## Rapid Methods in Water Microbiology

Suitability of Microbial Assays for Potable Water and Wastewater Applied to Land <i>C.W. Keevil</i>	3
Solid Phase Cytometry for Rapid Detection of Total Coliform and <i>E. coli</i> , Including O157:H7, in Water and Food <i>B.H. Pyle, G.A. McFeters, S.O. Van Poucke and H.J. Nelis</i>	27
Rapid Same-Day Microcolony Enumeration Technique for <i>E. coli</i> in Drinking Water <i>D.P. Sartory, A. Parton and C. Rackstraw</i>	31
Immunomagnetisable Separation for the Recovery of <i>Cryptosporidium</i> sp. Oocysts <i>C.A. Paton, D.E. Kelsey, E.A. Reeve, K. Punter, J.H. Crabb and H.V. Smith</i>	38
Use of a Combined IMS/Laser Scanning Procedure for the Separation and Subsequent Detection of <i>Cryptosporidium</i> Oocysts from Water Concentrates <i>D.T. Reynolds, R.B. Slade and C.R. Fricker</i>	44
Polymerase Chain Reaction for the Detection of Parasites and Viruses <i>C.P. Gerba, K.A. Reynolds, S.E. Dowd and I.L. Pepper</i>	49
A Rapid Detection Method and Infectivity Assay for Water-borne <i>Cryptosporidium</i> Using PCR and <i>In vitro</i> Cell Culture <i>R. De Leon, P.A. Rochelle, H. Baribeau, M.H. Stewart and R.L. Wolfe</i>	55
Molecular Techniques for the Detection of Bacterial Pathogens in Drinking Water <i>N. Lightfoot, M. Pearce, B. Place, and C. Salgado</i>	59
Application of PCR for the Detection of Viable Pathogenic Bacteria from Water Samples <i>K. Delabre, M.-R. de Roubin, V. Lahoussine, P. Cervantes and J.-C. Joret</i>	66

**Rapid Methods in Water Chemistry**

Rapid Chemical Assays Based on Test Kits <i>M.D. Buck</i>	73
A Contribution to Convenience for Enzyme-based Assays of Pesticides in Water <i>A.L. Hart and W.A. Collier</i>	80
Water Quality Control in the Netherlands: Selection and Evaluation of Indicative Methods <i>E.P. Meulenber</i>	84
Analytical Microsystems – An Overview <i>D.H. Craston and S. Cowen</i>	93
Rapid Detection of Changes in Fluid Composition Using On-line Impedance Spectroscopy <i>M.E.H. Amrani, R.M. Dowdeswell and P.A. Payne</i>	101
The Electrochemical Detection of Pentachlorophenol (PCP) Using the Inhibition of Lactate Dehydrogenase (LDH) as a Model System <i>S.J.Young, A.A. Dowman, J. Hart and D.C. Cowell</i>	105
Microbiotests for Rapid and Cost-effective Hazard Assessment of Industrial Products, Effluents, Wastes, Waste Leachates and Groundwaters <i>G. Persoone</i>	109
Use of <i>Lux</i> Bacterial Biosensors for Rapid Toxicity Detection and Protection of Sewage Treatment Processes <i>K. Killham, A.M. Horsburgh, D.P. Mardlin, I. Caffoor, L.A. Glover and M.S. Cresser</i>	116
Rapid Detection of Residual Cleaning Agents and Disinfectants in Food Factories <i>J. Lappalainen, S. Loikkanen, M. Havana, M. Karp, A.-M. Sjöberg and G. Wirtanen</i>	121

**Rapid Methods in Food Microbiology**

Food Sample Preparation and Enrichment for Rapid Detection <i>A.N. Sharpe</i>	129
The Separation of Food Pathogens Using Chromatographic Techniques <i>T.N. Whitmore and P.D. Gray</i>	138

<i>Contents</i>	ix
The Accreditation of Microbiological Test Methods <i>R. Betts</i>	142
The Use of a Minimal Number of Vapour Sensors for the Assessment of Food Quality <i>B.P.J. de Lacy Costello, R.J. Ewen, H.E. Gunson, N.M. Ratcliffe and P.T.N. Spencer-Phillips</i>	148
Rapid Detection of Enterobacteriaceae in Dehydrated Foods Using Impedance Microbiology: Critical Role of the Pre-enrichment Phase <i>A. Pridmore and P. Silley</i>	152
Immunoassays for Rapid Detection of Foodborne Pathogens and Toxins: A Review <i>P.C. Vasavada</i>	157
Use of Bacteriophage for Rapid Detection of Microorganisms <i>R.J. Mole</i>	166
Rapid Methods for Enumerating the Heterotrophic Bacteria in Bottled Natural Mineral Water <i>M. Fitzgerald, M. Kerr and J.J. Sheridan</i>	170
Development of Methods to Detect Foodborne Viruses <i>A.S. Kurdziel, N. Wilkinson, S.H. Gordon and N. Cook</i>	175
CEN Validation of Rapid Alternative Microbiological Methods (MICROVAL) <i>R. Holbrook</i>	178
<b>Rapid Methods in Food Chemistry</b>	
Biosensors for Pesticide Residues in the Environment and in Food <i>P.M. Krämer</i>	183
Development of Disposable Immunosensors for the Rapid Assay of Seafood Toxins <i>L. Micheli, D. Moscone, S. Marini, S. Di Stefano and G. Palleschi</i>	190
Selective Electrochemical Biosensors for Application in Food Quality Control <i>G. Palleschi, D. Compagnone and D. Moscone</i>	194

Flow-through Enzyme Immunoassay Kits for the Rapid Detection of the Mycotoxins Ochratoxin A, T-2 Toxin and Aflatoxin M <sub>1</sub> in Food and Feed <i>S. De Saeger, L. Sibanda and C. Van Peteghem</i>	202
Evaluation of Novel <i>In vitro</i> Assays for the Detection of Botulinum Toxins in Foods <i>M. Wictome, K. Newton, K. Jameson, P. Dunnigan, S. Clarke, S. Wright, J. Gaze, A. Tauk, K.A. Foster and C.C. Shone</i>	206
DNA Based Methods for Meat Authentication <i>R.G. Bardsley and A.K. Lockley</i>	210
The Application of DNA Based Techniques for the Determination of Food Authenticity <i>J. Sawyer, D. Hunt, N. Harris, S. Gout, C. Wood, H. Gregory, D. McDowell, R. Barallon and H. Parkes</i>	220
Testing for Genetically Modified Components in Foods – Present and Future Challenges <i>A.B. Hanley, H. Hird and M.L. Johnson</i>	225
Toxicological End-points – The Zero Rabbit Option <i>E.J. Hughson, S.L. Oehlschlager and A.B. Hanley</i>	230
FAPAS®: An Independent Assessment of Laboratory Proficiency <i>A.L. Patey</i>	234
Subject Index	239
