<b>Chapter 1 Nuclear Shielding</b>	<b>1</b>
<i>By R. Ditchfield</i>	
<b>1 Introduction</b>	<b>1</b>
<b>2 Basic Aspects of Nuclear Shielding</b>	<b>2</b>
A General Theory	2
B Basic Physical Aspects	5
<b>3 Calculations of Nuclear Shielding</b>	<b>8</b>
<b>4 Transmission of Shielding Effects within Molecules</b>	<b>16</b>
A Introduction	16
B Inductive, Resonance, and General Substituent Effects	17
C Electric Field Effects	32
D Magnetic Anisotropy Effects	33
E Ring-current Effects	36
F van der Waals and Steric Effects	41
G Intramolecular Hydrogen Bonding	44
H Isotope Effects	45
I Chemical Shift Anisotropy	49
<b>5 Shieldings of Particular Nuclear Species</b>	<b>51</b>
A Introduction	51
B Carbon Chemical Shifts	51
C Fluorine Chemical Shifts	53
D Phosphorus Chemical Shifts	54
E Chemical Shifts of other Nuclei	55
<b>Chapter 2 Nuclear Spin-Spin Coupling</b>	<b>58</b>
<i>By R. Grinter</i>	
<b>1 Introduction</b>	<b>58</b>
<b>2 Theoretical Work</b>	<b>58</b>
A <i>Ab Initio</i> Calculations	58
B Semi-Empirical Calculations (Excluding Those on $\pi$ -Electron Systems)	59
C Semi-Empirical Calculations on $\pi$ -Electron Systems	62

D	Calculations of Through-space Coupling	64
E	Other Topics of Theoretical Interest	64
<b>3</b>	<b>Coupling of Directly-bonded Nuclei</b>	<b>64</b>
A	Coupling to Hydrogen	64
B	Coupling to Elements of Groups IIIB and IVB	67
C	Coupling to Elements of Group VB	70
D	Coupling to Elements of Group VIB	73
E	Coupling to Elements of Group VIIB	73
F	Miscellaneous One-bond Couplings	73
<b>4</b>	<b>Coupling between Nuclei Separated by Two Chemical Bonds, <math>^2J</math></b>	<b>74</b>
A	Geminal Proton-Proton Coupling	74
B	Two-bond Coupling of Other Nuclei to Protons	75
C	Two-bond Coupling to Carbon [Excluding $^2J(^{13}\text{CX}^1\text{H})$ ]	77
D	Two-bond Coupling to Group VB Atoms	78
E	$^2J(^{31}\text{PC}^{19}\text{F})$	79
F	Two-bond ( $^{19}\text{F}$ , $^{19}\text{F}$ ) Coupling	79
G	Miscellaneous Two-bond Couplings	79
<b>5</b>	<b>Coupling between Nuclei Separated by Three Chemical Bonds, <math>^3J</math></b>	<b>80</b>
A	Vicinal Proton-Proton Coupling <i>via</i> Carbon, $^2J(^1\text{HCC}^1\text{H})$	80
B	Three-bond Coupling of Protons <i>via</i> Other Atoms	81
C	Three-bond Coupling of Other Nuclei to Protons	82
D	Three-bond Coupling to Carbon	85
E	Three-bond Coupling to Phosphorus	86
F	Three-bond Coupling to Fluorine	87
<b>6</b>	<b>Coupling between Nuclei Separated by Four Chemical Bonds, <math>^4J</math></b>	<b>88</b>
A	Proton-Proton Coupling <i>via</i> Carbon, $^4J(^1\text{HCCC}^1\text{H})$	88
B	Four-bond Coupling of Protons <i>via</i> Other Atoms	89
C	Four-bond Coupling of Other Nuclei to Protons	89
D	Four-bond Coupling to Carbon	90
E	Four-bond Coupling to Fluorine	90
<b>7</b>	<b>Coupling between Nuclei Separated by Five Chemical Bonds, <math>^5J</math></b>	<b>90</b>
A	Proton-Proton Coupling <i>via</i> Carbon, $^5J(^1\text{HCCCC}^1\text{H})$	90
B	Five-bond Proton-Proton Coupling <i>via</i> Other Atoms	90
C	Five-bond Coupling of Other Nuclei to Protons	91
D	Five-bond Coupling to Carbon	91
E	Five-bond Coupling to Fluorine	92
<b>8</b>	<b>Coupling between Nuclei Separated by Six Chemical Bonds, <math>^6J</math></b>	<b>92</b>
<b>9</b>	<b>Coupling between Nuclei Separated by Seven Chemical Bonds, <math>^7J</math></b>	<b>92</b>

