Chapter 1	NMR Books and Reviews	1
	<i>By W. Schilf</i>	
1	Books	1
2	Regular Reviews Series	1
3	Edited Books and Symposia	9
4	Reviews in Periodicals	21
5	Reviews and Books in Foreign Languages	37
Chapter 2	Theoretical and Physical Aspects of Nuclear Shielding	47
	<i>By C.J. Jameson and A.C. de Dios</i>	
1	Theoretical Aspects of Nuclear Shielding	47
1.1	General Theory	47
1.2	<i>Ab initio</i> Calculations	51
1.3	Semi-empirical Calculations	58
2	Physical Aspects of Nuclear Shielding	59
2.1	Anisotropy of the Shielding Tensor	59
2.2	Shielding Surfaces and Rovibrational Averaging	62
2.3	Isotope Shifts	63
2.4	Intermolecular Effects on Nuclear Shielding	64
2.5	Absolute Shielding Scales	69
	References	70
Chapter 3	Applications of Nuclear Shielding	76
	<i>By S. Kuroki, N. Asakawa and H. Yasunaga</i>	
1	Introduction	76
2	Shielding of Particular Nuclear Species	76
2.1	Group 1 (^1H , ^2H , $^6,7\text{Li}$, ^{23}Na , ^{39}K , ^{87}Rb , ^{133}Cs)	76
2.2	Group 2 (^9Be , ^{25}Mg , ^{43}Ca , ^{137}Ba)	79
2.3	Group 3 and Lanthanoids (^{45}Sc , ^{89}Y , ^{139}La , ^{171}Yb)	79
2.4	Group 4 ($^{47,49}\text{Ti}$)	80
2.5	Group 5 (^{51}V and ^{93}Nb)	80

2.6	Group 6 (^{95}Mo , ^{183}W)	81
2.7	Group 7 (^{55}Mn)	82
2.8	Group 8 (^{57}Fe , ^{99}Ru)	82
2.9	Group 9 (^{59}Co , ^{103}Rh)	82
2.10	Group 10 (^{195}Pt)	83
2.11	Group 11 (^{63}Cu , $^{107,109}\text{Ag}$)	83
2.12	Group 12 ($^{111,113}\text{Cd}$, ^{199}Hg)	84
2.13	Group 13 (^{11}B , ^{27}Al , ^{71}Ga , $^{203,205}\text{Tl}$)	85
2.14	Group 14 (^{13}C , ^{29}Si , ^{73}Ge , $^{117,119}\text{Sn}$, ^{207}Pb)	89
2.15	Group 15 ($^{14,15}\text{N}$, ^{31}P)	95
2.16	Group 16 (^{17}O , ^{33}S , ^{77}Se , ^{125}Te)	96
2.17	Group 17 (^{19}F , $^{35,37}\text{Cl}$)	100
2.18	Group 18 (^3He , ^{129}Xe)	102
	References	104
Chapter 4	Theoretical Aspects of Spin–Spin Couplings	118
	<i>By H. Fukui</i>	
1	Introduction	118
2	Fully Relativistic Calculation of Nuclear Spin–Spin Couplings	118
3	Nuclear Spin–Spin Coupling Density in Molecules	120
4	Proton Spin–Spin Coupling and Electron Delocalization	121
5	Density–Functional Linear Response Theory	123
6	Heavy Metal–Metal Coupling Constants	124
7	Hartree–Fock’s Stability Problem	127
8	Other <i>Ab Initio</i> Calculations of Spin–Spin Coupling Constants	128
8.1	Spin–Spin Couplings of the $\text{NH}_3 \dots \text{H}_2\text{O}$ Complex	128
8.2	Carbon–Carbon Coupling Constants in Compounds with Strained C–C Bonds	129
8.3	Spin–Spin Couplings in the Organolithium Compounds	130
8.4	Electric Field Effects on $^2J(\text{H},\text{H})$ Spin–Spin Coupling Constants	131
8.5	Hydrogen-bond Transmitted Indirect Nuclear Spin–Spin Couplings	131
8.6	Substituent Effects on $^2J(\text{F}, \text{F})$ and $^3J(\text{F}, \text{F})$ Coupling Constants	132
8.7	Through-Space Spin–Spin Couplings	133
9	Other Density–Functional Calculations of Spin–Spin Couplings	134
9.1	Relativistic Density–Functional Calculations	134
9.2	Calculation of $J(\text{F}, \text{F})$ Spin–Spin Coupling Constants	135
9.3	Spin–Spin Coupling Constants in Formamide	136
9.4	$^1J(\text{C}, \text{C})$ and $^1J(\text{C}, \text{H})$ Coupling Constants	136

