## **N.M.R. Books and Reviews**

xxiii

*By G.A. Webb*

## **CHAPTER 1 Theoretical and Physical Aspects of Nuclear Shielding**

*By Cynthia J. Jameson*

1	Theoretical Aspects of Nuclear Shielding	1
A	<i>Ab Initio</i> Calculations	1
B	Semi-empirical Calculations	13
2	Physical Aspects of Nuclear Shielding	14
A	Anisotropy of the Shielding Tensor	14
B	The Effects of Rotation and Vibration	18
C	Isotope Shifts	20
D	Intramolecular and Intermolecular Effects	29
	References	33

## **CHAPTER 2 Applications of Nuclear Shielding**

*By M.J. Forster*

1	Introduction	38
1.1	Shielding Scales and Temperature Effects	38
1.2	Computer Assisted Structural Assignment	38
1.3	Diastereotopic Nuclear Shielding Non Equivalence	39
1.4	Isotope Effects on Shielding	40
2	Transmission of Effects within Molecules	41
2.1	Introduction	41
2.2	Chemical Shift Calculations	41

2.3	Substituent, Inductive and Resonance Effects	44
2.4	Van der Waals, Electric Field and Bond Anisotropy Effects	45
2.5	Ring Current Effects	47
2.6	Hydrogen Bond Effects	47
3	Shielding of Particular Nuclei	48
3.1	Introduction	48
3.2	Hydrogen Shieldings	49
3.3	Lithium Shieldings	49
3.4	Boron Shieldings	50
3.5	Carbon Shieldings	50
3.6	Nitrogen Shieldings	52
3.7	Oxygen Shieldings	54
3.8	Fluorine Shieldings	56
3.9	Phosphorus Shieldings	56
3.10	Other Nuclei	57
	Group IA	57
	Group IB	58
	Group IIA	58
	Group IIB	58
	Group IIIA	61
	Group IIIB	62
	Group IVA	62
	Group VA	64
	Group VB	64
	Group VIA	65
	Group VIB	66
	Group VIIA	67
	Group VIIB	67
	Group VIIIA	67
	Group 0	68
	References	70

### CHAPTER 3 Theoretical Aspects of Spin - Spin Couplings

*By R.E. Overill*

1	Introduction	84
2	Non-Empirical Calculations	84
3	Semi-Empirical Calculations	88
4	Empirical Calculations	92
	A Couplings Involving Protons	92
	B Couplings Involving Nuclei other than Protons	94
5	Miscellaneous	95
	References	96

**CHAPTER 4 Applications of Spin - Spin Couplings***By D.F. Ewing*

1	Introduction	98
2	Coupling of Directly Bonded Nuclei, $^1J$	98
2.1	Coupling to Hydrogen	98
2.1.1	Boron	98
2.1.2	Carbon	98
2.1.3	Silicon, Germanium and Tin	99
2.1.4	Nitrogen and Phosphorus	99
2.1.5	Metals	99
2.2	Coupling to Boron	100
2.3	Coupling to Elements of Group IV	100
2.3.1	Elements of Group IV	100
2.3.2	Nitrogen	101
2.3.3	Phosphorus	103
2.3.4	Selenium and Tellurium	103
2.3.5	Metals	103
2.3.6	Fluorine	104
2.4	Coupling to Elements of Group V	104
2.4.1	Nitrogen and Phosphorus	104
2.4.2	Oxygen, Selenium and Tellurium	105
2.4.3	Metals	105
2.4.4	Other Couplings	107
3	Coupling over Two Bonds, $^2J$	108
3.1	Geminal Proton Coupling	108
3.2	Coupling of Protons to other Nuclei	108
3.2.1	Elements of Group IV	108
3.2.2	Nitrogen and Phosphorus	108
3.2.3	Fluorine	110
3.2.4	Metals	110
3.3	Coupling to Boron	110
3.4	Coupling to Elements of Group IV	110
3.4.1	Elements of Group IV	110
3.4.2	Nitrogen and Phosphorus	111
3.4.3	Selenium and Metals	111
3.4.4	Fluorine	111
3.5	Coupling to Nitrogen and Phosphorus	111
3.5.1	Nitrogen and Phosphorus	111
3.5.2	Metals	112
3.6	Miscellaneous Geminal Couplings	112
4	Coupling over Three Bonds, $^3J$	113
4.1	Coupling between Protons	113
4.2	Coupling of Protons to other Elements	114
4.2.1	Elements of Group IV	114
4.2.2	Nitrogen	114
4.2.3	Metals and Fluorine	114

