About the Author	xiv
Chapter 1 Functionalized Silicas: the Principles	
1.1 Functionalized Silicas	1
1.2 Shapes Dictating Function	3
1.3 The Nature of Sol–Gel Entrapment	4
1.4 The Nature of the Sol–Gel Cage	12
1.5 Tuning Dopant Chemical Reactivity	15
1.6 Tailored Structures	16
1.7 From Disordered to Ordered Structures	19
1.8 Electrochemistry at the Sol–Gel Cage	24
1.9 Symmetry: Chiral Objects and Chiral Cages	26
1.10 Anisotropy and Dissymmetry: Silica Nanotubes and Janus Nanoparticles	29
References	34
Chapter 2 Controlled Release	
2.1 Sol–Gel Microencapsulation	39
2.2 Soluble Silica for Enhanced Release of APIs	44
2.3 Silica Microparticles for Controlled Release	47
2.4 Therapeutic Films	52
2.5 Controlled Release of Enzymes	56
2.6 Controlled DNA Delivery	59
References	61

Chapter 3 Purification and Synthesis

3.1	Size Control, Shape and Purity for Enhanced Separation	64
3.2	Scavenging with Functionalized Silicas	68
3.3	Silica-Entrapped Reactants	75
	References	78

Chapter 4 Coatings

4.1	ORMOSIL-Based Coatings	79
4.2	Optical Coatings	81
4.3	Antifouling Coatings	85
4.4	Anticorrosion Coatings	89
4.5	Scratch-Resistant and Anti-ageing Coatings	95
4.6	Decorative Coatings and Barrier Systems	101
4.7	Functionalisation of Textiles by Sol–Gel Coatings	108
	References	110

Chapter 5 Catalysis

5.1	Catalysis by Sol–Gels: An Advanced Technology for Organic Chemistry	113
5.2	Sol–Gel Entrapped Catalysts: Tailored Catalytic Materials	117
5.3	Physically Entrapped Catalysts	121
5.4	Chemically Entrapped Catalysts	124
5.5	Biocatalysis	129
5.6	Commercial Catalysts and Forthcoming Applications	132
	References	139

Chapter 6 Sensing

6.1	Optical Sol–Gel Sensors	143
6.2	Array Sensors	148
6.3	Templated Xerogels as Selective Chemical Sensors	152
6.4	Forthcoming Sensors	155
	References	158

Chapter 7 Hybrid Silica-Based Composites

7.1	Hybrid Polymer–Silica Composites	160
7.2	New Aqueous Route to Hybrid Silicas	163

<i>Contents</i>	xi
7.3 Hybrid Silica–Polymer Aerogels	166
7.4 Polyethylene@Silica	171
References	175
Chapter 8 Strategic Aspects of Functional Silicas	
8.1 On the Value of Sol–Gel Hybrid Materials	176
8.2 Market Trends	179
8.3 Insight into Sol–Gel Nanotechnology	181
8.4 Sustainability Aspects of Sol–Gel Materials	185
References	186
Subject Index	187