<i>Contents</i>	vii
<b>10 Coupling in <math>\pi</math>-Electron Systems</b>	93
A Homoaromatic Molecules	93
B Heterocyclic Molecules	95
C Annulenes	96
D Linear Conjugated Systems	96
<b>11 Through-space Coupling</b>	97
<b>12 Recent Experimental Advances</b>	97
<b>Chapter 3 Nuclear Spin Relaxation in Fluids</b>	99
<i>By M. Holz and M. D. Zeidler</i>	
<b>1 Introduction</b>	99
<b>2 Theoretical Work</b>	99
<b>3 Relaxation Studies in Pure Liquids</b>	102
A Proton and Deuteron Relaxation	102
B $^{13}\text{C}$ Relaxation	105
C Relaxation of Other Nuclei: $^{14}\text{N}$ , $^{15}\text{N}$ , $^{17}\text{O}$ , $^{19}\text{F}$ , $^{29}\text{Si}$ , $^{77}\text{Se}$	107
D Studies of Several Resonant Nuclei: $^2\text{H}$ , $^{13}\text{C}$ , $^{14}\text{N}$ , $^{15}\text{N}$ , $^{19}\text{F}$	109
<b>4 Relaxation Studies in Liquid Mixtures of Non-electrolytes</b>	110
A Proton and Deuteron Relaxation	110
B $^{13}\text{C}$ Relaxation	113
C Studies of Several Resonant Nuclei: $^1\text{H}$ , $^2\text{H}$ , $^{13}\text{C}$ , $^{14}\text{N}$	116
<b>5 Relaxation Studies in Electrolyte Solutions</b>	117
A Proton and Deuteron Relaxation	117
B Relaxation of the Nuclei: $^{13}\text{C}$ , $^{17}\text{O}$ , $^{69}\text{Ga}$ , $^{71}\text{Ga}$ , $^{113}\text{Cd}$	118
C Relaxation of Alkali-metal and Halogen Nuclei: $^7\text{Li}$ , $^{23}\text{Na}$ , $^{39}\text{K}$ , $^{41}\text{K}$ , $^{87}\text{Rb}$ , $^{133}\text{Cs}$ , $^{35}\text{Cl}$ , $^{79}\text{Br}$ , $^{81}\text{Br}$	120
<b>6 Relaxation Studies in Gas-Liquid Solutions</b>	122
<b>7 Relaxation Studies of Gases</b>	123
A Theoretical Work	123
B Mono- and Di-atomic Gases	125
C Polyatomic Gases	127
<b>Chapter 4 Experimental Techniques</b>	129
<i>By D. I. Hoult</i>	
<b>1 Introduction</b>	129

<b>2 Diverse Applications of N.M.R.</b>	129
A General	129
B Neutron Resonance and Diffraction	131
C Image Formation by Zeugmatography	132
<b>3 Temperature and Pressure Studies</b>	134
<b>4 Measurement of Relaxation Times</b>	135
A Systematic Errors	135
B Quantization and Other Errors	137
C Technique	138
<b>5 Broad-line and Solid-state Spectroscopy</b>	139
<b>6 Instrumentation</b>	141
A Signal Processing	141
B The Probe Area	142
C The Transmitter	145
D Modulation Control	145
E Complete Spectrometers	146
F Modification of Commercial Instruments	148
<b>7 Miscellaneous</b>	150
<b>Chapter 5 Spectral Analysis</b>	152
<i>By R. G. Jones</i>	
<b>1 Introduction</b>	152
<b>2 New Approaches to Known Spin Systems</b>	152
A $[A]_2X$ and $ABX$ Systems	152
B $[AB]_2$ Systems.	153
C The X-{A} INDOR Spectrum of the $[AX_n]_2$ Spin System	153
D $[[A]_2X_n]_2$ and $[ABX_n]_2$ Spin Systems, with $n = 1, 2$ or $3$	154
<b>3 More Examples of Known Spin Systems</b>	154
A Three-spin systems	154
B Four-spin systems	155
C Five-spin systems	156
D Six-spin systems	158
E Seven-spin systems	159
F Eight-spin systems	160
G Spin systems of nine nuclei or more	161
<b>4 Conclusions</b>	162

<i>Contents</i>	ix
<b>Chapter 6 Bandshape Phenomena in Liquids</b>	<b>163</b>
<i>By T. Drakenberg and H. Wennerström</i>	
<b>1 Introduction</b>	163
<b>2 General Theory</b>	163
<b>3 Exchange of Magnetic Sites</b>	165
A General Theory	165
B Intramolecular Exchange Processes in Organic Molecules	166
C Complex Rearrangements	179
D Intermolecular Exchange Processes	182
E Biochemical Applications	185
<b>4 Relaxation Effects: Linewidths</b>	185
A Chemical Exchange Rates Determined by the Swift-Connick Approach	185
B Linewidth Determinations in Paramagnetic Systems	187
 <b>Chapter 7 Fourier Transform N.M.R.</b>	 <b>188</b>
<i>By D. Shaw</i>	
<b>1 Introduction</b>	188
<b>2 New Applications</b>	189
<b>3 Instrumentation</b>	192
A Multinuclear Spectrometers	192
B Quadrature Phase Detection (QPD)	193
C Solvent Elimination	194
<b>4 Computer Simulation of Pulsed N.M.R.</b>	195
A Multipulse Experiments	195
B Diffusion and Field Gradient Effects	196
<b>5 The Equivalence of Fourier and Continuous Wave Spectra</b>	197
<b>6 Correlation Spectroscopy</b>	198
<b>7 Hadamard Spectroscopy</b>	200
<b>8 Double Resonance in FT N.M.R.</b>	200
<b>9 The Measurement of Relaxation Times</b>	202
<b>10 Miscellaneous</b>	204