4.3	Coupling to Elements of Group IV	115
4.3.1	Elements of Group IV	115
4.3.2	Nitrogen and Phosphorus	115
4.3.3	Selenium and Metals	115
4.4	Coupling to Phosphorus	116
4.4.1	Phosphorus	116
4.4.2	Metals and Fluorine	116
4.5	Miscellaneous Couplings	116
5	Long Range Coupling	116
5.1	Interproton Coupling	116
5.2	Coupling of Protons to other Nuclei	117
5.3	Other Couplings	117
	References	118
<b>CHAPTER 5</b>	<b>Nuclear Spin Relaxation in Liquids and Gases</b>	
	<i>By H. Weingärtner</i>	
1	Introduction	128
2	Theoretical and Physical Aspects of Nuclear Spin Relaxation	130
2.1	Relaxation in Coupled Spin Systems	130
2.2	Molecular Reorientation and Internal Motions	132
2.3	Relaxation by Intermolecular DD Interaction	135
2.4	Relaxation in Presence of Paramagnetic Ions	136
2.5	QF Relaxation of Ionic Nuclei	137
2.6	Chemical Exchange	138
3	Relaxation of Less-Common Nuclei	138
3.1	Spin-1/2 Nuclei	138
3.2	QF Relaxing Nuclei	139
	(i) Group IA	139
	(ii) Group IIA	140
	(iii) Group IIIA	140
	(iv) Group VIA	140
	(v) Group VIIA	141
	(vi) Group VIIIA	141
	(vii) Transition Metal Nuclei	141
4	Selected Applications of Nuclear Spin Relaxation	141
4.1	Rotational Motions in Liquids and Solutions	142
4.2	Electrolyte Solutions	143
4.3	Transition Metal Complexes	144
4.4	Ionic Complexes and Ionophores	146
5	Nuclear Spin Relaxation in Gases	146
	References	147

**CHAPTER 6 Solid State N.M.R.***By J. Klinowski*

1	Introduction	153
2	New Techniques	153
3	Theory	155
4	Experimental Aspects	156
5	Silicates and Aluminosilicates	157
6	Cements, Ceramics and Aluminium-containing Compounds	160
7	Polymeric Systems	161
8	Macromolecules and Biological Samples	161
9	Wood and Cellulose	164
10	Coal	164
11	Surfaces and Gels	165
12	Clathrates and Intercalates	166
13	Organometallics and Cluster Compounds	167
14	Molecular Motion	167
15	Phase Transitions	168
16	Glasses	168
17	Organic Solids	170
18	Inorganic Solids	170
	References	170

**CHAPTER 7 Natural Macromolecules***By D.B. Davies*

1	Introduction	191
2	Linear and Cyclic Peptides	191
3	Polypeptides and Proteins	195
	3.1 Methods	195
	3.2 Applications	197
4	Oligo- and Poly-nucleotides	203
5	Oligo- and Poly-saccharides	207
	References	210

**CHAPTER 8 Synthetic Macromolecules***By A.V. Cunliffe*

1	Introduction	223
2	Books, Reviews and Conference Papers	224
3	Structural Studies of Polymers in Solution	226
	A Tacticity of Homopolymers	227
	B Geometrical Isomerism	233
	C End Groups, Kinetics and Mechanism	236
	D Chain Branching	239
	E Copolymers	241
	F Polycondensates and Resins	245
	G Chemical Modification and Degradation	246
4	Conformational and Relaxation Studies of Polymers in Solution	248
	A Conformation	248
	B Relaxation	251
5	Bulk Polymers	258
	A High Resolution Structural Studies	258
	B Dynamic Studies	264
	C Broad Line Studies, Gels, Liquid Crystals	269
	References	274

