

*Not all chemists wear white coats*

The baby is playing happily and it could all be thanks to you. That's if you've got a chemical science qualification of course. Because working as a chemist you could be responsible for making sure that her shampoo doesn't sting her eyes and that her bubble bath is safe.

Working with children is very rewarding, so are most careers using chemistry. Whether it's helping to conserve the environment, or as a lawyer fighting for your company's rights.

A chemical science qualification allows you to take whichever career path you choose.

The list is endless ranging from careers in accountancy, computing and sales to marketing, textiles or the discovery of new medicines.

Quite simply, chemistry not only helps you understand the world, it opens it up to you. And who knows? One day this little girl might grow up to be a chemist and find out for herself what we mean.

Find out more about careers using chemistry and the chemical sciences by writing to The Education Department, Royal Society of Chemistry, Burlington House, Piccadilly, London W1J 0BA or email [education@rsc.org](mailto:education@rsc.org)
