|--|-----------|
| Chapter 1 Nuclear Shielding | 1 |
| <i>By R. Ditchfield</i> | |
| 1 Introduction | 1 |
| 2 Basic Aspects of Nuclear Shielding | 2 |
| A General Theory | 2 |
| B Basic Physical Aspects | 5 |
| 3 Calculations of Nuclear Shielding | 8 |
| 4 Transmission of Shielding Effects within Molecules | 16 |
| A Introduction | 16 |
| B Inductive, Resonance, and General Substituent Effects | 17 |
| C Electric Field Effects | 32 |
| D Magnetic Anisotropy Effects | 33 |
| E Ring-current Effects | 36 |
| F van der Waals and Steric Effects | 41 |
| G Intramolecular Hydrogen Bonding | 44 |
| H Isotope Effects | 45 |
| I Chemical Shift Anisotropy | 49 |
| 5 Shieldings of Particular Nuclear Species | 51 |
| A Introduction | 51 |
| B Carbon Chemical Shifts | 51 |
| C Fluorine Chemical Shifts | 53 |
| D Phosphorus Chemical Shifts | 54 |
| E Chemical Shifts of other Nuclei | 55 |
| Chapter 2 Nuclear Spin-Spin Coupling | 58 |
| <i>By R. Grinter</i> | |
| 1 Introduction | 58 |
| 2 Theoretical Work | 58 |
| A <i>Ab Initio</i> Calculations | 58 |
| B Semi-Empirical Calculations (Excluding Those on π -Electron Systems) | 59 |
| C Semi-Empirical Calculations on π -Electron Systems | 62 |

| | |
|--|-----------|
| D Calculations of Through-space Coupling | 64 |
| E Other Topics of Theoretical Interest | 64 |
| 3 Coupling of Directly-bonded Nuclei | 64 |
| A Coupling to Hydrogen | 64 |
| B Coupling to Elements of Groups IIIB and IVB | 67 |
| C Coupling to Elements of Group VB | 70 |
| D Coupling to Elements of Group VIB | 73 |
| E Coupling to Elements of Group VIIB | 73 |
| F Miscellaneous One-bond Couplings | 73 |
| 4 Coupling between Nuclei Separated by Two Chemical Bonds, 2J | 74 |
| A Geminal Proton-Proton Coupling | 74 |
| B Two-bond Coupling of Other Nuclei to Protons | 75 |
| C Two-bond Coupling to Carbon [Excluding $^2J(^{13}\text{CX}^1\text{H})$] | 77 |
| D Two-bond Coupling to Group VB Atoms | 78 |
| E $^2J(^{31}\text{PC}^{19}\text{F})$ | 79 |
| F Two-bond (^{19}F , ^{19}F) Coupling | 79 |
| G Miscellaneous Two-bond Couplings | 79 |
| 5 Coupling between Nuclei Separated by Three Chemical Bonds, 3J | 80 |
| A Vicinal Proton-Proton Coupling <i>via</i> Carbon, $^2J(^1\text{HCC}^1\text{H})$ | 80 |
| B Three-bond Coupling of Protons <i>via</i> Other Atoms | 81 |
| C Three-bond Coupling of Other Nuclei to Protons | 82 |
| D Three-bond Coupling to Carbon | 85 |
| E Three-bond Coupling to Phosphorus | 86 |
| F Three-bond Coupling to Fluorine | 87 |
| 6 Coupling between Nuclei Separated by Four Chemical Bonds, 4J | 88 |
| A Proton-Proton Coupling <i>via</i> Carbon, $^4J(^1\text{HCCC}^1\text{H})$ | 88 |
| B Four-bond Coupling of Protons <i>via</i> Other Atoms | 89 |
| C Four-bond Coupling of Other Nuclei to Protons | 89 |
| D Four-bond Coupling to Carbon | 90 |
| E Four-bond Coupling to Fluorine | 90 |
| 7 Coupling between Nuclei Separated by Five Chemical Bonds, 5J | 90 |
| A Proton-Proton Coupling <i>via</i> Carbon, $^5J(^1\text{HCCCC}^1\text{H})$ | 90 |
| B Five-bond Proton-Proton Coupling <i>via</i> Other Atoms | 90 |
| C Five-bond Coupling of Other Nuclei to Protons | 91 |
| D Five-bond Coupling to Carbon | 91 |
| E Five-bond Coupling to Fluorine | 92 |
| 8 Coupling between Nuclei Separated by Six Chemical Bonds, 6J | 92 |
| 9 Coupling between Nuclei Separated by Seven Chemical Bonds, 7J | 92 |