**CHAPTER 9 Conformational Analysis***By U. Berg and J. Sandström*

1	Introduction	290
2	Techniques and Methodology	290
3	Atomic Inversion and Permutation	292
4	Bond Rotation Studies	293
	A C - C Bonds	293
	(i) $sp^3 - sp^3$ Bonds	293
	(ii) $sp^2 - sp^3$ Bonds	295
	(iii) $sp^2 - sp^2$ Bonds	296
	B C - N Bonds	299
	C C - O Bonds	301
	D Other Elements Bound to Carbon	303
	E Rotation about Other Bonds	303
5	Dynamic Processes in Inorganic and Organometallic Compounds	305

6	Five-membered Rings	310
7	Six-membered Rings	312
	A Carbocyclic Rings	312
	B Oxygen-containing Rings	313
	C Nitrogen-containing Rings	315
	D Sulphur-containing Rings	315
	E Phosphorus-containing Rings	316
	F Other Rings	316
8	Seven-membered Rings	316
9	Eight-membered and Larger Rings	318
10	Bicyclic Compounds	320
11	Polycyclic Compounds	323
	References	324

## **CHAPTER 10 Nuclear Magnetic Resonance of Living Systems**

*By P.G. Morris*

1	Introduction	334
2	N.M.R. Imaging	334
	2.1 Basic Principles and Safety Aspects	334
	2.2 New Techniques and Instrumentation	335
	2.3 Other Nuclei and Chemical Shift Imaging	336
	2.4 Contrast Agents	337
3	High Resolution N.M.R.	339
	3.1 Introduction and Methods	339
	3.2 Cells	341
	3.3 Tissue Studies	347
	3.3.1 Brain	348
	3.3.2 Epithelial Tissues	350
	3.3.3 Eye	350
	3.3.4 Heart	351
	3.3.5 Kidney	355
	3.3.6 Liver	355
	3.3.7 Muscle - Skeletal	357
	3.3.8 Muscle - Smooth	359
	3.3.9 Secretory Glands	359
	3.3.10 Tumours	359
	3.4 Clinical Applications	360
	3.5 Plants	361
	References	366

**CHAPTER 11 N.M.R. of Paramagnetic Species***By K.G. Orrell*

1	Introduction	376
2	Theoretical Developments	376
3	Radicals and Radical Ions	379
	3.1 Free Radicals	379
	3.2 Radical Ions	380
4	Transition-metal Complexes	382
	4.1 Isotropic Shifts	382
	(i) $d^1$	382
	(ii) $d^2$	382
	(iii) $d^3$	382
	(iv) $d^4$ Metal Porphyrins	383
	(v) $d^5$	383
	(vi) $d^5$ Iron Porphyrins	384
	(vii) $d^6$ Iron Porphyrins	387
	(viii) Metal - Sulphur Cluster Compounds	387
	(ix) $d^6$	388
	(x) $d^7$	389
	(xi) $d^8$	390
	(xii) $d^9$	392
	4.2 Dynamics	392
	4.3 Relaxation	396
5	Lanthanide Complexes	397
	5.1 Theory and Methodology of Shift Reagents	397
	5.2 Structural Studies with Lanthanide Shift and Relaxation Reagents	399
	5.3 Structure of Lanthanide Complexes	402
6	Actinide Complexes	405
7	Ion Pairing and Outer Sphere Effects	405
8	Miscellaneous	406
	References	407

**CHAPTER 12 N.M.R. of Liquid Crystals and Micellar Solutions***By A. Khan*

1	Introduction	414
2	Reviews	415

3	Theory	416
4	Thermotropic Liquid Crystals	417
4.1	Relaxation Studies	417
4.2	Bandshapes - Order Parameters	420
4.3	Other Studies	422
5	Isotropic Micellar Solution Phases	423
5.1	Normal Micelles	423
5.2	Solubilization and Mixed Micelles	425
5.3	Reversed Micelles and Microemulsions	426
6	Lyotropic Liquid Crystals	428
6.1	Phase Diagrams and Phase Structures	428
6.2	Alkyl Chains and Headgroups in Single Phases	430
6.3	Alkyl Chains and Headgroups in Dispersions/Liposomes	432
6.4	Alkyl Chains and Headgroups in Vesicles	435
6.5	Alkyl Chains and Headgroups in Natural Systems	437
6.6	Water and Ions	439
6.7	Non-aqueous Systems	440
	References	441
	<b>AUTHOR INDEX</b>	454
