

Seed and Soil

In Vivo Models of Metastasis

EACR

European Association for Cancer Research

Conference
Series

www.eacr.org

Berlin, Germany • 27 - 29 November 2017

Building on the strong success of recent meetings in the EACR Conference Series, we are pleased to invite you to join us at the 1st joint EACR-MRS Conference on Seed and Soil: In Vivo Models of Metastasis.

MRS METASTASIS
RESEARCH SOCIETY

Metastasis is responsible for over 90% of cancer patient deaths, largely due to the fact that therapies are generally ineffective against detectable metastatic tumours. There is thus a critical need to better understand the metastatic process in order to identify effective therapeutic strategies, which can only be done with the appropriate experimental tools. This conference will give an in-depth overview of the latest tools to research metastasis and showcase the latest findings of world-leading metastasis researchers.

KEY DEADLINES

Abstract submission
29 September 2017

Bursary application
29 September 2017

Registration
31 October 2017

Topics

- New models of metastasis
- Imaging metastasis
- Transgenic models of metastasis
- Modelling metastasis

Reduced registration rates and
Meeting Bursary Awards
for EACR/MRS members

Confirmed Speakers

Hellmut Augustin Germany

Ivana Bozic USA

Karin de Visser Netherlands

Neta Erez Israel

Janine Terra Erler* Denmark

Peter Friedl USA

Yibin Kang USA

Robert Kerbel Canada

Chris Madsen Sweden

Erik Sahai UK

Jonathan Sleeman* Germany

Ulrike Stein* Germany

Andreas Trumpp Germany

Christof von Kalle* Germany
