

Not all chemists wear white coats

Not if they're involved in patent law. In giving chemical companies sound financial advice. Or in marketing their new products. A chemical science qualification gives you the skills necessary for a wide range of careers including those in law and business and not just laboratory work. For example, patent attorney's need to research cases, analyse the evidence, understand detail, communicate well to others and handle complex concepts. That's why you shouldn't be surprised to find chemists working in areas like banking, finance, computing, law and media - as well as in, textiles, conservation, health and food. Quite simply, chemistry and the chemical sciences not only help you understand the world, they open it up to you. Find out more about careers using chemistry and the chemical sciences by writing to The Education Department, Royal Society of Chemistry, Burlington House, Piccadilly, London W1J 0BA or email education@rsc.org
