Chapter 1 Group I: The Alkali and Coinage Metals	1
<i>By J. L. Wardell</i>	
1 General Alkali-metal Chemistry	1
Aromatic Hydrocarbonl-Akali Metal Compounds: Radical Anion and Dianion Salts	1
Fluorenyl-Alkali Metal and Related Compounds	2
2 Lithium	3
General	3
Alkyl- and Aryl-lithium Compounds	4
Preparations	4
Thermodynamic Studies	5
Reactions	5
Allylic Lithium Compounds	6
Alkenyl-lithium Compounds	7
3 Other Alkali-metal Compounds	8
4 Coinage Metals	8
General	8
Copper	9
Alkyl- and Aryl-copper Compounds	9
Alkyne, Alkene, and Arene π -Complexes	10
Isocyanide and Carbonyl Complexes	10
Reactions	10
Silver	11
σ -Bonded Compounds	11
π -Bonded Compounds	11
Gold	11
Aryl-gold(I) Compounds	11
Other Gold(I) Complexes and Reactions	12
Aryl-gold(III) Complexes	13
Carbene Complexes	13
Alkene Complexes	14
5 Appendix	14

Chapter 2 Group II: The Alkaline Earths and Zinc and its Congeners	15
<i>By J. L. Wardell</i>	
1 Beryllium	15
2 Magnesium	15
Structures	16
Preparation	16
Physical Properties	16
Reactions	17
Rearrangements	17
Carbonyl and Related Reactions	18
Other Reactions	20
Transition Metal Catalysis	21
3 Calcium, Strontium, and Barium	21
Compounds	21
Reactions	22
4 Zinc and Cadmium	23
5 Mercury	25
Methylmercury Complexes	25
Other Crystal Structures	25
Mercurations	25
Carbenoids	26
Equilibration Studies	27
Other Alkylmercury(II) Compounds	27
Spectral Data	28
Mercury(I) Species and Electrochemical Reactions	28
Complexes and Ligand Exchanges	29
Demercurations	30
Oxymercuration and Aminomercurations	31
Chapter 3 Group III: Boron	32
<i>By S. K. Gupta</i>	
1 Current Trends	32
2 Books and Reviews	32
3 Boranes	33
Preparation	33
Reactions	34
Hydroboration	34
Polar Reactions of Boron Compounds	36
Radical and Photochemical Reactions of Boron Compounds	41
Allylborane Chemistry	42
Theoretical Aspects	43

<i>Contents</i>	vii
4 Organic Borates as Synthetic Intermediates	44
Carbon-transfer Reactions	44
Hydride-transfer Reactions	48
5 Boron-containing Cyclic Compounds	49
6 Boron–Nitrogen Compounds	51
Aminoboranes	51
Boron–Nitrogen Heterocycles	52
Borazine Chemistry	54
7 Structure, Spectroscopy, and Analysis of Boron Compounds	55
Chapter 4 Carbaboranes	57
<i>By T. Onak</i>	
1 Carbaborane Interconversions	57
2 σ-Bonded Derivatives	57
3 Cage Metallocarbaboranes	60
4 Physical Properties	64
5 Bibliography	66
Chapter 5 Group III: Aluminium, Gallium, Indium, and Thallium	68
<i>By J. P. Maher</i>	
1 Introduction	68
2 Aluminium	68
Preparations	68
Reactions and Complexes	69
Structure, Bonding, and Exchange Reactions	81
Organic Preparative Reactions	85
Catalysts and Transition-metal Alane Complexes	87
3 Gallium and Indium	88
Preparation and Physical Properties	88
Complexes and Reactions	91
4 Thallium	93
Preparations, Reactions, and Complexes	93
Organic Applications	95
5 Bibliography	98

Chapter 6 Group IV: The Silicon Group	102
<i>By D. A. Armitage</i>	
1 Introduction	102
2 The Carbon–Metal Bond	102
Carbenes and the Group Analogues	110
Cyclic Derivatives	112
3 Catenation	123
4 Hydrides of Silicon, Germanium, and Tin	126
5 The Radicals $R_3M\cdot$ and their Reactions and Metal Derivatives	130
6 Nitrogen Derivatives	135
Disilazane Derivatives	136
Polyazo-compounds	140
7 Phosphine and Arsine Derivatives	142
8 Oxygen Derivatives	143
9 Sulphur and Selenium Derivatives	148
10 Halogen Derivatives	150
11 Bibliography	151
Chapter 7 Group V: Antimony, Arsenic, and Bismuth	157
<i>By J. L. Wardell</i>	
1 Tervalent Species	157
2 Arsinimines and Ylides	159
3 Quinquevalent Species	160
Chapter 8 Metal Carbonyls	162
<i>By E. W. Abel and F. G. A. Stone</i>	
1 Introduction	162
2 I.r. Spectroscopy and Matrix Isolation Studies	162
3 ^{13}C N.M.R. Studies and CO Ligand Site Exchange in Polynuclear Structures	164
4 Electron Spectra	166
5 Molecular Structure Determination by X-Ray Crystallography	167
6 Chemical Reactions and New Compounds	168

