

# Contents

<b>Chapter 1</b>	<b>Polymer Chemistry</b>	<b>1</b>
1.1	Basic Concepts	1
1.2	The History of the Concept of the Macromolecule	2
1.3	Classification of Polymers	4
1.4	Structure and Properties of Polymers	5
1.4.1	Poly(ethylene)	6
1.4.2	Poly(propylene)	7
1.4.3	Poly(methyl methacrylate)	8
1.4.4	Poly(styrene)	9
1.4.5	Poly(vinyl chloride), PVC	10
1.4.6	The Nylons	11
1.4.7	Epoxy Resins	12
1.4.8	Phenol-Formaldehyde Polymers	13
1.4.9	Amino Resins	14
1.4.10	Poly(tetrafluoroethylene), PTFE	15
1.4.11	Polyurethanes	16
1.4.12	Poly(ether ether ketone)	17
1.4.13	Silicones	17
1.4.14	Naturally Occurring Polymers	18
1.4.15	Cellulose	18
1.4.16	Starch	19
1.4.17	Natural Rubber	19
1.4.18	Proteins	20
1.4.19	Poly(3-hydroxybutyrate)	21
<b>Chapter 2</b>	<b>Polymerisation Reactions</b>	<b>23</b>
2.1	Chain Polymerisation	23
2.1.1	Initiation	24
2.1.2	Propagation	25
2.1.3	Termination	25
2.1.4	Other Reactions	26
2.2	Arrangement of Monomer Units	27
2.3	Kinetics of Chain Polymerisation	27

<i>Contents</i>		ix
2.4	Autoacceleration	29
2.5	Practical Methods of Chain Polymerisation	30
2.5.1	Bulk Polymerisation	30
2.5.2	Solution Polymerisation	31
2.5.3	Suspension Polymerisation	31
2.5.4	Emulsion Polymerisation	32
2.5.5	The Loop Process	33
2.6	Other Chain Polymerisation Mechanisms	33
2.7	Step Polymerisation	35
2.8	Step polymerisation with Polyfunctional monomers	36
2.9	Copolymerisation	37
<b>Chapter 3</b>	<b>Polymer Structure</b>	<b>40</b>
3.1	Polymer Stereochemistry	40
3.2	Polymer Crystallinity	41
3.2.1	Orientation and Crystallisation	44
3.2.2	The Crystalline Melting Point	44
3.2.3	Polyblends	45
3.3	Thermal and Mechanical Properties	45
3.3.1	The Glass Transition Temperature, $T_g$	46
3.3.2	The Effect of Plasticisers	48
3.3.3	Methods of Determining Glass Transition Temperature	49
3.3.4	The Effect of Polymer Stereochemistry on $T_g$	51
3.3.5	The Relationship between Crystalline Melting Point and $T_g$	52
3.3.6	Other Thermal Transitions	53
<b>Chapter 4</b>	<b>Crosslinking</b>	<b>54</b>
4.1	Introduction	54
4.2	Phenol–Formaldehyde Resins	56
4.3	Unsaturated Polyester Resins	59
4.4	Polyurethanes	61
4.5	Epoxy Resins	63
<b>Chapter 5</b>	<b>Polymer Solutions</b>	<b>66</b>
5.1	Introduction	66
5.2	Dissolution of Polymers	66
5.3	Solubility Parameters	67
5.4	Simple Liquid Mixtures and Raoult's Law	69
5.5	Entropy of Mixing	69
5.6	Real Molecules in Dilute Solution	72

5.7	Shapes of Polymer Molecules in Solution	73
5.8	Reptation Model of Molecular Motion	74
5.9	Water-Soluble Polymers	75
5.10	Uses of High-Viscosity Polymer Solutions	77
5.11	Polymer Melts	78
<b>Chapter 6</b>	<b>Methods of Determining Relative Molar Mass</b>	<b>80</b>
6.1	Introduction	80
6.2	Molar Masses from Colligative Properties	81
6.2.1	Vapour Phase Osmometry	83
6.3	Light Scattering	84
6.3.1	Experimental Determination	87
6.4	Viscosity Methods of Determining Relative Molar Mass	88
6.5	End Group Analysis	90
6.6	Gel Permeation Chromatography	91
<b>Chapter 7</b>	<b>Mechanical Properties of Polymers</b>	<b>95</b>
7.1	Introduction	95
7.2	Stress, Strain, and Young's Modulus	95
7.3	Brittle and Tough Fracture	96
7.4	Types of Strength	98
7.5	The Influence of Surfaces	100
7.6	Viscoelasticity	102
7.7	Creep and Stress Relaxation	104
7.8	Cold Drawing	106
7.9	Dynamic Tests	107
7.10	Time/Temperature Relationship	109
7.11	Rubberlike Elasticity	110
7.12	Reinforced Polymers	113
7.13	Practical Measurements of Mechanical Properties	115
7.14	Further Reading	116
<b>Chapter 8</b>	<b>Polymer Degradation</b>	<b>117</b>
8.1	Introduction	117
8.2	Behaviour of Polymers In Fires	117
8.2.1	The Behaviour of Individual Polymers	118
8.3	Assessment of Combustion Behaviour	119
8.4	Improvement of Stability of Polymers in Fires	120
8.5	Weathering of Polymers	121
8.6	Protection of Polymers from Photo-oxidation	123
8.7	Biological Degradation of Polymers	125
8.8	Exploitation of Polymer Degradation	126

<i>Contents</i>	xi
<b>Chapter 9 Dendrimers</b>	<b>130</b>
9.1 Introduction	130
9.2 Organic Dendrimers	133
9.3 Supramolecular Dendrimers	135
9.4 Shapes and Conformations of Dendrimers	136
9.5 Dendrimer Micelles	137
9.6 Characterization of Dendrimers	138
9.6.1 Mass Spectroscopy	138
9.6.2 Gel Permeation Chromatography	139
9.6.3 High-Performance Liquid Chromatography	139
9.6.4 NMR Spectroscopy	140
9.6.5 X-Ray Diffraction	140
9.6.6 Titration	140
9.6.7 Small Angle Neutron Scattering	141
9.6.8 Atomic Force Microscopy	142
9.7 Applications of Dendrimers	142
9.8 Megamers	144
Further Reading	145
<b>Chapter 10 Special Topics in Polymer Chemistry</b>	<b>146</b>
10.1 Introduction	146
10.2 Polymers in Medicine	146
10.3 Ionomers	149
10.4 Electronically Conducting Polymers	150
10.5 Interpenetrating Polymer Networks	153
10.6 Inorganic Polymers	154
10.7 Polymer Liquid Crystals	156
10.8 Polymers for Food Packaging	158
<b>Chapter 11 Polymers and the Environment</b>	<b>161</b>
11.1 Introduction	161
11.2 Pollution by Polymers	161
11.3 The Nature of the Problem	164
11.4 Polymers and Energy	165
11.5 Recycling of Polymers	166
11.6 Degradable Polymers	167
11.7 The Future	169
Further Reading	169
<b>Bibliography</b>	<b>170</b>
<b>Subject Index</b>	<b>172</b>