9.5	Solvent Effects on Spin–Spin Coupling Constants	136
9.6	Calculations of Spin–Spin Couplings as an Aid to the Conformational Analysis	137
9.7	Calculations of Spin–Spin Couplings in DNA or RNA	138
	References	139
Chapter 5	Applications of Spin–Spin Couplings	146
	<i>By K. Kamińska-Trela and J. Wójcik</i>	
1	Introduction	146
2	New Methods	147
3	One-bond Couplings to Hydrogen	150
4	One-bond Couplings not Involving Hydrogen	153
5	Two-bond Couplings to Hydrogen	159
6	Two-bond Couplings not Involving Hydrogen	160
7	Three-bond Hydrogen–Hydrogen Couplings	161
8	Three-bond Couplings to Hydrogen	168
9	Three-bond Couplings not Involving Hydrogen	172
10	Couplings over More than Three Bonds and Through Space	173
11	Couplings Through Hydrogen Bonds	174
12	Residual Dipolar Couplings	174
	References	178
Chapter 6	Nuclear Spin Relaxation in Liquids and Gases	192
	<i>By R. Ludwig</i>	
1	Introduction	192
2	General, Physical and Experimental Aspects of Nuclear Spin Relaxation	194
2.1	General Aspects	194
2.2	Experimental Aspects	198
2.3	Relaxation in Coupled Spin Systems	199
2.4	Dipolar Couplings and Distance Information	200
2.5	Exchange Spectroscopy	202
2.6	Radiation Damping	204
2.7	Quadrupolar Interactions	206
2.8	Intermolecular Dipolar Interaction in Diamagnetic and Paramagnetic Solution	207
2.9	Slow Motions in Glasses	210
2.10	Models for Molecular Dynamics	212
3	Selected Applications of Nuclear Spin Relaxation	215
3.1	Pure Liquids	215
3.2	Non-electrolyte Solutions	216
3.3	Electrolyte Solutions	217

3.4	Molten Salts	218
4	Nuclear Spin Relaxation in Gases	219
5	Self-diffusion in Liquids	220
5.1	Experimental and Theoretical Aspects	220
5.2	Selected Examples	222
	References	223
Chapter 7	Solid-state NMR Spectroscopy	233
	<i>A.E. Aliev and R.V. Law</i>	
1	Introduction	233
2	Reviews and Introductory Articles	234
3	Theory and Numerical Calculations	237
4	New Technique Developments	241
4.1	Spin 1/2 Nuclei	241
4.2	Quadrupolar Nuclei	245
5	Distance and Angle Measurements by Solid-State NMR. Synergic Methodologies	247
6	NMR Parameters: Experimental and Theoretical Studies	250
6.1	Chemical Shift and its Anisotropy: Spin 1/2 Nuclei	250
6.2	J-Couplings	253
6.3	Quadrupolar Nuclei	253
6.4	Troublesome Nuclei	254
7	Applications	255
7.1	Structural Studies of Organic Solids	255
7.2	Dynamic Studies of Organic Solids by ^2H NMR	258
7.3	Hydrogen-bonded Organic Solids	259
7.4	Structural Studies of Organometallic and Coordination Compounds	260
7.5	Dynamics Studies of Organometallic and Coordination Compounds	262
7.6	Cellulose and Related Materials	263
7.7	Amino Acids	264
7.8	Peptides	265
7.9	Proteins	267
7.10	Lipids and Membranes	271
7.11	Biomedical Applications	271
7.12	Coals and Carbonaceous Materials	272
7.13	Soils and Related Materials	273
7.14	Polymers	274
7.15	Glasses and Amorphous Solids	279
7.16	Cements	281
7.17	Microporous Solids and Related Materials	282
7.18	Surface Science and Catalysis	285
7.19	Inorganic and Other Related Solids	287
	References	293

