

Whether it's caring for penguin colonies in Antarctica or working to save an endangered species in the tropical rainforests, a chemical science qualification can take you just about as far from a laboratory and a white coat as you can get.

And in between there are a whole host of industries where chemistry opens the door to many interesting careers. From the medical and veterinary sciences to banking, accountancy and marketing to name but a few.

Chemical science qualifications give you options. Options that will help you do whatever you want to do - be whoever you want to be. Art restoration expert, top sales person or computer whizz, it's up to you. Quite simply, chemistry not only helps you understand the world, it opens it up to you.

Find out more about careers using chemistry and the chemical sciences by writing to The Education Department, Royal Society of Chemistry, Burlington House, Piccadilly, London W1J 0BA or email education@rsc.org

Not all chemists wear white coats
