Chapter 1	Theoretical and Physical Aspects of Nuclear Shielding	1
	<i>By Cynthia J. Jameson</i>	
1	Introduction	1
2	Theoretical Aspects of Nuclear Shielding	1
	A General Theory	1
	B <i>Ab Initio</i> Calculations	6
	C Semi-empirical Calculations	10
3	Physical Aspects of Nuclear Shielding	12
	A Anisotropy of the Shielding Tensor	12
	B The Effects of Rotation and Vibration	14
	C Isotope Effects	16
	D Intermolecular Effects	18
Chapter 2	Applications of Nuclear Shielding	20
	<i>By G. E. Hawkes</i>	
1	Introduction	20
	A Shielding Scales and Temperature Effects	20
	B Computer-assisted Structural Assignment	21
	C Nuclear Shielding Non-equivalence and Isotopic Replacement	22
	D Isotope Effects on Nuclear Shielding	23
2	Transmission of Effects within Molecules	25
	A Introduction	25
	B Chemical Shift Calculations	25
	C Substituent Effects in General, including Inductive and Resonance Effects	26
	D Van der Waals, Electric Field, and Bond Anisotropy Effects	29
	E Ring-current Effects	30
	F Hydrogen Bonding	31
3	Shieldings of Particular Nuclei	32
	A Introduction	32

	B Hydrogen Shieldings	32
	C Lithium Shieldings	34
	D Beryllium Shieldings	34
	E Boron Shieldings	34
	F Carbon Shieldings	35
	G Nitrogen Shieldings	38
	H Oxygen Shieldings	40
	I Fluorine Shieldings	42
	J Phosphorus Shieldings	42
	K Other Nuclei	43
Chapter 3	Theoretical Aspects of Nuclear Spin–Spin Couplings	52
	<i>By J. Kowalewski</i>	
	1 Introduction	52
	2 Theory and Computational Methods	52
	3 Calculation of Couplings in Model Compounds	55
	4 Empirical Correlations	58
	A Proton–Proton Couplings	58
	B Proton–Other Nucleus Couplings	58
	C Couplings involving Group IV Elements	60
	D Other Couplings	64
	5 Intermolecular Effects	67
Chapter 4	Applications of Spin–Spin Couplings	68
	<i>By D. F. Ewing</i>	
	1 Introduction	68
	2 Coupling of Directly Bonded Nuclei, 1J	68
	A Coupling to Hydrogen	68
	(i) Boron	68
	(ii) Carbon	68
	(iii) Silicon	71
	(iv) Nitrogen	71
	(v) Phosphorus	72
	(vi) Metals	72
	B Coupling to Boron	72
	C Coupling to Elements of Group IV	73
	(i) Elements of Group IV	73
	(ii) Nitrogen	75
	(iii) Phosphorus	75

(iv) Selenium and Tellurium	77
(v) Fluorine	77
(vi) Metals	78
D Coupling to Nitrogen and Phosphorus	79
(i) Nitrogen and Phosphorus	79
(ii) Selenium and Tellurium	79
(iii) Fluorine	80
(iv) Metals	80
(v) Miscellaneous Couplings	82
3 Coupling over Two Bonds, 2J	82
A Geminal Proton Coupling	82
B Coupling of Protons to Other Nuclei	83
(i) Carbon	83
(ii) Silicon, Tin, and Lead	83
(iii) Nitrogen and Phosphorus	83
(iv) Selenium, Tellurium, and Fluorine	84
(v) Metals	84
C Coupling to Elements of Group IV	84
(i) Elements of Group IV	84
(ii) Nitrogen and Phosphorus	85
(iii) Selenium, Tellurium, and Fluorine	86
(iv) Metals	86
D Coupling to Nitrogen and Phosphorus	86
(i) Nitrogen and Phosphorus	86
(ii) Selenium, Tellurium, and Metals	88
4 Coupling through Three Bonds, 3J	88
A Coupling between Protons	88
B Coupling of Protons to Other Nuclei	90
(i) Elements of Group IV	90
(ii) Nitrogen and Phosphorus	90
(iii) Selenium and Tellurium	91
(iv) Fluorine and Metals	91
C Couplings to Elements of Group IV	91
(i) Carbon	91
(ii) Tin and Lead	91
(iii) Nitrogen and Phosphorus	92
(iv) Fluorine and Metals	92
D Coupling to Nitrogen and Phosphorus	93
E Coupling to Fluorine	93
5 Long-range Coupling	93
A Proton-Proton Coupling	93
B Coupling of Protons to Other Nuclei	94
C Coupling between Other Nuclei	95