Chapter 8	Multiple Pulse NMR	306
	<i>By I. Barsukov</i>	
1	Introduction	306
2	General Methods	306
3	NOE, Chemical Exchange, Relaxation and Diffusion	307
3.1	NOE and Chemical Exchange	307
3.2	Relaxation Rate Measurements	307
3.3	Cross-correlated Relaxation Experiments	308
3.4	Diffusion Experiments	309
4	Coupling Constants Measurements	310
4.1	Scalar Couplings	310
4.2	Couplings Across Hydrogen Bonds	310
4.3	Residual Dipolar Couplings	311
5	Inverse Proton Detected Correlation Spectroscopy	314
5.1	Double-resonance Experiments	314
5.2	Isotope-filtered and Edited Experiments	314
5.3	TROSY	315
5.4	Heteronuclear Triple Resonance Experiments	316
	References	324
Chapter 9	NMR of Proteins and Nucleic Acids	326
	<i>By S.J. Matthews</i>	
1	Introduction	326
2	Application and Development of New Methodology	326
2.1	Automated Analysis	326
2.2	Dipolar Couplings	329
2.3	Transverse Relaxation Optimized Spectroscopy (TROSY)	333
3	Macromolecular Structures	335
3.1	Membrane Proteins	335
3.2	Protein Complexes	338
3.3	Nucleic Acid Complexes	342
4	Protein Relaxation and Dynamics	344
5	Protein Folding	348
	References	351
Chapter 10	NMR of Carbohydrates, Lipids and Membranes	357
	<i>By E.F. Hounsell</i>	
1	Introduction	357
2	Drug Discovery and Combinatorial Chemistry	357
3	Metabolomics, Metabonomics and <i>In Vivo</i> Spectroscopy	358
4	Membranes	359
4.1	Sphingomyelins and Glycolipids	359

4.2	Lipids and Cholesterol	360
4.3	Proteins and Peptides within Membranes	361
5	Extracellular Macromolecular Structure	362
6	Ligand-Receptor Interactions Involving Glycosylated Molecules	364
6.1	Oligosaccharide-protein Interactions	364
6.2	Oligosaccharide Conformation and Their Role in Protein Function	365
7	Natural Products	366
7.1	Parasites	366
7.2	Algae	367
7.3	Fungi	367
7.4	Mycobacteria	368
7.5	Bacteria and Vaccines	368
7.6	Plants	371
8	Polysaccharides	374
9	Materials Sciences	376
	References	377
Chapter 11	Synthetic Macromolecules	386
	<i>By H. Kurosu and T. Yamanobe</i>	
1	Introduction	386
2	Primary Structure	386
3	Liquid Crystalline Polymers	405
4	Imaging	405
5	Characterization of the Synthetic Macromolecules	406
6	Dynamics of the Synthetic Macromolecules	412
7	Polymer Blend of the Synthetic Macromolecules	416
	References	420
Chapter 12	NMR in Living Systems	439
	<i>By M.J.W. Prior</i>	
1	General Applications and New Methodology	439
2	Cells	440
2.1	Microorganisms	440
2.2	Blood	441
2.3	Cultured Mammalian and Tumour	441
3	Plants Studies	442
4	Tissues	442
4.1	Brain	442
4.2	Eye	444
4.3	Heart	448
4.4	Liver	448
4.5	Muscle	449

