **577**

Toshio Shimizu and Nobumasa Kamigata

10.1.1 Introduction	577
10.1.2 Chalcogen-oxides	577
10.1.3 Chalcogen-onium Ylides	579
10.1.4 Chalcogen-onium Imides	580
10.1.5 Chalcogen-onium Salts	581
10.1.6 Chalcogenic Acids	582
10.1.7 Chalcogenate Esters	584
10.1.8 Chalcogeninamides	585
10.1.9 Chalcogen-oximines	586
10.1.10 Chalcogenuranes	586
10.1.11 Dichalcogenides	589
10.1.12 Conclusions	589
References	589

Chapter 10.2 1,1-Dithiolato Ligands and Related Selenium and Tellurium Compounds **593**

Ionel Haiduc

10.2.1 Introduction	593
10.2.2 Phosphor-1,1-dithiolates	593
10.2.2.1 Dithiophosphates (Dithiophosphoric Acid Diesters)	596
10.2.2.2 Dithiophosphoric Acid O-monoesters (RO)P(O)(SH) ₂	599
10.2.2.3 Dithiophosphinates	599
10.2.2.4 Dithiophosphonates (Dithiophosphonic Acid O-monothioesters)	604

10.2.3	Arsen-1,1-dithiolates	606
	10.2.3.1 Dithioarsenates	606
	10.2.3.2 Dithioarsinates	606
10.2.4	Xanthates (Dithiocarbonic Acid O-monoesters)	607
10.2.5	Dithiocarboxylates	611
10.2.6	Dithiocarbamates	613
10.2.7	Dithiocarbimates and Related Compounds	617
10.2.8	Silane-1,1-dithiolates and Tin Analogs	618
10.2.9	Phosphor-1,1-diselenolates	619
	10.2.9.1 Diselenophosphates	619
	10.2.9.2 Diselenophosphinates	621
	10.2.9.3 Diselenophosphonates	621
10.2.10	Arsen-1,1-diselenolates (Diselenoarsinates)	621
10.2.11	Tellurium Analogs	622
	References	622

Chapter 10.3 Hypervalent Chalcogen Compounds **644**

Waro Nakanishi

10.3.1	Introduction	644
10.3.2	Bond Distances in Hypervalent Region	645
10.3.3	Factors to Stabilize Hypervalent Bonds	646
10.3.4	Hypervalent Chalcogen Compounds	647
	10.3.4.1 10-E-3 (T-shaped)	647
	10.3.4.2 10-E-4	651
	10.3.4.3 10-E-5 and 12-E-5	653
	10.3.4.4 12-E-6	654
	10.3.4.5 Higher Coordinated Species	654
10.3.5	Weak Hypervalent Interactions	655
10.3.6	Extended Hypervalent Bonds; $mc-ne$ ($m \geq 4$)	657
	10.3.6.1 $3c-4e$ to $mc-ne$ ($m \geq 4$)	657
	10.3.6.2 $4c-6e$	658
	10.3.6.3 $5c-6e$	661
	10.3.6.4 Higher Extended Hypervalent Bonds	661
	References	662

BIOLOGICAL CHEMISTRY

Chapter 11.1 Chalcogens (S, Se, Te) in Microorganisms and Plants **671**

Thomas G. Chasteen and Ronald Bentley

11.1.1	Introduction	671
11.1.2	Sulfur	671
	11.1.2.1 General and Secondary Metabolism. Role of Chirality at Sulfur	671

11.1.2.2	Overview of Structural Types for Sulfur-Containing Secondary Metabolites	672
11.1.2.3	Sulfur-Containing Fungal Metabolites	674
11.1.2.4	Flavor Compounds Containing Sulfur	679
11.1.2.5	Aroma and Medicinal Roles of Sulfur-Containing Plant Metabolites	685
11.1.2.6	Role of Plants and Microorganisms in Production of VOSCs	692
11.1.2.7	Miscellaneous Sulfur Compounds	693
11.1.3	Selenium	695
11.1.3.1	General Biological Role of Selenium	695
11.1.3.2	Se-Containing Amino Acids	697
11.1.3.3	Selenocysteine Containing Se-Proteins	698
11.1.3.4	Manipulation of Bacterial Genes Involving Se Resistance	699
11.1.3.5	Oxidation/Reduction Processes Involving Selenium	700
11.1.3.6	Analytical Methods for Elemental Se and Organo-Selenium	700
11.1.4	Tellurium	702
11.1.4.1	General Biological Role of Tellurium	702
11.1.4.2	Manipulation of Bacterial Genes Involving Te Resistance	703
11.1.4.3	Oxidation/Reduction Processes	703
11.1.4.4	Analytical Methods for Elemental Te and Organo-Tellurium	704
11.1.5	Summary	705

