## Synopsis

The success of drug development depends on the nomination of high quality, low risk candidates for clinical studies.

The pharmaceutical industry aims to reduce both time and costs involved in taking a drug into development by ensuring lead candidates have the right properties to deliver well tolerated, efficacious drugs in a clinical setting. This symposium will highlight the challenges and opportunities in the transfer of a lead candidate to early clinical development.

This symposium will cover the transition from drug discovery into drug development and will draw together the views of key opinion leaders from both fields of research. It is an opportunity to learn the views from pharmaceutical industry on what defines a lead candidate and the pre-clinical process through which compounds must succeed prior to nomination for clinical development.

5% discounts apply to all SCI conferences by booking online at [www.soci.org](http://www.soci.org)

## Attendees

This meeting is aimed at all scientists who are involved in translational research between drug discovery and clinical development. It will also be of interest to those working in research or development who may wish to learn more about the challenges in this area.

## Information on SCI

SCI is an international, independent charity whose remit is to promote the application of science for the benefit of society.

SCI is the publisher of many well respected journals and industry leader Chemistry & Industry magazine (C&I). SCI can offer a network of contacts spanning education, science and business, an in-depth knowledge of chemical related industries together with a rolling programme of conferences, awards and scholarships to help further knowledge and support those involved in the sector no matter what stage of their careers.
