

Preface

The current volume consists of the usual collection of topics, reported on either annually or biennially, which will be familiar to readers of the Specialist Periodical Report on NMR. As in previous years I wish to express my sincere gratitude to the reporters for their very valiant attempts to provide a comprehensive coverage of the NMR literature over the twelve month period to which this volume relates.

It is my great pleasure to welcome to the reporting team Drs. W. Schilf, R. Ludwig, S. M. Kristensen, H. Kurosu and T. Yamanobe. At the same time my sincere thanks go to Drs. L. Y. Lian, J. R. P. Arnold and J. Fisher, who are retiring from the team, and to all the other reporters for their support and diligence in manuscript preparation for this volume.
