Introduction and Review of the Year

1

By Ian R. Dunkin

Photolysis of Carbonyl Compounds

9

By William M. Horspool

1	Norrish Type I Reactions	10
2	Norrish Type II Reactions	11
2.1	1,5-Hydrogen Transfer	11
2.2	Other Hydrogen Transfers	15
3	Oxetane Formation	15
4	Miscellaneous Processes	17
4.1	Decarboxylation and Decarbonylation	17
4.2	Reactions of Miscellaneous Haloketones and Acid Chlorides	18
4.3	Other Processes	19
	References	20

**Enone Cycloadditions and Rearrangements:
Photoreactions of Dienones and Quinones** **23***By William M. Horspool*

1	Cycloaddition Reactions	23
1.1	Intermolecular Cycloadditions	23
1.2	Intramolecular Cycloadditions	29
2	Rearrangement Reactions	31
2.1	α , β -Unsaturated Systems	31
2.2	β , γ -Unsaturated Systems	34
3	Photoreactions of Thymines and Related Compounds	35
3.1	Photoreactions of Pyridones	35
3.2	Photoreactions of Thymines, etc	36
4	Photochemistry of Dienones	39
4.1	Cross-conjugated Dienones	39
4.2	Linearly Conjugated Dienones	41
5	1,2-, 1,3- and 1,4-Diketones	42
5.1	Reactions of 1,2-Diketones and other 1,2-Dicarbonyl Compounds	42
5.2	Reactions of 1,3-Diketones	43
5.3	Reactions of 1,4-Diketones	44
5.4	Fulgides and Fulgimides	46
6	Quinones	48
6.1	<i>p</i> -Quinones	48
	References	49

Photochemistry of Alkenes, Alkynes and Related Compounds **55***By William M. Horspool*

1	Reactions of Alkenes	55
1.1	<i>cis,trans</i> -Isomerization	55
1.2	Miscellaneous Reactions	65
2	Reactions involving Cyclopropane Rings	70
2.1	The Di- <i>p</i> -methane Rearrangement and Related Processes	70
2.2	Miscellaneous Reactions Involving three-membered Ring Compounds	72
3	Reactions of Dienes and Trienes	74
4	($2\pi + 2\pi$)-Intramolecular Additions	77
5	Dimerization and Intermolecular Additions	79
6	Miscellaneous Reactions	82
6.1	Reactions of Halo Compounds	82

6.2	Miscellaneous Rearrangements and Bond Fission Processes	84
	References	84
<hr/>		
	Photochemistry of Aromatic Compounds	91
	<i>By Andrew Gilbert</i>	
1	Introduction	91
2	Isomerization Reactions	91
3	Addition Reactions	94
4	Substitution Reactions	98
5	Cyclization Reactions	101
6	Dimerization Processes	119
7	Lateral Nuclear Shifts	121
8	Miscellaneous Photochemistry of Aromatic Systems	124
	References	128
<hr/>		
	Photooxidation and Photoreduction	133
	<i>By Niall W. A. Geraghty</i>	
1	Introduction	133
2	Reduction of the Carbonyl Group	134
3	Reduction of Nitrogen-containing Compounds	136
4	Miscellaneous Reductions	142
5	Singlet Oxygen	146
5.1	Singlet Oxygen	146
5.2	Oxidation of Aliphatic Compounds	149
5.3	Oxidation of Aromatic Compounds	153
6	Other Oxidation Methods	155
6.1	Oxidation of Aliphatic Compounds	155
6.2	Oxidation of Aromatic Compounds	163
7	Oxidation of Nitrogen-containing Systems	175
8	Miscellaneous Oxidations	190
	References	196
<hr/>		
	Photoelimination	205
	<i>By Ian R. Dunkin</i>	
1	Introduction	205
2	Elimination of Nitrogen from Azo Compounds and Analogues	205

3	Elimination of Nitrogen from Diazo Compounds and Diazirines	207
3.1	Generation of Alkyl and Aryl Carbenes	207
3.2	Photolysis of α -Diazo Carbonyl and Related Compounds	210
4	Elimination of Nitrogen from Azides and Related Compounds	212
5	Photoelimination of Carbon Monoxide and Carbon Dioxide	215
5.1	Photoelimination of CO from Organometallic Compounds	217
6	Photoelimination of NO and NO ₂	218
7	Miscellaneous Photoeliminations and Photofragmentations	219
7.1	Photoelimination from Hydrocarbons	219
7.2	Photoeliminations from Organohalogen Compounds	220
7.3	Photofragmentations of Organosilicon Compounds	223
7.4	Photofragmentations of Organosulfur Compounds	224
7.5	Photolysis of <i>o</i> -Nitrobenzyl Derivatives and Related Compounds	225
7.6	Other Photofragmentations	227
	References	228

Polymer Photochemistry **232**

By Norman S. Allen

1	Introduction	232
2	Photopolymerization	232
2.1	Photoinitiated Addition Polymerization	233
2.2	Photocrosslinking	236
2.3	Photografting	243
3	Luminescence and Optical Properties	243
4	Photodegradation and Photooxidation Processes in Polymers	262
4.1	Polyolefins	263
4.2	Polystyrenes	263
4.3	Poly(Acrylates) and -(Alkyl Acrylates)	263
4.4	Poly(Vinyl Halides)	264
4.5	Polyamides and Polyimides	264
4.6	Poly(Aromatics)	264
4.7	Silicone Polymers	264
4.8	Polyurethanes and Rubbers	264
4.9	Polyesters	264
4.10	Photoablation of Polymers	265

4.11	Natural Polymers	265
4.12	Miscellaneous Polymers	266
5	Photostabilization of Polymers	266
6	Photochemistry of Dyed and Pigmented Polymers	267
	References	268