Chapter 9 Organometallic Compounds containing Metal–Metal Bonds	172
<i>By N. G. Connelly</i>	
1 Introduction	172
2 Compounds containing Bonds between Transition Metals	172
Homonuclear Bonds between Transition Metals	172
Niobium	172
Chromium, Molybdenum, and Tungsten	172
Manganese	173
Iron	174
Ruthenium and Osmium	180
Cobalt, Rhodium, and Iridium	183
Nickel and Platinum	186
Gold	187
Heteronuclear Bonds between Transition Metals	187
3 Compounds containing Bonds between Transition Metals and the Elements of Groups IIB—VB	189
Group IIB	189
Group IIIB	189
Group IVB	191
Spectral Studies	191
General Synthetic Studies	191
Chromium, Molybdenum, and Tungsten	193
Manganese and Rhenium	194
Iron	194
Ruthenium	195
Cobalt and Iridium	195
Nickel and Platinum	196
Group VB	197
4 Compounds containing Group IIB—Group IVB Element Bonds	197
5 Bibliography	197
Chapter 10 Substitution Reactions of Metal and Organometal Carbonyls with Group V and VI Donor Ligands	199
<i>By D. A. Edwards</i>	
1 Introduction	199
2 Group IV	199
3 Group V	199

4 Group VI	200
Carbonyl Complexes of Cr ⁰ , Mo ⁰ , and W ⁰	200
Cyclopentadienyl Carbonyl and Related Complexes of Cr, Mo, and W	210
Other Group VI Complexes	213
5 Group VII	213
Cyclopentadienyl Carbonyl and Related Complexes	213
Other Group VII Complexes	215
6 Group VIII: Fe, Ru, and Os	221
Cyclopentadienyl Carbonyl and Related Complexes	221
Other Iron Carbonyls	224
Other Ru and Os Carbonyl Complexes	226
7 Group VIII: Co, Rh, and Ir	228
Cobalt Complexes	228
Rhodium and Iridium Complexes	229
8 Group VIII: Ni, Pd, and Pt	232
9 Reviews and Other Reports	234
Chapter 11 Carbenes and Carbynes	235
<i>By J. A. Connor</i>	
1 Introduction	235
2 Synthesis of Carbene Complexes	235
From Co-ordinated Carbon Monoxide	235
From Co-ordinated Isocyanide	236
From Heterocyclic Precursors	237
Other Methods	237
3 Reactions of Carbene Complexes	239
4 Structure and Bonding in Carbene Complexes	241
Crystallographic Studies	241
Spectroscopic Properties	243
5 Carbyne Complexes	243
6 Bibliography	245

<i>Contents</i>	xi
Chapter 12 Complexes Containing Metal–Carbon σ-Bonds	246
<i>By B. L. Booth</i>	
1 Reviews	246
2 Stability and Cleavage of Metal–Carbon σ-Bonds	246
3 Binary Alkyl and Aryl Complexes	250
Group III	250
Group IV	250
Group V	250
Group VI	251
Group VII	252
Group VIII	252
Group I	252
4 Complexes containing Donor Ligands	253
Group VIII	253
Iron Triad	253
Cobalt Triad	254
Nickel Triad	255
Group I	258
Cyanomethyl and Related Complexes	259
5 Complexes containing Carbonyl or Cyclopentadienyl Groups	260
Cyclopentadienyl Complexes	260
Carbonyl Compounds	263
Cyclopentadienyl Carbonyl Compounds	265
σ -Bonded π -Cyclopentadienyl Complexes	267
6 Cyclometallated Complexes	268
Nitrogen Donors	268
Phosphorus Donors	271
Sulphur Donors	272
Other Examples of Metal–Carbon σ -Bonds Stabilized by the Chelate Effect	274
7 Insertion Reactions	276
Olefin and Acetylene Insertion into Metal–Hydrogen Bonds	276
Olefin and Acetylene Insertion into Metal–Carbon Bonds	279
Carbon Monoxide Insertion (and De-insertion)	281
Sulphur Dioxide Insertion	283
Other Insertion Reactions	284
8 Nucleophilic Attack on Co-ordinated Ligands	286
9 Cobaloximes, Cobalamins, and Related Compounds	287

Chapter 13 Hydrocarbon–Metal π-Complexes	293
<i>By B. L. Booth</i>	
1 Reviews	293
2 Complexes of Mono-olefins	293
Copper, Silver, and Gold	293
Zerovalent Nickel, Palladium, and Platinum	294
Bivalent Platinum, Palladium, and Nickel	295
Cobalt, Rhodium, and Iridium	297
Iron, Ruthenium, and Osmium	298
Other Transition Elements	301
Dibenzylidene Acetone and Related Ligands	302
3 Complexes of Chelating Unconjugated Dienes and Poly-olefins	302
4 Complexes of Acyclic Conjugated Dienes	306
5 Complexes of Cyclic Conjugated Dienes	310
Cyclobutadiene Complexes	310
Cyclopentadiene Complexes	312
Complexes of Six- and Seven-membered Rings	312
Complexes of Eight-membered Rings	316
6 Complexes of Polycyclic Hydrocarbons	319
7 Complexes Derived from Acetylenes	324
8 Complexes Derived from Three-membered Rings, Allenes, Ketens, and Trimethylenemethane	330
9 Mono-olefin Chelate Complexes	332
10 Reactions of Olefins and Acetylenes with Polynuclear Carbonyls of Ruthenium and Osmium	334
Chapter 14 η^3-Allylic Complexes	336
<i>By M. Cooke</i>	
1 Reviews	336
2 Lithium	336
3 Vanadium, Niobium, and Tantalum	336
4 Chromium, Molybdenum, and Tungsten	336
5 Iron	342

