

Chemists – would you like a chance to win a trip abroad or at least a book token?

Can you answer questions like this?

X has the molecular formula  $C_4H_9Br$ . Bromination of X produces three dibromoisomers. What is the structural formula of X.

If you can answer yes to both the questions get your chemistry teacher to enter you in the Royal Society of Chemistry's International Chemistry Olympiad competition. You will have to answer a 2 hour exam paper which we will mark.

Full details are to be found on the poster circulated with Education in Chemistry or at <http://www.chemsoc.org/networks/learnnet/olympiad.htm>