| | |
|--|-----|
| <i>Contents</i> | vii |
| 10 Coupling in π-Electron Systems | 93 |
| A Homoaromatic Molecules | 93 |
| B Heterocyclic Molecules | 95 |
| C Annulenes | 96 |
| D Linear Conjugated Systems | 96 |
| 11 Through-space Coupling | 97 |
| 12 Recent Experimental Advances | 97 |
| Chapter 3 Nuclear Spin Relaxation in Fluids | 99 |
| <i>By M. Holz and M. D. Zeidler</i> | |
| 1 Introduction | 99 |
| 2 Theoretical Work | 99 |
| 3 Relaxation Studies in Pure Liquids | 102 |
| A Proton and Deuteron Relaxation | 102 |
| B ^{13}C Relaxation | 105 |
| C Relaxation of Other Nuclei: ^{14}N , ^{15}N , ^{17}O , ^{19}F , ^{29}Si , ^{77}Se | 107 |
| D Studies of Several Resonant Nuclei: ^2H , ^{13}C , ^{14}N , ^{15}N , ^{19}F | 109 |
| 4 Relaxation Studies in Liquid Mixtures of Non-electrolytes | 110 |
| A Proton and Deuteron Relaxation | 110 |
| B ^{13}C Relaxation | 113 |
| C Studies of Several Resonant Nuclei: ^1H , ^2H , ^{13}C , ^{14}N | 116 |
| 5 Relaxation Studies in Electrolyte Solutions | 117 |
| A Proton and Deuteron Relaxation | 117 |
| B Relaxation of the Nuclei: ^{13}C , ^{17}O , ^{69}Ga , ^{71}Ga , ^{113}Cd | 118 |
| C Relaxation of Alkali-metal and Halogen Nuclei: ^7Li , ^{23}Na , ^{39}K , ^{41}K , ^{87}Rb , ^{133}Cs , ^{35}Cl , ^{79}Br , ^{81}Br | 120 |
| 6 Relaxation Studies in Gas-Liquid Solutions | 122 |
| 7 Relaxation Studies of Gases | 123 |
| A Theoretical Work | 123 |
| B Mono- and Di-atomic Gases | 125 |
| C Polyatomic Gases | 127 |
| Chapter 4 Experimental Techniques | 129 |
| <i>By D. I. Hoult</i> | |
| 1 Introduction | 129 |