MATERIAL CHEMISTRY

Chapter 12.1 Stable Chalcogen Radicals **733**

Jeremy M. Rawson and Antonio Alberola

12.1.1	Introduction	733
12.1.2	Five-Membered C/N/S and C/N/Se Rings	734
12.1.2.1	1,2,3,5-Dithiadiazolyl Radicals	737
12.1.2.2	1,3,2,4-Dithiadiazolyl Radicals	743
12.1.2.3	1,3,2-Dithiazolyl Radicals	744
12.1.2.4	1,2,3-Dithiazolyl Radicals	753
12.1.2.5	1,2,3-Trithiolium Radicals	755
12.1.2.6	1,2,3,4-Trithiazolylum Cations	757
12.1.3	Conclusions	758
	References	758

Chapter 12.2 Chalcogen-Rich Compounds as Electron Donors **763**

Thomas D. Westgate and Peter J. Skabara

12.2.1	Introduction	763
12.2.2	Structural Diversity	766
12.2.2.1	Molecular	766
12.2.2.2	Macromolecular	768
12.2.2.3	Polymeric	771
12.2.3	The Role of the Chalcogen	773
12.2.3.1	Heterocyclic Structure	774
12.2.3.2	Chemical Sensors: A Case Study of Chalcogen-Metal Bonding in Electroactive Materials	779
12.2.3.3	Use of the Chalcogens Heavier than S	784
	References	790

Chapter 12.3 1,2-Dithiolene Ligands and Related Selenium and Tellurium Compounds **797**

Massimiliano Arca and M. Carla Aragoni

12.3.1	Introduction	799
12.3.2	Nomenclature	802

12.3.3	Synthesis	803
12.3.3.1	Synthesis of 1,2-Dichalcogenolene Ligands or Precursors	803
12.3.3.2	Synthesis of 1,2-Dichalcogenolene Complexes	806
12.3.4	General Structural Features of 1,2-Dichalcogen- olene Complexes	809
12.3.5	Applications and Properties of 1,2-Dichalcogen- olene Complexes	810
12.3.5.1	Electrical Properties	811
12.3.5.2	Magnetic Properties	812
12.3.5.3	Optical Properties	813
12.3.6	Conclusions	816
	Acknowledgements	817
	References	817

SUPRAMOLECULAR CHEMISTRY

Chapter 13 Chalcogen-Halogen Secondary Bonds in Self-Assembling of Supramolecular Structures **833**

	<i>Wolf-Walther du Mont and Cristian George Hrib</i>	
13.1	General Aspects of Supramolecular Chemistry with Soft-Soft Interactions	833
13.2	Supramolecular Aspects of Structures from Classes of Compounds discussed in Previous Chapters	834
13.2.1	Binary Chalcogen Halides	834
13.2.2	Di- and Multichalcogen Cationic Species	835
13.2.3	Chalcogens as Donor Atoms in Molecular Adducts	837
13.3	Supramolecular Aspects of Structures from Lowvalent and Divalent Chalcogen-Halogen Compounds	846
13.3.1	Association of Sulfenyl, Selenenyl and Tellurenyl Halides	846
13.3.2	Oxidative Halogen Addition to Chalcogen- ocarbonyl Functions $R_2C=Y$ and to Phosphine Selenides $R_3P=Se$	850
13.3.3	Complexes of Chalcogen Donors with Organotellurium Electrophiles	854
13.3.4	Intermolecular Interactions in Tellurium(II) Halide Complexes with S or Se Donors	856
13.4	Supramolecular Aspects of Structures from Tetravalent Chalcogen-Halogen Compounds	859

<i>Contents</i>	xxiii
13.4.1 Cation-Anion Interactions Involving Selenonium and Telluronium Salts	859
13.4.2 Some new Supramolecular Aspects of Diorganylselenium and -tellurium Dihalide Structures	860
13.4.3 The Role of Cations for Aryltetrahalogenotellurate(IV) Structures	862
13.5 Base Pair-Like Chalcogen-Halogen Arrays	865
13.5.1 Intermolecular Donor-Acceptor Interactions in Solid Iodophosphine Selenides	865
13.6 Conclusion	867
References	867
Subject Index	873