Chapter 5	Nuclear Spin Relaxation in Fluids	96
	<i>By A. Kratochwill</i>	
	1 Introduction	96
	2 Theoretical Work	96
	3 Relaxation Studies in Pure Liquids	102
	A Proton, Deuteron, and ^{13}C Relaxation	102
	B Other Nuclei: ^{17}O , ^{50}V , ^{51}V , ^{123}Te , and ^{125}Te	107
	4 Relaxation Studies in Mixtures of Non-electrolytes	107
	A Proton, Deuteron, and ^{13}C Relaxation	107
	B Other Nuclei: ^{11}B , ^{14}N , ^{17}O , ^{31}P , ^{27}Al , ^{61}Ni , ^{99}Ru , ^{101}Ru , ^{103}Rh , ^{125}Te , and ^{207}Pb	112
	5 Relaxation Studies in Electrolyte Solutions	114
	A Relaxation of Solvent Nuclei	114
	B Relaxation of Ionic Nuclei	117
Chapter 6	Solid State N.M.R.	121
	<i>By G. R. Hays</i>	
	1 Introduction	121
	2 General	121
	3 High Resolution	125
	A Applications of Cross Polarization and Magic Angle Sample Spinning	127
	B Multiple Pulse Experiments	134
	4 Structure and Analysis	135
	5 Molecular Motion and Phase Transitions	138
	A Phase Transitions	142
	6 Diffusion	142
	7 Doped Systems	144
	8 Tunnelling	145
	9 Hydrates	146
	10 Clathrates and Intercalation Compounds	146

<i>Contents</i>		xi
11 Adsorbed Species		147
12 Glasses		150
13 Hydrogen and Hydrides		150
14 Conducting Systems and Magnetic Materials		151
A Ionic Conductors		153
B Metals		154
C Intermetallic Compounds and Alloys		155
D Magnetic Materials		155
 Chapter 7	Multiple Resonance	158
	<i>By W. McFarlane and D. S. Rycroft</i>	
	1 Introduction	158
	2 Theory of Multiple Resonance	158
	3 Two-dimensional N.M.R.	160
	4 Special Pulse Sequences	170
	5 Techniques and Instrumentation	176
	6 Saturation Transfer (ST)	179
	7 The Nuclear Overhauser Effect	180
	The $^1\text{H}\text{-}\{^1\text{H}\}$ NOE	180
	The $^{13}\text{C}\text{-}\{^1\text{H}\}$ NOE	181
	The $^{15}\text{N}\text{-}\{^1\text{H}\}$ NOE	182
	The $^{19}\text{F}\text{-}\{^1\text{H}\}$ NOE	183
	The $^{31}\text{P}\text{-}\{^1\text{H}\}$ NOE	183
	The $^{113}\text{Cd}\text{-}\{^1\text{H}\}$ NOE	183
	The $^{119}\text{Sn}\text{-}\{^1\text{H}\}$ NOE	183
	8 Other Applications of Multiple Resonance	184
	A General	184
	B Magnitudes and Signs of Couplings	185
	C Chemical Shifts	186
 Chapter 8	Natural Macromolecules	188
	<i>By D. B. Davies</i>	
	1 Introduction	188

