

Contents

<i>Chapter 1</i>	
Introduction	1
<i>P. J. Haines</i>	
Materials, Heat and Changes	1
Definitions of Thermal and Calorimetric Methods	3
The Family of Thermal Methods	4
Instrumentation for Thermal Analysis and Calorimetry	4
The Reasons for Using Thermal and Calorimetric Methods	6
The Need for Proper Practice	6
Further Reading	8
References	8
<i>Chapter 2</i>	
Thermogravimetry and Derivative Thermogravimetry	10
<i>G. R. Heal</i>	
Introduction and Definitions	10
Instrumentation	12
Balance	12
Furnace	14
Atmosphere Control	15
Crucibles	15
Thermocouples	16
Temperature Control	16
Data Collection	17
Isothermal Experiments	18
Calibration for Mass and Temperature	19
Effect of Experimental Variables	20
Reporting Thermogravimetry Results	24
A. Properties of the Sample	24
B. Experimental Conditions	24

C. Data Acquisition and Manipulation Methods	24
D. Results	25
A Typical Thermogravimetric Experiment	26
Preliminary Steps	26
Crucible Treatment	26
Zero Setting	27
Adding the Sample	28
Starting the Run	28
Ending the Run	28
Example Experiment	29
Results	29
Applications	31
Oxysalt Decomposition	31
Polymer Stability and Charcoal Production	33
Metal Oxidation	37
Compositional Analysis	38
Glass-making Reactions	40
Kinetics of Solid-state Reactions	42
Ancillary Techniques	50
Residue Analysis	50
Other Temperature Regimes	51
High Resolution Thermogravimetry	51
Further Reading	52
References	53
<i>Chapter 3</i>	
Differential Thermal Analysis and Differential Scanning Calorimetry	55
<i>P. G. Laye</i>	
Introduction	55
Definitions and Nomenclature	57
Applications	60
Theoretical Considerations	65
Instrumentation	69
Specification	69
Temperature Sensors	69
Crucibles	70
Temperature and Atmosphere Control	70
Cooling Systems and Accessories	71
Calvet-type Equipment	71
Experimental Considerations	72
Variables	72

<i>Contents</i>	ix
Do's and Do not's	73
Reference	75
Calibration	76
Preliminaries	76
Temperature Calibration	77
Energy Calibration	79
Measurements	82
Measurement of Heat Capacity	82
Measurement of Energy	85
Measurement of Purity	87
Kinetics	89
Final Thoughts on Measurement	91
Further Reading	91
References	92
<i>Chapter 4</i>	
Thermomechanical, Dynamic Mechanical and Dielectric Methods	94
<i>D. M. Price</i>	
Introduction and Principles	94
Thermomechanical Analysis and Thermodilatometry	94
Dynamic Mechanical Analysis	96
Dielectric Techniques	99
Instrumentation	101
Thermomechanical Analysis	101
Dynamic Mechanical Analysis	103
Dielectric Techniques	105
Typical Experiments	106
Thermomechanical Analysis	107
Dynamic Mechanical Analysis	109
Dielectric Techniques	113
Applications	117
Thermomechanical Analysis	117
Dynamic Mechanical Analysis	120
Dielectric Thermal Analysis	123
Modulated Temperature Thermomechanical and Dielectric Techniques	126
Concluding Remarks	126
Acknowledgements	127
Further Reading	127
References	127

<i>Chapter 5</i>	
Calorimetry	129
<i>R. J. Willson</i>	
Introduction	129
Definition of Calorimetry	130
Thermochemistry and Thermodynamics	131
The First law of Thermodynamics	132
The Second Law of Thermodynamics	133
The Third Law of Thermodynamics	133
Calorimeters	136
Classification of Calorimeters	137
Calibration	138
Instrumentation: Calorimeters for Special Purposes	139
Solution Calorimeters	139
Combustion Calorimeters	141
Reaction Hazard Calorimeters	144
Isothermal Calorimeters	145
Applications of Isothermal Calorimetry	146
Calorimetric Information	148
The Calorimetric Signal	148
Reaction Mechanism	150
Kinetic Information	152
Examples of Calorimetric Applications	153
Chemical Reactions	153
Physical Changes	156
Summary	160
Acknowledgements	161
References	161
<i>Chapter 6</i>	
Simultaneous Thermal Analysis Techniques	166
<i>S. B. Warrington</i>	
Introduction: The Rationale behind the Simultaneous Approach	166
Simultaneous Thermogravimetry–Differential Thermal Analysis (TG-DTA)	167
Instrumentation	167
Applications of TG-DTA	170
Simultaneous Thermogravimetry–Differential Scanning Calorimetry (TG-DSC)	172
Instrumentation	172

Applications of TG-DSC	173
Evolved Gas Analysis (EGA)	174
Introduction	174
Instrumentation for EGA	175
Applications of EGA	177
Less Common Techniques	181
Optical Techniques	181
Spectroscopic Techniques	183
X-Ray Techniques	183
DTA-Rheometry	185
Micro-thermal Analysis (μ -TA)	185
Summary	187
References	187
Appendices	190
1.A Symbols for Physical Quantities and Units	190
Nomenclature for Thermal Analysis and Calorimetry	191
1.B Sources of Information	191
1.B.1 Journals	191
1.B.2 Major Textbooks on Thermal Analysis and Calorimetry	192
1.B.3 Videos, CD-Roms <i>etc.</i>	197
1.B.4 Conference Proceedings	197
2 ICTAC and Its Affiliated Societies in Europe and the USA	199
3 American and Other Standard Test Methods	200
3.1 American Society for Testing and Materials (ASTM) Methods	201
3.2 British Standards	205
4 Manufacturers, Consultants and Other Suppliers	207
5 Consultancies and Other Groups	214
Subject Index	216