| | |
|---|-----|
| 2 Diverse Applications of N.M.R. | 129 |
| A General | 129 |
| B Neutron Resonance and Diffraction | 131 |
| C Image Formation by Zeugmatography | 132 |
| 3 Temperature and Pressure Studies | 134 |
| 4 Measurement of Relaxation Times | 135 |
| A Systematic Errors | 135 |
| B Quantization and Other Errors | 137 |
| C Technique | 138 |
| 5 Broad-line and Solid-state Spectroscopy | 139 |
| 6 Instrumentation | 141 |
| A Signal Processing | 141 |
| B The Probe Area | 142 |
| C The Transmitter | 145 |
| D Modulation Control | 145 |
| E Complete Spectrometers | 146 |
| F Modification of Commercial Instruments | 148 |
| 7 Miscellaneous | 150 |
| Chapter 5 Spectral Analysis | 152 |
| <i>By R. G. Jones</i> | |
| 1 Introduction | 152 |
| 2 New Approaches to Known Spin Systems | 152 |
| A $[A]_2X$ and ABX Systems | 152 |
| B $[AB]_2$ Systems. | 153 |
| C The X-{A} INDOR Spectrum of the $[AX_n]_2$ Spin System | 153 |
| D $[[A]_2X_n]_2$ and $[ABX_n]_2$ Spin Systems, with $n = 1, 2$ or 3 | 154 |
| 3 More Examples of Known Spin Systems | 154 |
| A Three-spin systems | 154 |
| B Four-spin systems | 155 |
| C Five-spin systems | 156 |
| D Six-spin systems | 158 |
| E Seven-spin systems | 159 |
| F Eight-spin systems | 160 |
| G Spin systems of nine nuclei or more | 161 |
| 4 Conclusions | 162 |

| | |
|--|----------------|
| <i>Contents</i> | ix |
| Chapter 6 Bandshape Phenomena in Liquids | 163 |
| <i>By T. Drakenberg and H. Wennerström</i> | |
| 1 Introduction | 163 |
| 2 General Theory | 163 |
| 3 Exchange of Magnetic Sites | 165 |
| A General Theory | 165 |
| B Intramolecular Exchange Processes in Organic Molecules | 166 |
| C Complex Rearrangements | 179 |
| D Intermolecular Exchange Processes | 182 |
| E Biochemical Applications | 185 |
| 4 Relaxation Effects: Linewidths | 185 |
| A Chemical Exchange Rates Determined by the Swift–Connick Approach | 185 |
| B Linewidth Determinations in Paramagnetic Systems | 187 |
| Chapter 7 Fourier Transform N.M.R. | 188 |
| <i>By D. Shaw</i> | |
| 1 Introduction | 188 |
| 2 New Applications | 189 |
| 3 Instrumentation | 192 |
| A Multinuclear Spectrometers | 192 |
| B Quadrature Phase Detection (QPD) | 193 |
| C Solvent Elimination | 194 |
| 4 Computer Simulation of Pulsed N.M.R. | 195 |
| A Multipulse Experiments | 195 |
| B Diffusion and Field Gradient Effects | 196 |
| 5 The Equivalence of Fourier and Continuous Wave Spectra | 197 |
| 6 Correlation Spectroscopy | 198 |
| 7 Hadamard Spectroscopy | 200 |
| 8 Double Resonance in FT N.M.R. | 200 |
| 9 The Measurement of Relaxation Times | 202 |
| 10 Miscellaneous | 204 |

| | |
|--|-----|
| Chapter 8 Macromolecules | 205 |
| <i>By I. D. Robb</i> | |
| 1 Introduction | 205 |
| 2 Reviews | 205 |
| 3 Synthetic Macromolecules | 206 |
| A High-resolution ^1H N.M.R. | 206 |
| B Broadline N.M.R. | 209 |
| C Spin-echo N.M.R. | 211 |
| D ^{13}C N.M.R. | 211 |
| E Other Nuclei | 213 |
| 4 Biological and Related Macromolecules | 214 |
| A ^1H N.M.R. of Synthetic Polypeptides | 214 |
| B ^1H N.M.R. of Proteins | 215 |
| C ^1H N.M.R. of Enzymes | 217 |
| D ^1H N.M.R. of Natural and Related Polypeptides and Poly- saccharides | 219 |
| E ^1H N.M.R. of Polynucleotides | 220 |
| F ^{13}C N.M.R. | 221 |
| G Other Nuclei | 223 |
| 5 Small Molecules | 224 |
| A ^1H N.M.R.: Hydration | 224 |
| B ^1H N.M.R.: General Studies | 228 |
| C ^{13}C N.M.R. Studies | 230 |
| D Other Nuclei | 232 |
| Chapter 9 The Solid State | 235 |
| <i>By P. S. Allen</i> | |
| 1 General Introduction | 235 |
| 2 Half-integral Spins in Diamagnetic Solids | 235 |
| A Introduction | 235 |
| B Theoretical Aspects | 236 |
| C Structural Studies (Broadline Techniques) | 237 |
| D High Resolution in Solids | 238 |
| E Motional Studies (Classical Regime) | 241 |
| F Quantum Effects in Molecular Solids | 246 |
| G N.M.R. Studies of Helium | 248 |
| 3 Nuclei of Spin $> \frac{1}{2}$ in Diamagnetic Solids | 248 |
| A Introduction | 248 |

