Management**

## **REACH - Post Pre-Registration What Now?**

The University of Hull  
Tuesday January 13<sup>th</sup> 2009: 9:00 - 17:00

With over 350, 000 substance pre-registrations already with ECHA, the REACH process is in full swing, but just what comes next?

This high quality conference brings together experienced REACH practitioners to review the pre-registration process, and then discuss what is required in the next phase.

We are delighted to welcome Dr Derek Knight, the new Senior Scientific Advisor to Geert Dancet at ECHA, as the keynote speaker. His review on ECHA's experience in the pre-registration phase will be complimented by the Competent Authority perspective and an industry outlook.

Further sessions look at substance identity and how to cost-effectively fill in your data gaps. The latest guidance on Exposure Scenarios will be reviewed and then the conference will close with guidance on how to effectively participate in SIEFs.

If you have any involvement in the REACH process, this conference will give you invaluable advice and guidance on best practice to effectively advance your REACH programme in 2009.

To reserve your place e-mail [reach@hull.ac.uk](mailto:reach@hull.ac.uk) or call 01482 466940 for a registration form and payment details.
