

Contents

Chapter 1	Introduction	1
	<i>R.M. Harrison</i>	
1.1	The Environmental Sciences	1
1.2	Environmental Chemical Processes	3
1.3	Environmental Chemicals	3
1.4	Units of Concentration	5
	1.4.1 Atmospheric Chemistry	5
	1.4.2 Soils and Waters	6
1.5	The Environment as a Whole	7
	References	7
Chapter 2	Chemistry of the Atmosphere	8
	<i>P.S. Monks</i>	
2.1	Introduction	8
2.2	Sources of Trace Gases in the Atmosphere	10
2.3	Initiation of Photochemistry by Light	11
2.4	Tropospheric Chemistry	17
2.5	Tropospheric Oxidation Chemistry	20
	2.5.1 Nitrogen Oxides and the Photostationary State	26
	2.5.2 Production and Destruction of Ozone	28
	2.5.3 Role of Hydrocarbons	35
	2.5.4 Urban Chemistry	37
2.6	Night-Time Oxidation Chemistry	40
2.7	Ozone-Alkene Chemistry	46
2.8	Sulfur Chemistry	46
2.9	Halogen Chemistry	51
	2.9.1 Tropospheric Halogens and Catalytic Destruction of Ozone	56

2.10	Stratospheric Chemistry	58
2.10.1	The Antarctic Ozone Hole	63
2.11	Summary	72
	Questions	72
	References	76
Chapter 3	Chemistry of Freshwaters	80
	<i>M.C. Graham and J.G. Farmer</i>	
3.1	Introduction	80
3.2	Fundamentals of Aquatic Chemistry	82
3.2.1	Introduction	82
3.2.2	Dissolution/Precipitation Reactions	91
3.2.3	Complexation Reactions in Freshwaters	94
3.2.4	Species Distribution in Freshwaters	97
3.2.5	Modelling Aquatic Systems	121
3.3	Case Studies	122
3.3.1	Acidification	122
3.3.2	Metals and Metalloids in Water	130
3.3.3	Historical Pollution Records and Perturbatory Processes in Lakes	139
3.3.4	Nutrients in Water and Sediments	145
3.3.5	Organic Matter and Organic Chemicals in Water	150
	Questions and Problems	157
	Further Reading	159
	References	159
Chapter 4	Chemistry of the Oceans	170
	<i>S.J. de Mora</i>	
4.1	Introduction	170
4.1.1	The Ocean as a Biogeochemical Environment	170
4.1.2	Properties of Water and Seawater	173
4.1.3	Salinity Concepts	177
4.1.4	Oceanic Circulation	179
4.2	Seawater Composition and Chemistry	182
4.2.1	Major Constituents	182
4.2.2	Dissolved Gases	184
4.2.3	Nutrients	199
4.2.4	Trace Elements	201
4.2.5	Physico-Chemical Speciation	204
4.3	Suspended Particles and Marine Sediments	210

4.3.1	Description of Sediments and Sedimentary Components	210
4.3.2	Surface Chemistry of Particles	213
4.3.3	Diagenesis	218
4.4	Physical and Chemical Processes in Estuaries	219
4.5	Marine Contamination and Pollution	223
4.5.1	Oil Slicks	223
4.5.2	Plastic Debris	226
4.5.3	Tributyltin	228
	Questions	230
	References	231
Chapter 5	The Chemistry of the Solid Earth	234
	<i>I.D. Pulford</i>	
5.1	Introduction	234
5.2	Mineral Components of Soil	238
5.2.1	Inputs	238
5.2.2	Primary Minerals	238
5.2.3	Secondary Minerals	240
5.2.4	Weathering Processes (See also Chapter 3)	246
5.3	Organic Components of Soil	248
5.4	Soil pH And Redox Potential	254
5.4.1	pH and Buffering	254
5.4.2	Soil Acidity	255
5.4.3	Soil Alkalinity	257
5.4.4	Influence of pH on Soils	258
5.4.5	Redox Potential	260
5.4.6	Reduction Processes in Soil	261
5.5	Chemical Reactions in Soil	263
5.5.1	Reactions in Soil Solution	263
5.5.2	Ion Exchange (Physisorption)	267
5.5.3	Ligand Exchange (Chemisorption)	271
5.5.4	Complexation/Chelation	273
5.5.5	Precipitation/Dissolution	273
5.5.6	Soil Processes	275
	Questions	275
	References	278
Chapter 6	Environmental Organic Chemistry	279
	<i>C.J. Halsall</i>	
6.1	Introduction	279

6.2	The Diversity of Organic Compounds	280
6.2.1	Identifying Sources of Hydrocarbons	282
6.3	The Fate of Organic Contaminants	284
6.4	Chemical Partitioning	284
6.4.1	Important Partitioning Coefficients	286
6.4.2	Temperature Dependence	292
6.4.3	Partition Maps	295
6.5	Chemical Transformation and Degradation	299
6.6	Chemical Transformation through Photochemistry	301
6.6.1	Light Absorption and the Beer-Lambert Law	302
6.6.2	Photolysis in Aqueous Systems	303
6.6.3	Photochemistry of Brominated Flame Retardants (BFRs)	305
6.7	Conclusions	309
6.8	Questions	310
	References	310
Chapter 7	Biogeochemical Cycling of Chemicals	314
	<i>R.M. Harrison</i>	
7.1	Introduction: Biogeochemical Cycling	314
7.1.1	Environmental Reservoirs	316
7.1.2	Lifetimes	317
7.2	Rates of Transfer between Environmental Compartments	321
7.2.1	Air–Land Exchange	321
7.2.2	Air–Sea Exchange	324
7.3	Transfer in Aquatic Systems	330
7.4	Biogeochemical Cycles	333
7.4.1	Case Study 1: The Biogeochemical Cycle of Nitrogen	335
7.4.2	Case Study 2: Aspects of Biogeochemical Cycle of Lead	335
7.5	Behaviour of Long-Lived Organic Chemicals in the Environment	340
	Questions	344
	References	345
	Glossary	347
	Subject Index	354