	2 Amino-acids, Linear and Cyclic Peptides	188
	3 Polypeptides and Small Proteins	202
	4 Proteins	206
	A Methods	206
	B Function	209
	5 Oligo- and Poly-nucleotides	219
	6 Oligo- and Poly-saccharides	223
Chapter 9	Synthetic Macromolecules	226
	<i>By J. R. Ebdon</i>	
	1 Introduction	226
	2 Books, Reviews and Conference Reports	226
	3 Structural Studies of Polymers in Solution	226
	A Tacticity of Homopolymers	226
	B Geometrical Isomerism	228
	C Mechanisms of Polymerization and Polymerization Kinetics	229
	D End Groups	230
	E Chain Branching	231
	F Copolymers	231
	G Polycondensates and Resins	233
	H Polymer Modification and Degradation	234
	4 Conformational and Relaxation Studies of Polymers in Solution	238
	A Conformation	238
	B Relaxation	239
	5 Bulk Polymers and Swollen Gels	240
	A High Resolution Studies	240
	B Broad Line and Linewidth Studies	242
Chapter 10	Conformational Analysis	246
	<i>By F. G. Riddell</i>	
	1 Introduction	246
	2 Techniques and Methodology	246
	3 Atomic Inversion and Permutation Processes	248

4 Bond Rotation Studies	249
A C–C Bonds	249
(i) sp^3 – sp^3 Bonds	249
(ii) sp^2 – sp^3 Bonds	250
(iii) sp^2 – sp^2 Bonds	251
B C–N Bonds	253
C C–O Bonds	255
D Other Elements Bound to Carbon	256
E Rotation about Other Bonds	257
F Metal–Cyclopentadienyl Bond Rotations	258
5 Four- and Five-membered Rings	258
6 Six-membered Rings	259
A Cyclohexane, Cyclohexene, and Cyclohexanone and their Derivatives	259
B Oxygen-containing Rings	261
C Nitrogen-containing Rings	262
D Sulphur- and Selenium-containing Rings	263
E Phosphorus-containing Rings	263
F Other Rings	264
7 Seven-membered Rings	265
8 Eight-membered Rings	267
9 Larger Ring Systems	268
10 Bicyclic Compounds	270
11 Polycyclic Compounds	271
Chapter 11 N.M.R. of Paramagnetic Species	274
<i>By K. G. Orrell</i>	
1 Introduction	274
2 Theoretical Developments	274
3 Radicals and Radical Ions	276
A Free Radicals	276
B Radical Ions	278
4 Transition-metal Complexes	279
A Isotropic Shifts	279

	B Dynamics	286
	C Relaxation	289
5	Lanthanide Complexes	292
	A Methodology of Shift Reagents	293
	B Dynamic and Conformational Studies	294
	C Solution Structures and Equilibria of Complexes and their Adducts	295
6	Actinide Complexes	298
7	Ion Pairing and Second-sphere Solvation Effects	299
8	Miscellaneous	300
Chapter 12	N.M.R. of Liquid Crystals and Micellar Solutions	302
	<i>By O. Söderman, B. Lindman, and P. Stilbs</i>	
1	Introduction	302
2	Reviews	303
3	Theory	304
4	Thermotropic Liquid Crystals	306
	A Relaxation Studies	306
	B Bandshapes – Order Parameters	308
	C Other Studies	309
5	Micelles, Microemulsions, and Emulsions	310
	A Simple Micelles	311
	B Solubilization and Mixed Micelles	313
	C Microemulsions and Reversed Micelles	315
	D Emulsions, Polymer-Surfactant Systems, and Non-aqueous Lipid Solutions	317
6	Lyotropic Liquid Crystals	318
	A Phase Diagrams and Phase Structures	319
	B Alkyl Chains and Headgroups in Single Phases	321
	C Alkyl Chains and Headgroups in Dispersions/Liposomes	324
	D Alkyl Chains and Headgroups in Vesicles	329
	E Alkyl Chains and Headgroups in Natural Systems	333
	F Water and Ions	336
	G Non-aqueous Systems	338