4.6	Tumour	451
4.7	Whole Organisms	451
5	Clinical Studies	451
5.1	Brain	451
5.2	Heart	456
5.3	Joints	456
5.4	Liver	456
5.5	Muscle	456
	References	459
Chapter 13 Nuclear Magnetic Resonance Imaging		465
<i>By T. Watanabe</i>		
1	Introduction	465
2	Overview and Physicochemical Applications	466
2.1	Review	467
2.2	Catalyzed Reaction	467
2.3	Mesophase Formation	468
3	Instruments and Materials	468
3.1	Reviews	468
3.2	Imaging System	469
3.3	Magnets	469
3.4	Probe, Resonator, Coil and Transceiver	469
3.5	Optical Pumping System for Polarized Gases	470
3.6	Cryogenic Systems	470
3.7	Artifact via Implant Biomaterials	471
3.8	Temperature Measurement	471
4	Pulse Sequences and Data Processing	471
4.1	Pulse Sequences	471
4.2	Data Processing	473
5	Hyperpolarized Noble Gases, Gas Phase Imaging and Other Nuclei	473
5.1	Review	473
5.2	Hyperpolarized Nobel Gases	474
5.3	Imaging Via Other Gases	474
5.4	Other Nuclei	475
6	Dynamics: Diffusion, Flow and Velocity Imaging	476
6.1	Reviews	476
6.2	Data Processing	476
6.3	Diffusion	477
6.4	Flow in Suspensions and Colloids	477
6.5	Flow in Tubes	478
6.6	Gas Flow	479
6.7	Concentration Profiles in Columns	479
6.8	Porous Media	479
6.9	Miscellaneous	480

7	Polymer	481
	7.1 Reviews	481
	7.2 Characterization	482
	7.3 Process Analysis	483
	7.4 Polymer Gel Dosimetry	483
	7.5 Tablet Disintegration, Swelling, Drug Release	484
8	Chemical Engineering and Industrial Application	484
	8.1 Reviews	484
	8.2 Process Analysis	485
	8.3 Drying Processes	485
	8.4 Coating Process	486
	8.5 Softening and Melting Process – Coal and Coke	486
9	Plants, Trees and Woods	487
	9.1 Reviews	487
	9.2 Trees	487
10	Food	487
	10.1 Review	487
	10.2 Moisture Migration	487
	10.3 Solid State Fermentations	488
	10.4 Fat Contents, Distribution and Migration	488
	10.5 Fruits and Vegetables	489
	10.6 Tubers	489
11	<i>In Vivo</i> Application	489
	11.1 Reviews	489
	11.2 Gene Expression	489
	11.3 Migration, Flow and Drug Release	490
	11.4 Functional MRI	490
	References	491

Chapter 14 Oriented Molecules **497**

By K.V. Ramanathan, G.A. Nagana Gowda and C.L. Khetrapal

1	Introduction	497
2	Reviews, Theory and General Studies	498
3	New Techniques	500
4	Dynamic NMR Studies	501
5	Chiral, Smectic, Lyotropic and Polymeric Systems	503
6	Relaxation Studies	505
7	Orientational Order in Liquid Crystals	507
8	Membranes and Molecules Oriented Therein	508
9	Structure and Sheilding Tensor Studies of Small Molecules	509
10	Quantum Computing	510
11	Weak Ordering and Biomolecular Studies	512
	11.1 Reviews	512
	11.2 Orienting Media	513

11.3	New Experimental Methodologies	515
11.4	New Pulse Schemes	518
11.5	Computational Methods	519
11.6	Structure, Conformation, Orientation and Dynamics Studies	520
	References	523
Chapter 15	NMR of Liquid Crystals and Micellar Solutions	531
	<i>By M. Monduzzi</i>	
1	Introduction	531
2	General Articles: Books, Models, Reviews	533
3	Liquid Crystals	534
3.1	Thermotropic Liquid Crystals	534
3.2	Lyotropic Liquid Crystals	537
4	Micellar Solutions	545
4.1	Micelles in Amphiphile–Solvent Systems	545
4.2	Solubilisation, Microemulsions and Emulsions	550
	References	556
