

CHEMISTRY WORLD

JOBS LIVE

Manchester 21 November 2018
London 28 November 2018

Talent,
connected

Stand-out recruits need stand-out employers

We run Chemistry World Jobs Live to help the talented, passionate and enthusiastic people who make up the chemical sciences community to find the role that will allow them to reach their potential.

To do that, we need companies and organisations exhibiting who can offer those roles.

Building on the success of past events, Chemistry World Jobs Live 2018 will be an exciting, must-attend event for both delegates and exhibitors.

Still offering the popular 121 CV clinics and career management workshops, the refreshed programme will highlight the value of apprenticeships in the chemical sciences. There will also be more workshops and presentations, designed to attract more job seekers, from all sectors and specialisms, as potential candidates for the roles that you are recruiting.

Each year, attendees include students, recent graduates, and experienced professionals exploring a career or company change. Everyone who attends is highly engaged and actively searching for job opportunities from top recruiters. By exhibiting, you'll have the chance to have productive career discussions with delegates who are ready to listen, and ready to take on a new challenge.

Chemistry World Jobs Live events in London and Manchester play host to national and international employers – stand-out companies who deserve stand-out employees to help them lead the way in securing the future of the chemical sciences.

We hope that you will be among them in 2018.

Manchester 21 November - central setting

Museum of Science & Industry
Liverpool Road, Castlefield, Manchester, M3 4FP, UK

In the heart of one of the liveliest cities in the North, the Museum of Science and Industry is the perfect place to find enthusiastic and motivated delegates as it plays host to the first Chemistry World Jobs Live 2018.

Travel

Train: the nearest railway station is Deansgate, which is 10 minutes' walk away.

Tram or bus: Deansgate–Castlefield Metrolink stop is serviced by all trams except for Line C (Bury–Piccadilly).

Deansgate–Castlefield tram stop is 10 minutes' walk away.

London 28 November - a capital venue

The Royal Society of Chemistry at Burlington House
Piccadilly, London W1J 0BA, UK

Easily reached in London's West End, the Royal Society of Chemistry's prestigious headquarters combines scientific heritage and contemporary facilities to offer a setting that will get you all the right reactions from our delegates.

Travel

London underground: the nearest tube stations are Green Park and Piccadilly Circus.

Buses: bus numbers 14, 19, 22 and 38 all stop near to Burlington House.

About us

The Royal Society of Chemistry's purpose is to advance excellence in the chemical sciences - to improve the lives of people around the world now and in the future.

We are the professional body for chemists in the UK, and an internationally renowned publisher of high quality chemical science knowledge. We support and represent over 54,000 members and an international community.

Around the world, we invest in educating future generations of scientists. We raise and maintain standards. We partner with industry and academia, promoting collaboration and innovation. We advise governments on policy. And we are committed to promoting, supporting and celebrating diversity - championing every one of the talented groups and individuals who are securing chemistry's future.

We are a non-profit organisation with a reputation strengthened over 176 years. If you work with or love chemistry, we are here to support you - for the benefit of science and humanity.
