I Probing Biological Molecules: Theory and Experiment

Flow Oriented Linear Dichroism to Probe Protein Orientation in Membrane Environments	3
<i>A. Rodger, J. Rajendra, R. Mortimer, T. Andrews, J.D. Hirst, A.T.B. Gilbert, R. Marrington, T.R. Dafforn, D.J. Halsall, M. Ardhhammar, B. Nordén, C.A. Woolhead, C. Robinson, T.J.T. Pinheiro, J. Kazlauskaitė, M. Seymour, N. Perez and M.J. Hannon</i>	
Quantitative Protein Circular Dichroism Calculations	20
<i>N.A. Besley and J.D. Hirst</i>	
Probing Cellular Structure and Function by Atomic Force Microscopy	31
<i>M.A. Horton, P.P. Lehenkari and G.T. Charras</i>	
Physical Characterization of Wild Type and <i>mnn9</i> Mutant Cells of <i>Saccharomyces cerevisiae</i> by Atomic Force Microscopy (AFM)	50
<i>A. Méndez-Vilas, I. Corbacho, M.L. González-Martín and M.J. Nuevo</i>	
Probing Supramolecular Organisation at Immune Synapses	58
<i>F.E. McCann, K. Suhling, L.M. Carlin, K. Eleme, K. Yanagi, P.M.W. French, D. Phillips and D.M. Davis</i>	
Probing the Structure of Viral Ion Channel Proteins: A Computational Approach	72
<i>W.B. Fischer and M.S.P. Sansom</i>	
The Impact of H ₂ O ₂ on the Structure of Catalases by Molecular Modelling Methods	78
<i>S.G. Kalko, J.Ll. Gelpí and M. Orozco</i>	
Entropy in the Alignment and Dimerization of Class C G-Protein Coupled Receptors	85
<i>M.K. Dean, C. Higgs, R.E. Smith, P.D. Scott, R.P. Bywater, T.J. Howe and C.A. Reynolds</i>	
Electrostatic Stability of Wild Type and Mutant Transthyretin Oligomers	94
<i>S. Skoulakis and J.M. Goodfellow</i>	
Simulations of Human Lysozyme: Conformations Triggering Amyloidosis in 156T Mutant	103
<i>G. Moraitakis and J.M. Goodfellow</i>	

Collective Excitation Dynamics in Molecular Aggregates: Exciton Relaxation, Self-Trapping and Polaron Formation <i>M. Dahlbom, W. Beenken, V. Sundström and T. Pullerits</i>	118
Surprising Electro-magnetic Properties of Close Packed Organized Organic Layers – Magnetization of Chiral Monolayers of Polypeptide <i>I. Carmeli, V. Shakalova, R. Naaman and Z. Vager</i>	136
Barrier Crossing by a Flexible Long Chain Molecule – The Kink Mechanism <i>K.L. Sebastian</i>	147

II Proteins, Lipids and Their Interactions

Lipid Interaction with Cytidylyltransferase Regulates Membrane Synthesis <i>S. Jackowski and I. Baburina</i>	163
Models and Measurements on the Monolayer Bending Energy of Inverse Lyotropic Mesophases <i>A.M. Squires, J.M. Seddon and R.H. Templer</i>	177
Hemolytic and Antibacterial Activities of LK Peptides of Various Topologies: A Monolayer and PM-IRRAS Approach <i>S. Castano, B. Desbat, H. Wróblewski and J. Dufourcq</i>	191
A Novel Approach for Probing Protein–Lipid Interactions of MscL, a Membrane-Tension-Gated Channel <i>P.C. Moe and P. Blount</i>	199
Folding of The α -Helical Membrane Proteins DsbB and NhaA <i>D.E. Otzen</i>	208
FhuA, an <i>Escherichia coli</i> Transporter and Phage Receptor <i>P. Boulanger, L. Plançon, M. Bonhivers and L. Letellier</i>	215
Morphological Aspects of <i>in cubo</i> Protein Crystallisation <i>C. Sennoga, B. Hankamer, A. Heron, J.M. Seddon, J. Barber and R.H. Templer</i>	221
Mobility of Proteins and Lipids in the Photosynthetic Membranes of Cyanobacteria <i>C.W. Mullineaux and M. Sarcina</i>	237
Partitioning and Thermodynamics of Chlordiazepoxide in <i>n</i> -Octanol/Buffer and Liposome System <i>C. Rodrigues, P. Gameiro, S. Reis, J.L.F.C. Lima and B. De Castro</i>	243

<i>Contents</i>	ix
Distribution of Vitamin E in Model Membranes <i>P.J. Quinn</i>	248
Theory on Opening-up of Liposomal Membranes by Adsorption of Talin <i>Y. Suezaki</i>	254
Differential Scanning Calorimetry and X-Ray Diffraction Studies of Glycolipid Membranes <i>O. Ces, J.M. Seddon, R.H. Templer, D.A. Mannock and R.N. McElhanev</i>	267
Subject Index	277
