

Drug Testing and the Olympics

A lecture by Professor David Cowan

*Organised by the Royal Society of Chemistry
in association with Swansea University and
The Learned Society of Wales*

12.45pm, 14 February 2013, ILS Seminar Room,
Swansea University

Professor David Cowan, Director of King's College London's Drug Control Centre, Kings College London. He has published extensively in the field of pharmaceutical analysis especially as it relates to detecting drug administration in sport. He has continued to develop analytical approaches and to apply advanced analytical techniques to investigate drug administration both licit and illicit. Professor Cowan also led the drug testing programme at the London 2012 Olympic and Paralympic Games.

For more information, and to register your interest in the lecture, please contact:
