<i>Chapter 1</i>	
Introduction – Problems in Flavour Research	1
Definition of Flavour	1
Classification of Food Flavours	2
Chemical Compounds Responsible for Flavour	8
Difficulties of Flavour Chemistry Research	8
Objectives of Flavour Chemistry Research	12
References	14
<i>Chapter 2</i>	
Flavour Compounds	15
Chemical Compound Classes and their Flavour Responses	15
Flavour Development during Biogenesis	25
Flavour Development during Food Processing	42
The Use of Biotechnology to Develop Flavours	51
Conclusion	54
References	55
<i>Chapter 3</i>	
The Chemical Senses	56
Introduction	56
Anatomy of the Chemical Senses	57
Neural Development of the Chemical Senses	70
Receptor Mechanisms	73
Neural Coding	81
The Control of Eating	90
References	97

Chapter 4

Flavour Analysis	99
Subjective versus Objective	99
Psychophysics and Sensory Evaluation	99
Instrumental Analysis	109
Sample Handling and Artefacts	115
Data Handling	120
References	123

Chapter 5

Teaching Flavour Concepts	125
Problem Based Learning	125
Tongue and Nose	126
Onion	129
Beverage	134
Maillard Reaction	140
Thio-stench	144
References	146
Bibliography	147
Glossary	151
Subject Index	158
