That's Chemistry

Make up - Cosmetics. Character. The way things are arranged. From the human genome to the interaction of mankind with the environment. Chemistry is all about understanding the world around us and is vital to life – the air you breathe, the food you eat, the clothes you wear, the environment you live in.

In the rapidly changing world of the 21st century, a chemistry qualification can take you anywhere – and demonstrates you have the qualities to succeed in both scientific and non-scientific careers. Qualities like adaptability, creativity, curiosity, tenacity and analytical skills. Plus a knowledge of what makes up the world.

That's why you'll find chemists carving out careers in accountancy, law, research, sales, IT, consultancy, manufacturing, advertising, engineering and many other areas...in industries as diverse as space research, food and drink, pharmaceuticals, retail, construction and cosmetics.

Quite simply, with a chemistry qualification, you'll always be made up.

Find out more about careers using chemistry by writing to The Education Department, Royal Society of Chemistry, Burlington House, Piccadilly, London W1J 0BA, or email: education@rsc.org http://www.chemsoc.org/networks/learnnet/careers.htm