<i>Contents</i>	xiii
6 Ruthenium and Osmium	345
7 Cobalt	345
8 Rhodium and Iridium	346
9 Nickel	349
10 Palladium and Platinum	350
Chapter 15 π-Cyclopentadienyl, π-Arene, and Related Complexes	353
<i>By W. E. Watts</i>	
1 Introduction	353
2 Papers of General Interest	353
3 Mono-(π-cyclopentadienyl)metal Complexes	354
Studies of General Interest	354
Sandwich Complexes	354
Vanadium and Niobium	355
Chromium, Molybdenum, and Tungsten	356
Manganese	358
Iron and Ruthenium	359
Cobalt, Rhodium, and Iridium	362
Nickel and Palladium	363
4 Bis-(π-cyclopentadienyl)metal Complexes	364
Studies of General Interest	364
Titanium, Zirconium, and Hafnium	365
Vanadium, Niobium, and Tantalum	367
Chromium, Molybdenum, and Tungsten	367
Manganese	368
Iron, Ruthenium, and Osmium	368
Cobalt	372
Nickel	372
Lanthanide and Actinide Elements	372
5 (π-Arene)metal Complexes	373
Synthetic Studies	373
Spectroscopic and Physical Properties	374
Reactions of Mono-(π -arene)metal Complexes	375
Reactions of Bis-(π -arene)metal Complexes	375

6 Metallacarbaborane Complexes	377
General Synthetic Methods	377
Nine-vertex Metallacarbaboranes	378
Eleven-vertex Metallacarbaboranes	378
Twelve-vertex Metallacarbaboranes	378
Thirteen-vertex Metallacarbaboranes	378
Fourteen-vertex Metallacarbaboranes	379
7 Complexes with Related Ligands	379
Pyrrolyl Complexes	379
Silacyclopentadienyl Complexes	379
Thiophen Complexes	379
Thiopyran Complex	379
Borabenzene Complexes	379
Phosphabenzene Complexes	379
Borazine Complexes	380
Chapter 16 Oxidative Addition and Related Reactions	381
<i>By S. D. Robinson</i>	
1 Introduction	381
2 Titanium	381
3 Vanadium and Tantalum	382
4 Chromium, Molybdenum, and Tungsten	382
5 Rhenium	384
6 Iron, Ruthenium, and Osmium	384
7 Cobalt, Rhodium, and Iridium	385
8 Nickel, Palladium, and Platinum	392
9 Copper and Gold	396
Chapter 17 Homogeneous Catalysis by Transition-metal Complexes	
<i>By C. White</i>	397
1 Introduction and General Reviews	397
2 Hydrogenation	397
3 Hydrogen-transfer Reactions	401
4 ^1H-^2H and ^1H-^3H Exchange	402
Heterogenized Homogeneous Catalysts	403

<i>Contents</i>	xv
5 Hydroformylation and Related Carbonylation Reactions	403
Heterogenized Homogeneous Catalysts	404
6 Decarbonylation	405
7 Isomerization and Rearrangement	405
Alkene Isomerization	405
Carbon Skeletal Rearrangements	407
8 Metathesis	412
9 Alkene and Alkyne Dimerization, Oligomerization, and Co-condensation Reactions	413
Alkenes	413
Acetylenes	414
Co-condensation Reactions	415
10 Catalysed Addition to Alkenes, and Telomerization Reactions	418
11 Synthesis	419
12 Oxidation and Deoxygenation	421
13 Fixation of Dinitrogen and Carbon Dioxide	422
 Chapter 18 Diffraction Studies of Organometallic Compounds	 425
<i>By Lj. Manojlović-Muir and K. W. Muir</i>	
1 Introduction	425
Coverage	425
Layout of Structural Data and Cross-reference Tables	425
2 Main Table: Compounds and Structural Data	426
3 Cross-reference Tables	458
Metal Listings	458
Ligand Listings	459
4 Selected Molecular Structures	461
Binary Carbonyls	461
Substituted Carbonyls	463
Cyanides and Isocyanides	465
Acetylenes	466
Other <i>monohapto</i> -Ligands	466
Cyclopentadienyls	467
Other <i>polyhapto</i> -Ligands	468
Cluster Compounds	469
Main Group Compounds	469
Miscellaneous Complexes	470
 Author Index	 472