<b>Chapter 8 Macromolecules</b>	205
<i>By I. D. Robb</i>	
<b>1 Introduction</b>	205
<b>2 Reviews</b>	205
<b>3 Synthetic Macromolecules</b>	206
A High-resolution $^1\text{H}$ N.M.R.	206
B Broadline N.M.R.	209
C Spin-echo N.M.R.	211
D $^{13}\text{C}$ N.M.R.	211
E Other Nuclei	213
<b>4 Biological and Related Macromolecules</b>	214
A $^1\text{H}$ N.M.R. of Synthetic Polypeptides	214
B $^1\text{H}$ N.M.R. of Proteins	215
C $^1\text{H}$ N.M.R. of Enzymes	217
D $^1\text{H}$ N.M.R. of Natural and Related Polypeptides and Poly- saccharides	219
E $^1\text{H}$ N.M.R. of Polynucleotides	220
F $^{13}\text{C}$ N.M.R.	221
G Other Nuclei	223
<b>5 Small Molecules</b>	224
A $^1\text{H}$ N.M.R.: Hydration	224
B $^1\text{H}$ N.M.R.: General Studies	228
C $^{13}\text{C}$ N.M.R. Studies	230
D Other Nuclei	232
<b>Chapter 9 The Solid State</b>	235
<i>By P. S. Allen</i>	
<b>1 General Introduction</b>	235
<b>2 Half-integral Spins in Diamagnetic Solids</b>	235
A Introduction	235
B Theoretical Aspects	236
C Structural Studies (Broadline Techniques)	237
D High Resolution in Solids	238
E Motional Studies (Classical Regime)	241
F Quantum Effects in Molecular Solids	246
G N.M.R. Studies of Helium	248
<b>3 Nuclei of Spin <math>&gt; \frac{1}{2}</math> in Diamagnetic Solids</b>	248
A Introduction	248

<i>Contents</i>	xi
B $^2\text{H}$ N.M.R.	249
C The Halogen Nuclei	251
D The Alkali-metal Nuclei	252
E Transition-element Nuclei	252
F Other Nuclei	252
<b>4 Systems with Unpaired Electrons in the Absence of Magnetic Ordering</b>	253
A Non-metallic Paramagnetic Systems	253
B Metals	254
C Alloys and Intermetallic Systems	256
D Hydrides	256
E Semiconductors	256
F One-dimensional Conductors	258
<b>5 Ordered Magnetic Materials</b>	258
A Ferromagnetic Materials	258
B Antiferromagnetic Materials	259
C Ferrimagnetic Materials	260
<b>6 New Techniques and Apparatus</b>	261
A Techniques	261
B Data Analysis	262
C Apparatus	262
<b>Chapter 10 Heterogeneous Systems</b>	264
<i>By W. Derbyshire</i>	
<b>1 Introduction</b>	264
<b>2 Adsorption Studies</b>	265
A General	265
B Cryogenic Studies	267
C Zeolites	269
<b>3 Polymers, Exchange Resins, and Gels</b>	271
<b>4 Protein Hydration</b>	274
<b>5 Cellular Systems</b>	277
<b>6 Membranes</b>	283
<b>7 Micellar Systems</b>	289

<b>Chapter 11 Medium Effects on Chemical Shifts and Coupling Constants</b>	<b>292</b>
<i>By M. I. Foreman</i>	
<b>1 Introduction</b>	<b>292</b>
<b>2 Non-specific Solvent Effects</b>	<b>292</b>
<b>3 Specific interactions with the Medium</b>	<b>294</b>
A General	294
B Solvent Effects on Conformational Equilibria	294
C The ASIS Effect	295
D Hydrogen Bonding	297
E Ionic Solutions	302
F Micellar Systems	304
<b>4 Shift Reagents</b>	<b>305</b>
A General	305
B The Stoichiometry of the Shift-reagent–Substrate Complex	306
C Dipolar, Contact, and Complexation Shifts	307
D Calculation of the Substrate–Shift Reagent Complex Geometry	309
E Structural Assignments	310
F Preferred Binding Sites	311
<b>Chapter 12 Oriented Molecules</b>	<b>314</b>
<i>By P. Diehl</i>	
<b>1 Introduction</b>	<b>314</b>
<b>2 Structure Determination</b>	<b>314</b>
A Structures of Rigid Molecules	314
B Corrections for Vibrational Motion	318
C Molecules with Internal Motion	318
<b>3 Determination of Indirect Couplings</b>	<b>320</b>
<b>4 Double-resonance Techniques</b>	<b>320</b>
<b>5 Order Parameters</b>	<b>321</b>
<b>6 Anisotropies in Indirect Couplings</b>	<b>322</b>
<b>7 Anisotropies in Chemical Shifts</b>	<b>323</b>
<b>8 Nuclear Quadrupole Coupling Constants</b>	<b>324</b>
