

Clean Energy

RSC Clean Technology Monographs

Series Editor: J.H. Clark, *University of York, UK*

Advisory Panel: N.M. Edinberry (*Sandwich, UK*), J. Emsley (*London, UK*), S.M. Hassur (*Washington DC, USA*), D.R. Kelly (*Cardiff, UK*), T. Laird (*Mayfield, UK*), T. Papenfuhs (*Frankfurt, Germany*), B. Pearson (*Wigan, UK*), J. Winfield (*Glasgow, UK*)

The chemical process industries are under increasing pressure to develop environmentally friendly products and processes, with the key being a reduction in waste. This series introduces different clean technology concepts to academics and industrialists, presenting current research and addressing problem-solving issues.

Other titles in this series:

Feedstock Recycling of Plastic Wastes

by J. Aguado, *Rey Juan Carlos University, Móstoles, Spain* and D.P. Serrano, *Complutense University of Madrid, Spain*

Applications of Hydrogen Peroxide and Derivatives

by C.W. Jones, *formerly of Solvay Interlox R & D, Widnes, UK*

Clean Synthesis Using Porous Inorganic Solid Catalysts and Supported Reagents

by J.H. Clark and C.N. Rhodes, *Clean Technology Centre, Department of Chemistry, University of York, UK*

The Sulfur Problem: Cleaning Up Industrial Feedstocks

by D. Stirling, *Chemistry Department, University of Glasgow*

How to obtain future titles on publication

A standing order plan is available for this series. A standing order will bring delivery of each new volume upon publication. For further information please contact:

Clean Energy

Ronald M. Dell

*Formerly Head of Applied Electrochemistry,
Atomic Energy Research Establishment, Harwell, UK*

David A. J. Rand

CSIRO Energy Technology, Clayton South, Victoria, Australia

RS•C

advancing the chemical sciences

The cover illustration is of an experimental solar–thermal dish developed by CSIRO, Australia for the steam reforming of natural gas to hydrogen for use in fuel cells.

ISBN 0-85404-546-5