| | |
|--|-----|
| B ^2H N.M.R. | 249 |
| C The Halogen Nuclei | 251 |
| D The Alkali-metal Nuclei | 252 |
| E Transition-element Nuclei | 252 |
| F Other Nuclei | 252 |
| | |
| 4 Systems with Unpaired Electrons in the Absence of Magnetic Ordering | 253 |
| A Non-metallic Paramagnetic Systems | 253 |
| B Metals | 254 |
| C Alloys and Intermetallic Systems | 256 |
| D Hydrides | 256 |
| E Semiconductors | 256 |
| F One-dimensional Conductors | 258 |
| | |
| 5 Ordered Magnetic Materials | 258 |
| A Ferromagnetic Materials | 258 |
| B Antiferromagnetic Materials | 259 |
| C Ferrimagnetic Materials | 260 |
| | |
| 6 New Techniques and Apparatus | 261 |
| A Techniques | 261 |
| B Data Analysis | 262 |
| C Apparatus | 262 |
| | |
| Chapter 10 Heterogeneous Systems | 264 |
| <i>By W. Derbyshire</i> | |
| | |
| 1 Introduction | 264 |
| | |
| 2 Adsorption Studies | 265 |
| A General | 265 |
| B Cryogenic Studies | 267 |
| C Zeolites | 269 |
| | |
| 3 Polymers, Exchange Resins, and Gels | 271 |
| | |
| 4 Protein Hydration | 274 |
| | |
| 5 Cellular Systems | 277 |
| | |
| 6 Membranes | 283 |
| | |
| 7 Micellar Systems | 289 |

| | |
|--|----------------|
| Chapter 11 Medium Effects on Chemical Shifts and Coupling Constants | 292 |
| <i>By M. I. Foreman</i> | |
| 1 Introduction | 292 |
| 2 Non-specific Solvent Effects | 292 |
| 3 Specific interactions with the Medium | 294 |
| A General | 294 |
| B Solvent Effects on Conformational Equilibria | 294 |
| C The ASIS Effect | 295 |
| D Hydrogen Bonding | 297 |
| E Ionic Solutions | 302 |
| F Micellar Systems | 304 |
| 4 Shift Reagents | 305 |
| A General | 305 |
| B The Stoichiometry of the Shift-reagent-Substrate Complex | 306 |
| C Dipolar, Contact, and Complexation Shifts | 307 |
| D Calculation of the Substrate-Shift Reagent Complex Geometry | 309 |
| E Structural Assignments | 310 |
| F Preferred Binding Sites | 311 |
| Chapter 12 Oriented Molecules | 314 |
| <i>By P. Diehl</i> | |
| 1 Introduction | 314 |
| 2 Structure Determination | 314 |
| A Structures of Rigid Molecules | 314 |
| B Corrections for Vibrational Motion | 318 |
| C Molecules with Internal Motion | 318 |
| 3 Determination of Indirect Couplings | 320 |
| 4 Double-resonance Techniques | 320 |
| 5 Order Parameters | 321 |
| 6 Anisotropies in Indirect Couplings | 322 |
| 7 Anisotropies in Chemical Shifts | 323 |
| 8 Nuclear Quadrupole Coupling Constants | 324 |
| Author Index | 325 |
