<b>Chapter 1</b>	<b>Phosphines and Phosphonium Salts</b>	<b>1</b>
	<i>By D. W. Allen</i>	1
1	Phosphines	1
1.1	Preparation	
1.1.1	From Halogenophosphines and Organometallic Reagents	1
1.1.2	Preparation of Phosphines from Metallated Phosphines	5
1.1.3	Preparation of Phosphines by Addition of P-H to Unsaturated Compounds	10
1.1.4	Preparation of Phosphines by Reduction	11
1.1.5	Miscellaneous Methods of Preparing Phosphines	12
1.2	Reactions of Phosphines	17
1.2.1	Nucleophilic Attack at Carbon	17
1.2.2	Nucleophilic Attack at Halogen	18
1.2.3	Nucleophilic Attack at Other Atoms	19
1.2.4	Miscellaneous Reactions of Phosphines	22
2	Phosphine Oxides and Related Chalcogenides	23
2.1	Preparation	23
2.2	Reactions	25
2.3	Phosphine Chalcogenides as Ligands	27
2.4	Structural and Physical Aspects	28
3	Phosphonium Salts	28
3.1	Preparation	28
3.2	Reactions	30
4	$p\pi$ -Bonded Phosphorus Compounds	31
5	Phosphirenes, Phospholes and Phosphinines	37
	References	43

<b>Chapter 2</b>	<b>Pentacoordinated and Hexacoordinated Compounds</b>	<b>62</b>
	<i>By C.D. Hall</i>	
1	Introduction	62
2	Acyclic Phosphoranes	63
3	Monocyclic Phosphoranes	63
4	Bicyclic and Tricyclic Phosphoranes	67
5	Hexacoordinate Phosphorus Compounds	75
	References	80
<b>Chapter 3</b>	<b>Quinquevalent Phosphorus Acids</b>	<b>82</b>
	<i>By B.J. Walker</i>	
1	Introduction	82
2	Phosphoric Acids and their Derivatives	82
2.1	Synthesis of Phosphoric Acids and their Derivatives	82
2.2	Reactions of Phosphoric Acids and their Derivatives	93
2.3	Selected Biological Aspects	100
3	Phosphonic and Phosphinic Acids	103
3.1	Synthesis of Phosphonic and Phosphinic Acids and their Derivatives	103
3.1.1	Alkyl, Cycloalkyl, Aralkyl and Related Acids	103
3.1.2	Alkenyl, Alkynyl, Aryl, Heteroaryl and Related Acids	105
3.1.3	Halogenoalkyl and Related Acids	108
3.1.4	Hydroxyalkyl and Epoxyalkyl Acids	109
3.1.5	Oxoalkyl Acids	111
3.1.6	Aminoalkyl and Related Acids	112
3.1.7	Sulfur- and Selenium-containing Compounds	115
3.1.8	Phosphorus–Nitrogen Bonded Compounds	115
3.1.9	Phosphorus-containing Ring Systems	116
3.2	Reactions of Phosphonic and Phosphinic Acids and their Derivatives	117
3.3	Selected Biological Aspects	124

<i>Contents</i>		xi
4	Structure	126
	References	127
<b>Chapter 4</b>	<b>Nucleotides and Nucleic Acids</b>	<b>135</b>
	<i>By J.S. Vyle and N.M. Howarth</i>	
1	Introduction	135
2	Mononucleotides	135
2.1	Nucleoside Acyclic Phosphates	135
2.1.1	Mononucleoside Phosphate Derivatives	135
2.1.2	Polynucleoside Monophosphates	140
2.2	Nucleoside Cyclic Phosphates	142
3	Nucleoside Polyphosphates	145
4	Oligo- and Polynucleotides	154
4.1	DNA Synthesis	154
4.2	RNA Synthesis	161
4.3	The Synthesis of Modified Oligodeoxynucleotides and Modified Oligoribonucleotides	161
4.3.1	Oligonucleotides Containing Modified Phosphodiester Linkages	161
4.3.2	Oligonucleotides Containing Modified Sugars	170
4.3.3	Oligonucleotides Containing Modified Bases	178
5	Oligonucleotide Conjugates	191
6	Nucleic Acid Structures	204
	References	208
<b>Chapter 5</b>	<b>Ylides and Related Species</b>	<b>219</b>
	<i>By N. Bricklebank</i>	
1	Introduction	219
2	Phosponium Ylides	219
2.1	Theoretical and Mechanistic Studies of Phosphorus Ylides and the Wittig Reaction	219
2.2	Synthesis and Characterisation of Phosponium Ylides	223
2.3	Ylides Coordinated to Metals	227

2.4	Reactions of Phosphonium Ylides	231
2.4.1	Reactions with Carbonyl Compounds	231
2.4.2	Miscellaneous Reactions	233
3	The Synthesis and Reactions of Aza-Wittig Reagents	235
4	Structure and Reactivity of Lithiated Phosphine Oxide Anions	238
5	Structure and Reactivity of Phosphonate Anions	238
6	Selected Synthetic Applications of Wittig Reactions	241
	References	244
<b>Chapter 6</b>	<b>Phosphazenes</b>	<b>249</b>
	<i>By J. C. van de Grampel</i>	
1	Introduction	249
2	Linear Phosphazenes	249
3	Cyclophosphazenes	260
4	Polyphosphazenes	271
5	Crystal Structures of Phosphazenes and Related Compounds	280
	References	286
<b>Chapter 7</b>	<b>Physical Methods</b>	<b>295</b>
	<i>By R. N. Slinn</i>	
1	Electron Paramagnetic (Spin) Resonance Spectroscopy	295
2	Vibrational and Rotational Spectroscopy	297
2.1	Vibrational Spectroscopy	297
2.2	Rotational Spectroscopy	298
3	Electronic Spectroscopy	298
3.1	Absorption Spectroscopy	298
3.2	Fluorescence and Chemiluminescence Spectroscopy	298
4	X-Ray Structural Studies	299

4.1	X-Ray Diffraction (XRD)	299
4.1.1	Two-coordinate Compounds	299
4.1.2	Three-coordinate Compounds	299
4.1.3	Four-coordinate Compounds	300
4.1.4	Five- and Six-coordinate Compounds	302
4.2	X-Ray Absorbption Near Edge Spectroscopy (XANES)	302
4.3	Electron Diffraction	303
5	Electrochemical Methods	303
5.1	Dipole Moments	303
5.2	Cyclic Voltammetry and Polarography	303
5.3	Potentiometric and Conductometric Methods	304
6	Thermochemistry and Thermal Methods	304
7	Mass Spectroscopy/Spectrometry	304
8	Chromatography and Related Techniques	305
8.1	Gas Chromatography and Gas Chromatography-Mass Spectroscopy (GC-MS)	305
8.2	Liquid Chromatography	305
8.2.1	High-performance Liquid Chromatography and LC-MS	305
8.2.2	Thin-layer Chromatography (TLC)	306
8.3	Capillary Electrophoresis (CE) and Micellar Electrokinetic Chromatography (MEKC)	306
	References	306
