

Contents

<i>Chapter 1</i>	
Introduction to Adhesion and Adhesives	1
Basic Properties	2
Basic Chemistry	3
Theories of Adhesion	4
Polymerization	11
Glass Transition Temperature	14
Viscoelastic Properties	16
<i>Chapter 2</i>	
Surface Treatment for Adhesion, and for Abhesion	18
Abrasive Methods	19
Use of Solvents	19
Flame and Corona-discharge	19
Etching of PTFE	19
Etching of Metals	20
Anodizing of Metals	22
Wood	23
Glass	24
Concrete	24
Composites	24
Non-stick (Abhesion)	24
<i>Chapter 3</i>	
Primers and Coupling Agents	26
Primers	26
Silane Coupling Agents	28

Titanates and Zirconates	36
Coupling Agents for Wood	38
<i>Chapter 4</i>	
Chemistry of Adhesives which Harden by Chemical Reaction	40
Epoxide Adhesives	40
Phenolic Adhesives for Metals	43
Formaldehyde Condensate Adhesives for Wood	44
Acrylic Adhesives	45
Anaerobic Adhesives	47
Cyanoacrylates	47
Rubber Toughening of Structural Adhesives	48
Silicones	49
Polyurethanes	50
Polysulfides	51
High-temperature Adhesives	52
<i>Chapter 5</i>	
Chemistry of Adhesives which Harden without Chemical Reaction	54
Adhesives which Harden by Loss of Solvent	55
Adhesives which Harden by Loss of Water	58
Adhesives which Harden by Cooling	64
<i>Chapter 6</i>	
Pressure-sensitive Adhesives	71
<i>Chapter 7</i>	
Surface Analysis	73
X-Ray Photoelectron Spectroscopy	73
Secondary-ion Mass Spectrometry	82
Surface Infrared Spectroscopy	89
Scanning Probe Microscopy	94
<i>Chapter 8</i>	
Contact Angles in the Study of Adhesion	98
Surface Tensions of Liquids	99
The Liquid-Liquid Interface	99
The Solid-Liquid Interface	102
Thermodynamic Predictions of Joint Stability	109
Practical Applications	113

Chapter 9

Strength of Adhesive Joints

114

Single Lap Joints

114

Peel Testing

120

Boeing Wedge Test

122

Tack

122

Reporting the Results

125

Chapter 10

Adhesive Joints and the Environment

126

Antioxidants

126

UV-stabilizers

128

Water and Adhesives

129

Water and Joints

134

Recommended Reading
