International Conference on Organic Electronics ICOE 2010

June 22-25, Université Paris Diderot, Paris, France

Organizing Chair: Gilles Horowitz (Université Paris Diderot, France)

Co-Chair: Yvan Bonnassieux (Ecole polytechnique France)

Topics

Organic electronics is a rapidly growing technology that is anticipated to compare with conventional microelectronics in the near future to make transistor circuits, displays and solar cells. Other application like sensors are expected. The International Conference on Organic Electronics was first held in Eindhoven, The Netherlands, on June 21-24, 2005. The following issues took place in the same location in June 2006, 2007 and 2008. In 2009, ICOE moved to Liverpool, United Kingdom, and will be located in Paris, France in 2010. The conference intends to cover all aspects of organic electronics, including materials and chemistry, transistors, OLEDs, photovoltaic cells, circuits and circuit design, manufacturing and inclusion in systems.

Conference location

Université Paris Diderot, Bâtiment Buffon, rue Henri Brion, 75205 Paris cedex 13

Key dates

- Deadline for submission of abstract
- Notification of acceptance
- Advance registration

February 28th, 2010

April 15th, 2010

May 31st, 2010

Abstracts

Abstracts for oral and poster presentations should consist of a maximum of two A4 pages including figures. They should clearly indicate the authors' full address, including e-mail. A template will be available on the web site.

Side event

As a side event, a one-day tutorial will be held on June 22nd at the same place as the conference. The tutorial will consist of three two-hour lectures given by known specialist of the domain.

ICOE secretariat

ITODYS, Université Paris Diderot, 15 rue Jean-Antoine de Baïf, 75205
